employee wellness challenge ideas: Building a Resilient Workforce Institute of Medicine, Board on Health Sciences Policy, Planning Committee on Workforce Resiliency Programs, 2012-07-18 Every job can lead to stress. How people cope with that stress can be influenced by many factors. The Department of Homeland Security (DHS) employs a diverse staff that includes emergency responders, border patrol agents, federal air marshals, and policy analysts. These employees may be exposed to traumatic situations and disturbing information as part of their jobs. DHS is concerned that long-term exposure to stressors may reduce individual resilience, negatively affect employees' well-being, and deteriorate the department's level of operation readiness. November 2011. The September workshop focused on DHS's operational and law enforcement personnel, while the November workshop concentrated on DHS policy and program personnel with top secret security clearances. The workshop brought together an array of experts from various fields including resilience research, occupation health psychology, and emergency response. Building a Resilient Workforce: Opportunities for the Department of Homeland Security: Workshop Summary: Defines workforce resilience and its benefits such as increased operational readiness and long-term cost savings for the specified population; Identifies work-related stressors faced by DHS workers, and gaps in current services and programs; Prioritizes key areas of concern; and Identifies innovative and effective worker resilience programs that could potentially serve as models for relevant components of the DHS workforce. employee wellness challenge ideas: Corporate Stewardship Susan Albers Mohrman, James O'Toole, Edward E. Lawler III, 2017-09-29 Stewardship entails a profound understanding and acceptance of the challenges that result from the organization's interdependence with the societal and ecological contexts in which it operates—and of what it takes to embrace the challenges to be a force for building a viable future. This book dares to ask 'why' business leaders should embrace stewardship in the current market where profit reigns supreme. A shift in approach represents fundamental change for the corporate world, and even the most advanced corporations consider themselves to be in the starting block of this transition. The book sets out the practical ways in which corporate stewardship can be achieved through embedding new approaches across the different functions of a business. This book, written by the leading thinkers in sustainability research, provides practical guidance on how companies can resolve the paradoxical challenges they face. How can they be at the same time profitable and responsible, effective and ethical, sustainable and adaptable? It explores what businesses are doing, what they can and should do to effectively respond to external challenges, and focuses on how leaders can create cultures, strategies, and designs far beyond "business as usual". Stewards must not only make proper current use of that which they hold in trust, they also must leave it in better condition for use by future generations. Corporate Stewardship challenges managers, executives, and directors of global corporations to think and act as stewards of both their organizations and the physical and social environments in which they operate.

employee wellness challenge ideas: State of The Global Workplace Gallup, 2017-12-19 Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons — but resistance to rapid change is a big one, Gallup's research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.

employee wellness challenge ideas: How We Work Leah Weiss, PhD, 2018-03-13 “I have long thought that what the Buddha taught can be seen as a highly developed science of mind which, if made more accessible to a lay audience, could benefit many people. I believe that Dr. Weiss's book, in combining such insights with science and good business practice, offers an effective mindfulness based program that many will find helpful.” --His Holiness, the Dalai Lama A practical guide to bringing our whole selves to our professional work, based on the author's overwhelmingly popular course at the Stanford Graduate School of Business. In today's workplace, the traditional boundaries between work and personal are neither realistic nor relevant. From millennials seeking employment in the sharing economy to Gen Xers telecommuting to Baby Boomers creating a meaningful second act, the line that separates who we are from the work we do is blurrier than ever. The truth is, we don't show up for our jobs as a portion of ourselves—by necessity, we bring both our hearts and our minds to everything we do. In How We Work, mindfulness expert and creator of the perennially-waitlisted Stanford Business School course Leading with Mindfulness and Compassion

Dr. Leah Weiss explains why this false dichotomy can be destructive to both our mental health and our professional success. The bad news, says Weiss, is that nothing provides more opportunities for negative emotions—anxiety, anger, envy, fear, and paranoia, to name a few—than the dynamics of the workplace. But the good news is that these feelings matter. How we feel at and about work matters—to ourselves, to the quality of our work, and ultimately to the success of the organizations for which we work. The path to productivity and success, says Weiss, is not to change jobs, to compartmentalize our feelings, or to create a false professional identity—but rather to listen to the wisdom our feelings offer. Using mindfulness techniques, we can learn how to attend to difficult feelings without becoming subsumed by them; we can develop an awareness of our bigger picture goals that orients us and allows us to see purpose in even the most menial tasks. In *How We Work*, Weiss offers a set of practical, evidence-based strategies for practicing mindfulness in the real world, showing readers not just how to survive another day, but how to use ancient wisdom traditions to sharpen their abilities, enhance their leadership and interpersonal skills, and improve their satisfaction.

employee wellness challenge ideas: Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

employee wellness challenge ideas: Resilience at Work Salvatore R. MADDI, Deborah M. KHOSHABA, 2005-03-04 This useful resource gives you the knowledge, tools, and encouragement you need to embark on your journey to becoming a hardier, more successful person. More than experience or training, resilience in the face of stressful situations and rapid changes determines whether you ultimately succeed or fail in the workplace. It allows you to thrive even in tumultuous conditions, to turn potential disasters into growth opportunities. The good news for the legions of other workers who become overwhelmed by stress is that resilience in the face of life's problems is

not an inborn personality trait, but a set of skills and attitudes that you can learn and develop. Packed with insightful examples, case studies, and self-assessment tools, *Resilience at Work* explains how to: Approach change as a meaningful challenge no matter how stressful the circumstances, and stay committed to your work, rather than detaching and giving up. Gain control by understanding the upside and the downside of change, and take actions to influence beneficial outcomes. Turn stressful changes to your advantage and map out sound problem-solving strategies. Resolve ongoing conflicts and build an environment of assistance and encouragement between you and your coworkers. Decrease feelings of isolation and powerlessness by understanding the 3Cs that give you the ability to thrive amid disruptive changes: commitment, control, and challenge. Reorganization, downsizing, mergers, budget pressures, transfers, job insecurity, and more are producing today's unpredictable, pressure-cooker conditions, and making it harder for less resilient people to achieve the success they deserve. *Resilience at Work* supplies insights and strategies you can use to combat your fear of change and uncover the opportunities that can be found in even the most stressful situations.

employee wellness challenge ideas: All In Josh Levs, 2015-05-12 When journalist Josh Levs was denied fair parental leave by his employer after his child was born, he fought back—and won. Since then, he's become an advocate for modern families and working fathers. In *All In*, he explores the changing face of fatherhood and what it means for our individual lives, families, workplaces, and society. Fatherhood today is far different from previous generations. Stay-at-home dads are increasingly common, and growing numbers of men are working part-time or flextime schedules to spend more time with their children. Even the traditional breadwinner-dad is being transformed. Dads today are more emotionally and physically involved on the home front. They are “all in” and—like mothers—they are struggling with work-life balance and doing it all. Journalist and “dad columnist” Josh Levs explains that despite these unprecedented changes, our laws, corporate policies, and gender-based expectations in the workplace remain rigid. They are preventing both women and men from living out the equality we believe in—and hurting businesses in the process. Women have done a great job of speaking out about this, Levs—whose fight for parental leave made front page news across the country—argues. It's now time for men to join in. Combining Levs' personal experiences with investigative reporting and frank conversations with fathers about everything from work life to money to sex, *All In* busts popular myths, lays out facts, uncovers the forces holding all of us back, and shows how we can all join together to change them.

Drink 4 litres of water per day. Pick a diet or eating plan and stick to that plan. You don't necessarily have to count calories but be intelligent - no chocolates, no cake, no soft drinks, and NO ALCOHOL (this is the one I'll struggle with the most). Read a minimum of 10 pages every day of growth mindset material or self-help book. No fifty shades of grey content! Stick to real life material to work on your mindset. Take one progress photo each day - even though this is more of a mental challenge, the byproduct will be a physical change at the end of the 75 days.
