health and wellness expos 2023: *Relationship-Rich Education* Peter Felten, Leo M. Lambert, 2020-11-03 A mentor, advisor, or even a friend? Making connections in college makes all the difference. What single factor makes for an excellent college education? As it turns out, it's pretty simple: human relationships. Decades of research demonstrate the transformative potential and the lasting legacies of a relationship-rich college experience. Critics suggest that to build connections with peers, faculty, staff, and other mentors is expensive and only an option at elite institutions where instructors have the luxury of time with students. But in this revelatory book brimming with the voices of students, faculty, and staff from across the country, Peter Felten and Leo M. Lambert argue that relationship-rich environments can and should exist for all students at all types of institutions. In *Relationship-Rich Education*, Felten and Lambert demonstrate that for relationships to be central in undergraduate education, colleges and universities do not require immense resources, privileged students, or specially qualified faculty and staff. All students learn best in an environment characterized by high expectation and high support, and all faculty and staff can learn to teach and work in ways that enable relationship-based education. Emphasizing the centrality of the classroom experience to fostering quality relationships, Felten and Lambert focus on students' influence in shaping the learning environment for their peers, as well as the key difference a single, well-timed conversation can make in a student's life. They also stress that relationship-rich education is particularly important for first-generation college students, who bring significant capacities to college but often face long-standing inequities and barriers to attaining their educational aspirations. Drawing on nearly 400 interviews with students, faculty, and staff at 29 higher education institutions across the country, *Relationship-Rich Education* provides readers with practical advice on how they can develop and sustain powerful relationship-based learning in their own contexts. Ultimately, the book is an invitation—and a challenge—for faculty, administrators, and student life staff to move relationships from the periphery to the center of undergraduate education.

health and wellness expos 2023: Occupational Therapy Practice Framework: Domain and Process Aota, 2014 As occupational therapy celebrates its centennial in 2017, attention returns to the profession's founding belief in the value of therapeutic occupations as a way to remediate illness and maintain health. The founders emphasized the importance of establishing a therapeutic relationship with each client and designing an intervention plan based on the knowledge about a client's context and environment, values, goals, and needs. Using today's lexicon, the profession's founders proposed a vision for the profession that was occupation based, client centered, and evidence based--the vision articulated in the third edition of the Occupational Therapy Practice Framework: Domain and Process. The Framework is a must-have official document from the American Occupational Therapy Association. Intended for occupational therapy practitioners and students, other health care professionals, educators, researchers, payers, and consumers, the Framework summarizes the interrelated constructs that describe occupational therapy practice. In addition to the creation of a new preface to set the tone for the work, this new edition includes the following highlights: a redefinition of the overarching statement describing occupational therapy's domain; a new definition of clients that includes persons, groups, and populations; further delineation of the profession's relationship to organizations; inclusion of activity demands as part of the process; and even more up-to-date analysis and guidance for today's occupational therapy practitioners. Achieving health, well-being, and participation in life through engagement in occupation is the overarching statement that describes the domain and process of occupational therapy in the fullest sense. health and wellness expos 2023: Minority Churches as Media Settlers Dorota Hall, Marta Kołodziejska, Kerstin Radde-Antweiler, 2023-06-01 How do minority Christian churches adapt to and negotiate with the changes brought about by deep mediatization? How do they use their media to present themselves to their followers and the general public? This book aims to answer these questions by investigating how minority organizations of two different Christian traditions in the UK and Poland – the Seventh-day Adventist Church and the Orthodox Churches – use their own media to position themselves in their social, religious, and political environments. Based on the analyses of media practices, media content, and interview material, the study develops the new concept of media settlers, which pertains to religious organizations that use their media to fulfill their own aims: expand, assert their authority, and maintain their communities. They do so through five key media practices, which can be defined as strategies: acknowledgment, authorization, omission, replication of content, and mass-mediatization of digital media. This book is of particular interest to scholars of religion and mediatization, mainly sociologists, graduate students, and qualitative researchers working with discourse analysis. It is an insightful read for anyone interested in the Seventh-day Adventist and Orthodox Churches nowadays.
