healthy steps wellness limeade kindred: *Tales of Endearment* Natalie Joos, 2017-11-21 Tales of Endearment, a companion to the popular website, is a collection of photos and stories by Natalie Joos featuring today's who's-who of the vintage clothing scene. The men and women that buy, collect, wear, and love vintage come from all walks of life, but share one impartial passion: each one of their tales reveals a motivation to celebrate the past and its many inspiring fashions. From 1970s rock and roll t-shirts to Edwardian morning jackets, mod suede skirts to one-of-a-kind accessories, every single garment in their wardrobes was handpicked with love, gratitude, and a green conscience, and has the power to inspire today's, and tomorrow's lovers of style. Tales of Endearment identifies with the notion that everything old becomes new again, and the remarkable people who hold it dear. They are the real-deal vintage connoisseurs, historians, collectors, sellers, enthusiasts, and aficionados. Joos personally chose them from her wide and far-reaching circle of friends in different parts of the international arts and entertainment world because she feels they know how to style vintage clothes in a relevant and modern way. Traveling to photograph them at their homes-or in other inspiring locations-while wearing their favorite pieces, the result is a singular collection of men and women donning yesterday's colors, shapes, prints, and patterns that have been passed on and reinterpreted as tomorrow's cutting edge.

New supervisors need clear simple models of supervision practice that will help them learn how to implement their complex human relations tasks. The models presented in this text can also help experienced supervisors conceptualize what they already do well so that they can function more efficiently and consistently. In addition, good models can help experienced supervisors adjust to the changing demands in the field. Much of the book's content is from the author's practice and research and from discussions with thousands of human services supervisors and administrators in workshops and consultation sessions. The issues selected for discussion have repeatedly been identified as central problems. The fourth edition has been significantly revised in a number of ways: (a) updated throughout with recent citations; (b) three major emerging models added to chapter 8 (feminist, LBGTQQ, and trauma-informed practice; and (c) updates to references to the NASW Code of Ethics--
