financial accounting 7e by hanlon magee pfeiffer: *War Law* Michael Byers, 2007-12-01 "Professor Byers's book goes to the heart of some of the most bitterly contested recent controversies about the International Rule of Law." —Chris Patten, Chancellor of Oxford University International law governing the use of military force has been the subject of intense public debate. Under what conditions is it appropriate, or necessary, for a country to use force when diplomacy has failed? Michael Byers, a widely known world expert on international law, weighs these issues in *War Law*. Byers examines the history of armed conflict and international law through a series of case studies of past conflicts, ranging from the 1837 Caroline Incident to the abuse of detainees by US forces at Abu Ghraib prison in Iraq. Byers explores the legal controversies that surrounded the 1999 and 2001 interventions in Kosovo and Afghanistan and the 2003 war in Iraq; the development of international humanitarian law from the 1859 Battle of Solferino to the present; and the role of war crimes tribunals and the International Criminal Court. He also considers the unique influence of the United States in the evolution of this extremely controversial area of international law. *War Law* is neither a textbook nor a treatise, but a fascinating account of a highly controversial topic that is necessary reading for fans of military history and general readers alike. "Should be read, and pondered, by those who are seriously concerned with the legacy we will leave to future generations." —Noam Chomsky

financial accounting 7e by hanlon magee pfeiffer: *Stop Spending, Start Managing* Tanya Menon, Leigh Thompson, 2016-07-26 Stop Wasting Precious Time and Money You have a complex problem at work, and you know the standard solutions: hire a consultant, enlist a superstar employee, have more meetings about it. In short, spend money and hours to dig your way out. But you've been down this road before—the so-called solution consumes your time, dollars, and resources, and yet the problem still reappears. There is a way out of this cycle. Organizational researchers Tanya Menon and Leigh Thompson, experts in collaboration and creativity, identify five

spending traps that lead to this wasteful “action without traction”: The Expertise Trap: recycling old solutions on current problems The Winner’s Trap: investing additional resources into failing projects The Agreement Trap: avoiding conflict to feel like a team player The Communication Trap: communicating too frequently over too many channels The Macromanagement Trap: assuming your employees don’t need your direction Menon and Thompson combine their own research with other findings in psychology to provide strategies to break these unproductive habits and refine your skills as a manager. From shaping problems in new ways and learning from failure through experimentation, to stimulating productive conflict and structuring coordinated conversations, you can escape these traps and discover the value hidden in your organization—without spending a dime.

What could be better than achieving a win/win outcome in your business? Sometimes this means moving people out of the wrong job, sometimes it means offering a hand up. Too many managers and too many employees relate to each other within a parent-child paradigm. Read the *Ten Commandments of Management* to learn how to manage Adults through being an Adult.
