1979 trivia questions and answers: Science Fiction and Fantasy Book Review Neil Barron, R. Reginald, 2009-11-01 Science Fiction & Fantasy Book Review was founded in 1979 to provide comprehensive coverage of all the major and minor books being released in the genre at that time. This was the golden era of SF publishing, with a thousand titles (old and new) hitting the stands and the bookshelves each and every year. From the older classics to the newest speculative fiction, this was the period when the best and the brightest shined forth their talents. SF&FBR included reviews by writers in the field, by amateur critics, and by litterateurs and University professors. Over a thousand books were covered during the single year of publication, many of them having been reviewed no where else, before or since. The January 1980 issue includes a comprehensive index of all the works featured during the preceding year. This reprint will be a welcome addition to the literature of science fiction and fantasy criticism. Neil Barron is a retired bibliographer and literary critic, editor of the acclaimed Anatomy of Wonder series. Robert Reginald was the publisher for twenty-five years of Borgo Press, and has authored over 110 books of his own.

1979 trivia questions and answers: Tortured Cardboard Philip E. Orbanes, 2019-07-23 The term "tortured cardboard" sums up what happens to cardboard when making a board game (bound, cut, folded, punched). And, as you'll learn, great board games often reflect whatever "tortures" culture. Each gained immortality after a chaotic beginning and a chance survival. Why? Because—be it chess, backgammon, Clue®, Monopoly®, Scrabble®, Settlers of Catan®, or one of ten others featured in this book—each is replete with "lessons" applicable to achievement in your life. As the twenty-first century gathers momentum, our love affair with board games continues to strengthen. They involve us, they refine social skills, and they teach great lessons applicable in real life. "Tortuous" is the journey of every great board game, from birth in chaotic times, through survival by mere chance, to raging popularity and eventual immortality. Tortured Cardboard reveals how the great ones came to endure and—all fun aside—how each teaches us something about our own behavior while providing "rules" that can work in your life.

1979 trivia questions and answers: Cognitive Unconscious and Human Rationality Laura Macchi, Maria Bagassi, Riccardo Viale, 2016-03-11 Examining the role of implicit, unconscious thinking on reasoning, decision making, problem solving, creativity, and its neurocognitive basis, for a genuinely psychological conception of rationality. This volume contributes to a current debate within the psychology of thought that has wide implications for our ideas about creativity, decision making, and economic behavior. The essays focus on the role of implicit, unconscious thinking in creativity and problem solving, the interaction of intuition and analytic thinking, and the relationship between communicative heuristics and thought. The analyses move beyond the conventional conception of mind informed by extra-psychological theoretical models toward a genuinely psychological conception of rationality—a rationality no longer limited to conscious, explicit thought, but able to exploit the intentional implicit level. The contributors consider a new conception of human rationality that must cope with the uncertainty of the real world; the implications of abandoning the normative model of classic logic and adopting a probabilistic approach instead; the argumentative and linguistic aspects of reasoning; and the role of implicit thought in reasoning, creativity, and its neurological base. Contributors Maria Bagassi, Linden J. Ball, Jean Baratgin, Aron K. Barbey, Tilmann Betsch, Eric Billaut, Jean-François Bonnefon, Pierre Bonnier, Shira Elqayam, Keith Frankish, Gerd Gigerenzer, Ken Gilhooly, Denis Hilton, Anna Lang, Stefanie Lindow, Laura Macchi, Hugo Mercier, Giuseppe Mosconi, Ian R. 1979 trivia questions and answers: The Psychology of Social Status Joey T. Cheng, Jessica L. Tracy, Cameron Anderson, 2014-09-09 The Psychology of Social Status outlines the foundational insights, key advances, and developments that have been made in the field thus far. The goal of this volume is to provide an in-depth exploration of the psychology of human status, by reviewing each of the major lines of theoretical and empirical work that have been conducted in this vein. Organized thematically, the volume covers the following areas: - An overview of several prominent overarching theoretical perspectives that have shaped much of the current research on social status. - Examination of the personality, demographic, situational, emotional, and cultural underpinnings of status attainment, addressing questions about why and how people attain status. - Identification of the intra- and inter-personal benefits and costs of possessing and lacking status. - Emerging research on the biological and bodily manifestation of status attainment - A broad review of available research methods for measuring and experimentally manipulating social status A key component of this volume is its interdisciplinary focus. Research on social status cuts across a variety of academic fields, including psychology, sociology, anthropology, organizational science others; thus the chapter authors are drawn from a similarly wide-range of disciplines. Encompassing the current state of knowledge in a thriving and proliferating field, The Psychology of Social Status is a fascinating and comprehensive resource for researchers, students, policy-makers, and others interested in learning about the complex nature of social status, hierarchy, dominance, and power.

1979 trivia questions and answers: HR Giger ARh+ Hansruedi Giger, Gaby Falk, 2001 Giger's multi-faceted career: From surrealistic dream landscapes, to album cover designs, and sculpture For the last three decades H.R. Giger has reigned as one of the leading exponents of fantastic art. After he studied interior and industrial design for eight years at the School of Commercial Art in Zurich, Switzerland (1962-1970), he was soon gaining attention as an independent artist, with endeavors ranging from surrealistic dream landscapes created with a spray gun and stencils, to album cover designs for famous pop stars, and sculpture. In addition, Giger's multi-faceted career includes designing two bars, located in Tokyo and Chur, as well as work on various film projects--his creation of the set design and title figure for Ridley Scott's film Alien won him not only international fame but also an award for Best Achievement for Visual Effects (1980). 1979 trivia questions and answers: Eye Tracking Kenneth Holmqvist, Marcus Nyström, Richard Andersson, Richard Dewhurst, Halszka Jarodzka, Joost van de Weijer, 2011-09-22 We make 3-5 eye movements per second, and these movements are crucial in helping us deal with the vast amounts of information we encounter in our everyday lives. In recent years, thanks to the development of eye tracking technology, there has been a growing interest in monitoring and measuring these movements, with a view to understanding how we attend to and process the visual

information we encounter Eye tracking as a research tool is now more accessible than ever, and is growing in popularity amongst researchers from a whole host of different disciplines. Usability analysts, sports scientists, cognitive psychologists, reading researchers, psycholinguists, neurophysiologists, electrical engineers, and others, all have a vested interest in eye tracking for different reasons. The ability to record eye-movements has helped advance our science and led to technological innovations. However, the growth of eye tracking in recent years has also presented a variety of challenges - in particular the issue of how to design an eye-tracking experiment, and how to analyse the data. This book is a much needed comprehensive handbook of eye tracking methodology. It describes how to evaluate and acquire an eye-tracker, how to plan and design an eye tracking study, and how to record and analyse eye-movement data. Besides technical details and theory, the heart of this book revolves around practicality - how raw data samples are converted into fixations and saccades using event detection algorithms, how the different representations of eye movement data are calculated using AOIs, heat maps and scanpaths, and how all the measures of eye movements relate to these processes. Part I presents the technology and skills needed to perform high-quality research with eye-trackers. Part II covers the predominant methods applied to the data which eye-trackers record. These include the parsing of raw sample data into oculomotor events, and how to calculate other representations of eye movements such as heat maps and transition matrices. Part III gives a comprehensive outline of the measures which can be calculated using the events and representations described in Part II. This is a taxonomy of the measures available to eye-tracking researchers, sorted by type of movement of the eyes and type of analysis. For anyone in the sciences considering conducting research involving eye-tracking, this book will be an essential reference work.
