glen ivy passport to wellness: In the Bubble John Thackara, 2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, In the Bubble: Designing for a Complex World. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? In the Bubble is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. In the Bubble describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of In the Bubble is a belief, informed by a wealth of real-world

examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

Others encounter globalization as a challenge which brings uncertainties but also opportunities for adaptation, the evolution of hybrid identities or new forms of protest.

glen ivy passport to wellness: The Topeka School Ben Lerner, 2019-10-01 A NEW YORK TIMES, TIME, GQ, Vulture, and WASHINGTON POST TOP 10 BOOK of the YEAR ONE OF BARACK OBAMA'S FAVOURITE BOOKS OF THE YEAR Finalist for the Los Angeles Times Book Prize, and the National Book Critics Circle Award Shortlisted for the Rathbones Folio Prize Winner of the Hefner Heitz Kansas Book Award From the award-winning author of 10:04 and Leaving the Atocha Station, a tender and expansive family drama set in the American Midwest at the turn of the century, hailed by Maggie Nelson as Ben Lerner's most discerning, ambitious, innovative, and timely novel to date. Adam Gordon is a senior at Topeka High School, class of '97. His mother, Jane, is a famous feminist author; his father, Jonathan, is an expert at getting lost boys to open up. They both work at a psychiatric clinic that has attracted staff and patients from around the world. Adam is a renowned debater, expected to win a national championship before he heads to college. He is one of the cool kids, ready to fight or, better, freestyle about fighting if it keeps his peers from thinking of him as weak. Adam is also one of the seniors who bring the loner Darren Eberheart--who is, unbeknownst to Adam, his father's patient--into the social scene, to disastrous effect. Deftly shifting perspectives and time periods, *The Topeka School* is the story of a family, its struggles and its strengths: Jane's reckoning with the legacy of an abusive father, Jonathan's marital transgressions, the challenge of raising a good son in a culture of toxic masculinity. It is also a riveting prehistory of the present: the collapse of public speech, the trolls and tyrants of the New Right, and the ongoing crisis of identity among white men.

glen ivy passport to wellness: *Interviewing Users* Steve Portigal, 2023-10-17 Interviewing is easy, right? Anyone can do it... but few do it well enough to unlock the benefits and insights that interviewing users and customers can yield. In this new and updated edition of the acclaimed classic *Interviewing Users*, Steve Portigal quickly and effectively dispels the myth that interviewing is trivial. He shows how research studies and logistics can be used to determine concrete goals for a business and takes the reader on a detailed journey into the specifics of interviewing techniques, best practices, fieldwork, documentation, and how to make sense of uncovered data. Then Steve

takes the process even further—showing the methods and details behind asking questions—from the words themselves to the interviewer’s actions and how they influence an interview. There is even a chapter on making sure that information gleaned from the research study is used by the business in such a way to make it impactful and worthwhile. Oh, and for good measure he throws in information about Research Operations. But, hey, that’s just the nuts and bolts of the book. The truly fun part is Steve’s voice and how he portrays this information through amusing anecdotes about his career, fascinating examples from other practitioners, and tips and tricks that only the most experienced UX researchers, like Steve, could come up with. As a nod to the pandemic, he offers ideas for the best way to interview someone remotely, and he also discusses personal bias—how to identify and deal with it so that it doesn’t affect interviews. Everyone will get something from this book. But beyond the requisite information, it’s simply a good read. And if you want another good read with stories galore, pick up Steve’s other book *Doorbells, Danger, and Dead Batteries*. Quite simply the best book on when, why, and how you should conduct user interview studies. —Elizabeth F. Churchill, PhD, Senior Director, Google

Who Should Read This Book? Anyone and everyone who is interested in finding out what makes their business tick, i.e., who their users are. Anyone and everyone who wants to learn how to interview and listen to people. Anyone and everyone, including CEOs, user researchers, designers, engineers, marketers, product managers, strategists, interviewers, and you.

Takeaways User research is key for companies to include in their design and development process. The best way to do user research is through interviewing users and determining their needs. Interviewing can identify what could be designed or what is actually a problem. Teams who meet their users face-to-face will build better products. Field research takes a lot of preparation to be successful—and a solid plan in advance. There are critical techniques and frameworks for mapping human behavior. A good interviewer always puts their participants at ease. If you ask the right questions, you’ll get the right answers. A smart interviewer checks their worldview at the door. To establish a rapport with your interviewee, listen and don’t be judgmental. Research data is a combination of analysis and synthesis. The importance of research analysis must be continually highlighted and emphasized to the powers that be.

glen ivy passport to wellness: *First Platoon* Annie Jacobsen, 2021-01-12 A powerful story of war in our time, of love of country, the experience of tragedy, and a platoon at the center of it all. This is a story that starts off close and goes very big. The initial part of the story might sound familiar at first: it is about a platoon of mostly nineteen-year-old boys sent to Afghanistan, and an experience that ends abruptly in catastrophe. Their part of the story folds into the next: inexorably linked to those soldiers and never comprehensively reported before is the U.S. Department of Defense’s quest to build the world’s most powerful biometrics database, with the ability to identify, monitor, catalog, and police people all over the world. *First Platoon* is an American saga that illuminates a transformation of society made possible by this new technology. Part war story, part legal drama, it is about identity in the age of identification. About humanity—physical bravery, trauma, PTSD, a yearning to do right and good—in the age of biometrics, which reduce people to iris scans, fingerprint scans, voice patterning, detection by odor, gait, and more. And about the power of point of view in a burgeoning surveillance state. Based on hundreds of formerly classified documents, FOIA requests, and exclusive interviews, *First Platoon* is an investigative exposé by a master chronicler of government secrets. *First Platoon* reveals a post-9/11 Pentagon whose identification machines have grown more capable than the humans who must make sense of them. A Pentagon so powerful it can cover up its own internal mistakes in pursuit of endless wars. And a people at its mercy, in its last moments before a fundamental change so complete it might be impossible to take back.

Pearson, 2011-01-15 What happens to orphan diseases that aren't big enough profit centers for the pharmaceutical industry or get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family

surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as Real Heroes on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business innovation, Augie's Quest illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: Your contributions to the fitness industry are well known, and your dedication an inspiration. Lance Armstrong, seven-time Le Tour de France champion: I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for him, we're going to say, we're here for you and we're part of the Quest. Arnold Schwarzenegger, governor of California: Your success has been incredible. But you are so much more than just a successful businessman. You are the greatest husband, a great father, and a terrific friend. So,

glen ivy passport to wellness: Minding the Obligation Gap in Community Colleges and Beyond Jeremiah J. Sims, Jeramy Wallace, Lasana O. Hotep, Jennifer Taylor-Mendoza, Tabitha Conaway, 2020-05-15 It is difficult to find justice-centered books geared specifically for community college practitioners interested in achieving campus wide educational equity. It is even more difficult to find a book in this vein written, exclusively, by community college practitioners. *Minding the Obligation Gap in Community Colleges and Beyond* is just that: a concerted effort by a cross-representational group of community college practitioners working to catalyze conversations and eventually practices that attend to the most pressing equity gaps in and on our campuses. By illuminating the constitutive parts of the ever-increasing obligation gap, this book offers both theory and practice in reforming community colleges so that they function as disruptive technologies. It is our position that equity-centered community colleges hold the potential to call out, impede, and even disrupt institutionalized policies, pedagogies, and practices that negatively impact poor, ethno-racially minoritized students of color. If you and your college is interested in striving for educational equity campus-wide please join us in this ongoing conversation on how to work for equity for all of the students that we serve.

glen ivy passport to wellness: The Best Planned City in the World Francis R. Kowsky, 2018 Beginning in 1868, Frederick Law Olmsted and Calvert Vaux created a series of parks and parkways for Buffalo, New York, that drew national and international attention. The improvements carefully augmented the city's original plan with urban design features inspired by Second Empire Paris, including the first system of parkways to grace an American city. Displaying the plan at the Centennial Exposition in Philadelphia, Olmsted declared Buffalo the best planned city, as to streets, public places, and grounds, in the United States, if not in the world. Olmsted and Vaux dissolved their historic partnership in 1872, but Olmsted continued his association with the Queen City of the Lakes, designing additional parks and laying out important sites within the growing metropolis. When Niagara Falls was threatened by industrial development, he led a campaign to protect the site and in 1885 succeeded in persuading New York to create the Niagara Reservation, the present Niagara Falls State Park. Two years later, Olmsted and Vaux teamed up again, this time to create a plan for the area around the Falls, a project the two grand masters regarded as the most difficult problem in landscape architecture to do justice to. In this book Francis R. Kowsky illuminates this remarkable constellation of projects. Utilizing original plans, drawings, photographs, and copious numbers of reports and letters, he brings new perspective to this vast undertaking, analyzing it as a cohesive expression of the visionary landscape and planning principles that Olmsted and Vaux pioneered.
