Understanding Incubators and Accelerators: Key Differences

Incubators and accelerators both offer valuable support to startups, but they differ significantly in their approach and duration. Incubators typically provide longer-term mentorship, networking opportunities, and access to resources over a period of several years. Accelerators, on the other hand, are more intensive, short-term programs (often 3-6 months) that focus on rapid growth and often culminate in a demo day or pitch event to investors.

Henrico County's Business-Friendly Environment

Henrico County boasts a vibrant and supportive ecosystem for entrepreneurs. Its strategic location, access to talent, and commitment to fostering innovation make it an attractive location for startups. The county actively promotes business growth through various initiatives, making it a fertile ground for new ventures.

Specific Incubator Programs in Henrico, VA

(Note: Since I don't have access to real-time information on specific Henrico County incubator programs, I'll create fictional examples to illustrate the structure. Replace these with actual programs and their details when writing the final article.)

Program A: The Henrico Innovation Hub

The Henrico Innovation Hub offers a comprehensive incubator program designed for early-stage startups in technology and life sciences. Benefits include affordable co-working space, mentorship from experienced entrepreneurs, access to funding opportunities, and workshops on business development. Eligibility typically requires a viable business plan and a demonstration of potential for growth. The application process involves submitting a business plan and undergoing an interview.

Program B: The Small Business Growth Center

This incubator focuses on supporting small businesses across various industries. It provides resources such as business planning assistance, marketing guidance, and access to networking events. Eligibility is generally open to small businesses located in Henrico County. The application is usually a simple online form.

Program C: The Richmond-Henrico Collaborative Incubator

This incubator is a partnership between Henrico County and the City of Richmond, offering a broader range of resources and support to startups in both localities. Benefits include access to both Henrico and Richmond's resources and a larger network of mentors and investors. Eligibility and application vary slightly depending on which partner the business connects with.

Specific Accelerator Programs in Henrico, VA

(Again, these are fictional examples; replace with real programs.)

Program D: The Henrico Launchpad Accelerator

This fast-paced accelerator program is tailored for startups ready for rapid scaling. It features a rigorous curriculum, mentorship from industry experts, and access to seed funding. Eligibility typically requires a minimum viable product (MVP) and a strong team. The application is highly competitive and requires a detailed business plan and pitch deck.

Program E: The VC-backed Accelerator

This accelerator is run in partnership with a Venture Capital firm and emphasizes high-growth potential ventures. It offers significant investment capital in exchange for equity. Eligibility is extremely selective, prioritizing startups with exceptional innovation and market potential. The application process is highly competitive.

Resources and Support Beyond Incubators/Accelerators in Henrico

Beyond dedicated incubator and accelerator programs, Henrico County offers a wealth of resources for startups. This may include access to small business loans, grants, workshops, and networking events offered through the county's economic development department.

Choosing the Right Program for Your Startup

Selecting the right incubator or accelerator depends on your startup's stage, needs, and goals. Consider the length of the program, the type of support offered, and the level of mentorship available. A thorough evaluation of your resources and your business' readiness is critical before applying.

Success Stories: Henrico Startups that Leveraged Incubators/Accelerators

(Include case studies of successful Henrico startups that have benefited from incubator or accelerator programs. This adds credibility and inspiration.)

Conclusion:

Henrico, Virginia provides a robust support system for startups through its various incubator and accelerator programs. By understanding the nuances of each program and carefully considering your business needs, you can significantly increase your chances of success in this thriving entrepreneurial ecosystem.

Frequently Asked Questions (FAQs):

Q: What is the difference between an incubator and an accelerator? A: Incubators offer longer-term support and mentorship, while accelerators focus on rapid growth over a shorter timeframe.

Q: Are there any funding opportunities associated with these programs? A: Many programs offer access to seed funding, grants, or investor connections. Check program specifics for details.

Q: What is the application process like? A: The application process varies depending on the program. Generally, it involves submitting a business plan, pitch deck, and potentially undergoing an interview.

Q: Are these programs only for tech startups? A: No, many programs support businesses across various industries.

Q: Where can I find more information about these programs? A: You can find more information by visiting the Henrico County Economic Development Authority website or contacting them directly.

henrico virginia business startup incubator accelerator programs: Artificial Intelligence in Society OECD, 2019-06-11 The artificial intelligence (AI) landscape has evolved significantly from 1950 when Alan Turing first posed the question of whether machines can think. Today, AI is

transforming societies and economies. It promises to generate productivity gains, improve well-being and help address global challenges, such as climate change, resource scarcity and health crises.

henrico virginia business startup incubator accelerator programs: When the Boomers Bail Mark Lautman, 2011-02 A structural shortage of qualified workers is creating a zero-sum labor market that is forcing communities to steal talent from each other in order to survive and grow. The cause of this impending economic disaster: a baby boom generation who didn't have enough kids and an education system that has failed to properly prepare students for the new demands of today's market.

henrico virginia business startup incubator accelerator programs: Sleight of Mind Matt Cook, 2021-08-03 This “fun, brain-twisting book . . . will make you think” as it explores more than 75 paradoxes in mathematics, philosophy, physics, and the social sciences (Sean Carroll, New York Times-bestselling author of *Something Deeply Hidden*). Paradox is a sophisticated kind of magic trick. A magician’s purpose is to create the appearance of impossibility, to pull a rabbit from an empty hat. Yet paradox doesn’t require tangibles, like rabbits or hats. Paradox works in the abstract, with words and concepts and symbols, to create the illusion of contradiction. There are no contradictions in reality, but there can appear to be. In *Sleight of Mind*, Matt Cook and a few collaborators dive deeply into more than 75 paradoxes in mathematics, physics, philosophy, and the social sciences. As each paradox is discussed and resolved, Cook helps readers discover the meaning of knowledge and the proper formation of concepts—and how reason can dispel the illusion of contradiction. The journey begins with “a most ingenious paradox” from Gilbert and Sullivan’s *Pirates of Penzance*. Readers will then travel from Ancient Greece to cutting-edge laboratories, encounter infinity and its different sizes, and discover mathematical impossibilities inherent in elections. They will tackle conundrums in probability, induction, geometry, and game theory; perform “supertasks”; build apparent perpetual motion machines; meet twins living in different millennia; explore the strange quantum world—and much more.

henrico virginia business startup incubator accelerator programs: The Character Gap Christian B. Miller, 2018 We like to think of ourselves and our friends and families as pretty good people. The more we put our characters to the test, however, the more we see that we are decidedly a mixed bag. Fortunately there are some promising strategies - both secular and religious - for developing better characters.

henrico virginia business startup incubator accelerator programs: The Third Wave Steve Case, 2017-04-18 Steve Case, co-founder of America Online (AOL) and one of America's most accomplished entrepreneurs, shares a roadmap for how anyone can succeed in a world of rapidly changing technology. We are entering, he explains, a new paradigm called the Third Wave of the Internet. The first wave saw AOL and other companies lay the foundation for consumers to connect to the Internet. The second wave saw companies like Google and Facebook build on top of the Internet to create search and social networking capabilities, while apps like Snapchat and Instagram leverage the smartphone revolution. Now, Case argues, we're entering the Third Wave: a period in which entrepreneurs will vastly transform major real world sectors like health, education, transportation, energy, and food-and in the process change the way we live our daily lives.

henrico virginia business startup incubator accelerator programs: Courage to Grow Laura Sandefer, 2018-03-06 Acton Academy: The one-room schoolhouse for the twenty-first century Seeking a 21st century education for their children, Laura and Jeff Sandefer jumped off the track of conventional school and created a new model for learning. They created Acton Academy as a better school where learning is made practical and meaningful and where students begin a lifelong Hero's Journey to discover their true potential. Using the Socratic method, elements of the Montessori approach and state-of-the-art online instruction, Acton guides students toward independence and self-motivation, helping them find the courage to grow into the person they were meant to be. Soon, other parents wanted to start their own Acton Academies, and less than a decade from the seven founding students' first Socratic discussion, Acton has spread around the world. *Courage to Grow* is

the Sandefer family's personal quest for their own children's education and happiness. Their story also contains a path for other parents who want to give their children the freedom to take ownership of their own education and to start their own school. The treasure at the end is much larger than Laura ever expected--a quickly growing network of dedicated, curious young people and parents who are not afraid to set them free.

henrico virginia business startup incubator accelerator programs: Government at a Glance Southeast Asia 2019 OECD, Asian Development Bank, 2019-09-10 Government at a Glance Southeast Asia 2019 is the first edition in the Government at a Glance series for the region. It provides the latest available data on public administrations in the 10 ASEAN member countries: Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam.

henrico virginia business startup incubator accelerator programs: Process Analytical Technology Katherine A. Bakeev, 2010-04-01 Process Analytical Technology explores the concepts of PAT and its application in the chemical and pharmaceutical industry from the point of view of the analytical chemist. In this new edition all of the original chapters have been updated and revised, and new chapters covering the important topics of sampling, NMR, fluorescence, and acoustic chemometrics have been added. Coverage includes: Implementation of Process Analytical Technologies UV-Visible Spectroscopy for On-line Analysis Infrared Spectroscopy for Process Analytical Applications Process Raman Spectroscopy Process NMR Spectroscopy: Technology and On-line Applications Fluorescent Sensing and Process Analytical Applications Chemometrics in Process Analytical Technology (PAT) On-Line PAT Applications of Spectroscopy in the Pharmaceutical Industry Future Trends for PAT for Increased Process Understanding and Growing Applications in Biomanufacturing NIR Chemical Imaging This volume is an important starting point for anyone wanting to implement PAT and is intended not only to assist a newcomer to the field but also to provide up-to-date information for those who practice process analytical chemistry and PAT. It is relevant for chemists, chemical and process engineers, and analytical chemists working on process development, scale-up and production in the pharmaceutical, fine and specialty chemicals industries, as well as for academic chemistry, chemical engineering, chemometrics and pharmaceutical science research groups focussing on PAT. Review from the First Edition "The book provides an excellent first port of call for anyone seeking material and discussions to understand the area better. It deserves to be found in every library that serves those who are active in the field of Process Analytical Technology."—Current Engineering Practice

henrico virginia business startup incubator accelerator programs: So Rich, So Poor Peter Edelman, 2013-09-03 "A competent, thorough assessment from a veteran expert in the field." —Kirkus Reviews Income disparities in our wealthy nation are wider than at any point since the Great Depression. The structure of today's economy has stultified wage growth for half of America's workers—with even worse results at the bottom and for people of color—while bestowing billions on the few at the very top. In this "accessible and inspiring analysis", lifelong anti-poverty advocate Peter Edelman assesses how the United States can have such an outsized number of unemployed and working poor despite important policy gains. He delves into what is happening to the people behind the statistics and takes a particular look at young people of color, for whom the possibility of productive lives is too often lost on the way to adulthood (Angela Glover Blackwell). For anyone who wants to understand one of the critical issues of twenty-first century America, *So Rich, So Poor* is "engaging and informative" (William Julius Wilson) and "powerful and eloquent" (Wade Henderson).

henrico virginia business startup incubator accelerator programs: A Dark Inheritance Brooke N. Newman, 2018-08-28 A major reassessment of the development of race and subjecthood in the British Atlantic Focusing on Jamaica, Britain's most valuable colony in the Americas by the mid-eighteenth century, this book explores the relationship between racial classifications and the inherited rights and privileges associated with British subject status. Brooke Newman reveals the centrality of notions of blood and blood mixture to evolving racial definitions and sexual practices in colonial Jamaica and to legal and political debates over slavery and the rights of imperial subjects on

both sides of the Atlantic. Weaving together a diverse range of sources, Newman shows how colonial racial ideologies rooted in fictions of blood ancestry at once justified permanent, hereditary slavery for Africans and barred members of certain marginalized groups from laying claim to British liberties on the basis of hereditary status. This groundbreaking study demonstrates that challenges to an Atlantic slave system underpinned by distinctions of blood had far-reaching consequences for British understandings of race, gender, and national belonging.

henrico virginia business startup incubator accelerator programs: *The Rainforest* Victor W. Hwang, Greg Horowitz, 2012 [The authors] propose a radical new theory to explain the nature of innovation ecosystems -- human networks that generate extraordinary creativity and output. They argue that free market thinking fails to consider the impact of human nature on the innovation process. This ambitious work challenges the basic assumptions that economists have held for over a century.--Page 4 of cover

henrico virginia business startup incubator accelerator programs: *Pedestrian Safety Project*, 1974

henrico virginia business startup incubator accelerator programs: *Good Little Marauder* Matt Cook, 2019-07-23 In this World War II thriller weaving espionage and art intrigue, Kate Atwell-the daughter of a wealthy British family-is confronted by a painting from her childhood that threatens everything she knows and believes.

henrico virginia business startup incubator accelerator programs: *Chipless RFID* Reza Rezaiesarlak, Majid Manteghi, 2014-12-08 This book examines the design of chipless RFID systems. The authors begin with the philosophy of RFID and its effect on commercial applications. Then, they discuss the chipless RFID systems and the application of chipless RFID systems, the advantages it provides compared to conventional barcode ID and chipped RFID tags. The text then covers chipless RFID components in block diagram representation and introduce FCC requirements which should be considered in the design procedure of each component. The third chapter is dedicated to the complex natural resonance-based design of chipless RFID tags. The next chapter concerns about the detection techniques introduced for the identification of chipless RFID tags. The fifth chapter is dedicated to the localization and anti-collision techniques in chipless RFID systems. Final chapter is chipless RFID tags as sensors. It provides some applications where the tag can be used as both ID and sensor. The tag specifications and detection issues are addressed in this section.

henrico virginia business startup incubator accelerator programs: *Blockchain Fundamentals for Accounting and Finance Professionals Certificate* AICPA, 2020-03-31 The

Blockchain Fundamentals for Accounting and Finance Professionals Certificate (16.0 CPE Credits) teaches you the characteristics of blockchain and cryptoassets; how to identify opportunities and risks for application within your own organization, and much more. Advance your knowledge of Blockchain Be at the forefront of shaping the adoption of blockchain in accounting and finance. Lay the foundation for your future as a strategic business partner within your organization and with your clients. With real-world literacy on blockchain and cryptoassets, you will be empowered to translate the technology into relevant business application and value for you and your organization. Learn the characteristics of blockchain and cryptoassets, identify opportunities and risks, and understand high-level technology concepts underpinning blockchain. Use a cryptocurrency wallet in a hands-on transaction exercise and verify information written to a block, and perform a hands-on hash activity exercise, then verify it. Learn to differentiate between current state and future state. By completing this 16-hour certificate program, you will learn: core concepts of blockchain technology; how to incorporate blockchain application within your organization; how to be a responsible business partner by recognizing blockchain Implications and how its application and uses can benefit many types of organizations; and stand out with a digital badge as someone who is committed to your clients new emerging technology needs. The courses in this certificate program include: Blockchain Evolution and Technology Concepts Blockchain: Using and Securing Cryptocurrencies Blockchain: Benefits, Values and Opportunities Risks and Challenges of Blockchain Blockchain Trends Permissioned Ledgers and Other Solutions Transactions and Smart Contracts The Blockchain Landscape Blockchain: Process and Technical Controls WHO WILL BENEFIT CPAs Public accounting leaders Managers and staff CFOs Controllers Finance leaders Management accountants Non-IT finance professionals. LEARNING OBJECTIVES Learn the foundational constructs behind blockchain technology and cryptoassets, structure and functionality. As you consider implementing blockchain into your own organization, recognize not only the benefits and opportunities but also the challenges, as well as regulatory concerns and governance. Practice with applications and use cases by looking into ledgers, transactions and smart contracts. Recognize the current landscape, business applications and financial control considerations associated with blockchain use. Digital Badge: Your Professional Distinction Set yourself apart as a future-ready financial professional. Upon completion, you will be awarded with a certificate in the form of a digital badge. Digital badges allow you to distinguish yourself in the marketplace and show your commitment to quality. The badge can be posted to your social media profiles and linked to your resume or email signature, providing maximum visibility to your achievement. Credit Info CPE CREDITS: Online: 16.0 (CPE credit info) NASBA FIELD OF STUDY: Information Technology LEVEL: Basic PREREQUISITES: ax Staff with 0-2 years of experience ADVANCE PREPARATION: None DELIVERY METHOD: QAS Self-Study COURSE ACRONYM: BLCF Online Access Instructions A personal pin code is enclosed in the physical packaging that may be activated online upon receipt. Once activated, you will gain immediate online access to the product for one full year. System Requirements AICPA's online CPE courses will operate in a variety of configurations, but only the configuration described below is supported by AICPA technicians. A stable and continuous internet connection is required. In order to record your completion of the online learning courses, please ensure you are connected to the internet at all times while taking the course. It is your responsibility to validate that CPE certificate(s) are available within your account after successfully completing the course and/or exam. Supported Operating Systems: Macintosh OS X 10.10 to present Windows 7 to present Supported Browsers: Apple Safari Google Chrome Microsoft Internet Explorer Mozilla Firefox Required Browser Plug-ins: Adobe Flash Adobe Acrobat Reader Technical Support: Please contact service@aicpa.org.

henrico virginia business startup incubator accelerator programs: The Rise of the Rest
 Steve Case, 2023-09-19 Steve Case, cofounder of America Online and Revolution and New York Times bestselling author of The Third Wave, shows how entrepreneurs across the country are building groundbreaking companies, renewing communities, and creating new jobs--in the process reimagining the American landscape and bringing people together around a shared future--Amazon.com.

henrico virginia business startup incubator accelerator programs: XXXXX Xxxxx, Martin Howse, 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adaptor which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udiff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

henrico virginia business startup incubator accelerator programs: *Library of Congress Catalog: Motion Pictures and Filmstrips* Library of Congress, 1968

henrico virginia business startup incubator accelerator programs: *Entrepreneurial Universities* João J. Ferreira, Alain Fayolle, Vanessa Ratten, Mário Raposo, 2018-08-31 With an increasing focus on the knowledge and service economies, it is important to understand the role that entrepreneurial universities play through collaboration in policy and, in turn, the impact they have on policy. The authors evaluate how universities engage with communities while also balancing stakeholder considerations, and explore how universities should be managed in the future to

integrate into global society effectively.

henrico virginia business startup incubator accelerator programs: The Courage to Suffer Daryl R. Van Tongeren, Sara A. Showalter Van Tongeren, 2020-02-27 Suffering is an inescapable part of life. Some suffering is so profound, so violating, or so dogged that it fundamentally changes people in indelible ways. Many existing therapeutic approaches, from a medical model, treat suffering as mental illness and seek a curative solution. However, such approaches often fail to examine the deep questions that suffering elicits (e.g., existential themes of death, isolation, freedom, identity, and meaninglessness) and the far-reaching ways in which suffering affects the lived experience of each individual. In *The Courage to Suffer*, Daryl and Sara Van Tongeren introduce a new therapeutic framework that helps people flourish in the midst of suffering by cultivating meaning. Drawing from scientific research, clinical examples, existential and positive psychology, and their own personal stories of loss and sorrow, Daryl and Sara's integrative model blends the rich depth of existential clinical approaches with the growth focus of strengths-based approaches. Through cutting edge-research and clinical case examples, they detail five "phases of suffering" and how to work with a client's existential concerns at each phase to develop meaning. They also discuss how current research suggests to build a flourishing life, especially for those who have endured, and are enduring, suffering. Daryl and Sara show how those afflicted with suffering, while acknowledging the reality of their pain, can still choose to live with hope.

henrico virginia business startup incubator accelerator programs: America's National Game Albert Goodwill Spalding, 1911 This book is Albert Spalding's work of historic facts concerning the beginning, evolution, development and popularity of base ball, with personal reminiscences of its vicissitudes, its victories and its votaries. It is one of the defining books in the early formative years of modern baseball.

henrico virginia business startup incubator accelerator programs: Pediatric Formulations Daniel Bar-Shalom, Klaus Rose, 2014-01-30 Until the 1990s, it was generally accepted that medicines were first developed for adults and their use in children was investigated later, if at all. One of the main tasks of hospital pharmacies was the manufacturing of child-appropriate formulations in a more or less makeshift way. The first change came in 1997 with U.S. legislation that rewarded manufacturers to do voluntary pediatric research. Ten years later, the European Union passed legislation that required manufacturers to discuss all pediatric aspects, including formulations, with the regulatory authorities as a condition of starting the registration procedure. In consequence, manufacturers must now cover all age groups, including the youngest ones. So far, pediatric formulations were more a focus for academic researchers. Through the changed regulatory environment, there is now a sudden high commercial demand for age-appropriate formulations. This book begins by highlighting the anatomical, physiological and developmental differences between adults and children of different ages. It goes on to review the existing technologies and attempts to draw a roadmap to better, innovative formulations, in particular for oral administration. The regulatory, clinical, ethical and pharmaceutical framework is also addressed.

henrico virginia business startup incubator accelerator programs: The Storyteller Pierre Jarawan, 2019-04-02 From Germany to Beirut, the Storyteller follows the turbulent search of a son for a father whose heart has never stopped yearning for his homeland, Lebanon.

henrico virginia business startup incubator accelerator programs: Dear Black Girls Shanice Nicole, 2021-02-08 Dear Black Girls is a letter to all Black girls. Every day poet and educator Shanice Nicole is reminded of how special Black girls are and of how lucky she is to be one. Illustrations by Kezna Dalz support the book's message that no two Black girls are the same but they are all special--that to be a Black girl is a true gift. In this celebratory poem, Kezna and Shanice remind young readers that despite differences, they all deserve to be loved just the way they are.

henrico virginia business startup incubator accelerator programs: Ambidexterity and Entrepreneurship Studies Maribel Guerrero, 2021-06-04 This monograph reviews organizational ambidexterity in entrepreneurship studies. The author examines the past 15 years of published research by focusing on the contribution of organizational ambidexterity to the fields of management studies and entrepreneurship studies and provide research directions in organizational ambidexterity.

henrico virginia business startup incubator accelerator programs: The Start-up PUSH Terri Friel, George Vukotich, 2018-07-01 This book explores, documents and establishes how to help founders start businesses with the collaboration of local and international resources. An incubator, accelerator or science park all have this goal but provide a variety of foci and support. At a minimum, it's important to not only attract entrepreneurs but to have support services that can include mentoring, financial support and other services that make the incubator really filled with energy and potential. It's becoming insufficient to just have office space and WiFi. It is also important to develop good interactions between directors, the start-up community and residents. Managing the community to help residents to launch successfully is the main goal of the director. It's also important to stay abreast of the innovations happening in start-up support. Today there are many ways to incubate from bare bones office space to Incubator 1.0 space with some support to Incubator 2.0 with a great deal of support including a fund. For that reason, it's important to develop a clear strategy for the type, style, clientele and support that will be built. This book provides guidance in three main areas: 1) What are the different options for incubators, accelerators and science parks, 2) How to assist the start-up founders (residents) and 3) How to manage the space.

henrico virginia business startup incubator accelerator programs: Accelerators Mike Wright, 2018 Accelerators are a rapidly growing new form of organization that aim to stimulate entrepreneurship through intensive, limited-period educational programs, including mentoring and networking for the cohort of start-up participants selected for each program, to improve their ability to attract investment at the end of the program. Drawing on novel evidence from across the world, this is the first book to provide rigorous analysis of the nature and effectiveness of accelerators that will be invaluable for researchers, policymakers and entrepreneurs.

henrico virginia business startup incubator accelerator programs: Corporate Accelerator Programs Sandra-Luisa Moschner, 2021-03-24 Corporate Accelerators sind Organisationen zur zeitlich begrenzten Unterstützung von Startups, die von etablierten Unternehmen betrieben werden. Sie imitieren das Model von unabhängigen Accelerators, verfolgen jedoch nicht zwangsläufig das Ziel finanziellen Zugewinns, sondern auch strategische Ziele. Die vorliegende Arbeit hat das Ziel, spezifische Förderpraktiken dieser Programme sowie deren Effekt auf den Startup-Erfolg zu untersuchen. Die Studienergebnisse identifizieren Corporate Accelerator-spezifische Praktiken, die einen positiven Einfluss auf den Startup-Erfolg haben. Die Ergebnisse zeigen zudem, dass die Unterstützung je nach Motiv des etablierten Unternehmens (symbolisch vs. substantiell) variiert. Die resultierenden Ergebnisse liefern relevante Implikationen sind für etablierte Unternehmen, Corporate Accelerator Manager und Startups. Corporate accelerators are intermediary organizations implemented by incumbent firms to support startups with various resources over a short period of time. Although they are built upon the model of independent accelerators, corporate accelerators do not necessarily aim for financial benefits but for strategic objectives. This thesis examines how corporate accelerators support participating startups and how this support impacts subsequent startups' success based on qualitative and quantitative data. The findings of the study identify corporate accelerator-specific practices that positively influence the success of startups. Further the findings indicate that the extent of support varies, as incumbents initiate the programs

as a result of substantive and/or symbolic motives. The findings therefore provide relevant implications for incumbents, corporate accelerator managers and startups.
