islamic business book: Islamic Social Finance Valentino Cattelan, 2018-08-06 The current dynamics of world economy show remarkable changes in the socio-economics of credit provision and entrepreneurship. If the emergence of the sharing economy is fostering innovative models of collaborative agency, networking and venture business, economic actors are also looking for a more sustainable development, able to foster profitability as well as community welfare. This book investigates Islamic social finance as a paramount example of this economy under change, where the balance between economic efficiency and social impact is contributing to the transformation of the market from an exchange- to a community-oriented institution. The collected essays analyse the social dimension of entrepreneurship from an Islamic perspective, highlighting the extent to which the rationales of sharing, distribution and cooperation, affect the conceptualization of the market in Islam as a place of shared prosperity. Moving from the conceptual roots of this paradigm to its operative branches, the contributing authors also connect the most recent trends in the financial market to Shari'ah-based strategies for community welfare, hence exploring the applications of Islamic social finance from the sharing economy, FinTech and crowdfunding to microcredit, waqf, zakat, sukuk and green investments. An illuminating reference for researchers, practitioners and policy-makers dealing with the challenges of a global market where not only is diversity being perceived as a value to be fostered, but also as an important opportunity for a more inclusive economy for everybody.

islamic business book: The Principles of Islamic Marketing Baker Ahmad Alserhan, 2016-03-03 The Principles of Islamic Marketing fills a gap in international business literature covering the aspects and values of Islamic business thought. It provides a framework and practical perspectives for understanding and implementing the Islamic marketing code of conduct. It is not a religious book. The Islamic Economic System is a business model adopted by nearly one quarter of the world's population. Baker Alserhan identifies the features of the Islamic structure of International Marketing practices and ethics. Adherence to such ethical practices elevates the standards of behaviour of traders and consumers alike and creates a value-loaded framework for meaningful cooperation between international marketers and their Muslim markets. His book provides a complete guide for an organization when managing its entire marketing function or when customising part of its offering to suit Muslim customers. It addresses the challenges facing marketers involved in business activities with and within Islamic communities, the knowledge needs of academic institutions, and the interest of multinationals keen on tapping the huge Islamic markets. Along the way, Baker Alserhan provides insights into key elements such as, distribution channels, retailing practices, branding, positioning, and pricing; all within the Muslim legal and cultural norms. This second edition brings the book up to date and features a number of new case studies and two additional chapters on Maqasid Al Shariah and the Islamic economy, and a strategic perspective on Islamic marketing and branding.

islamic business book: Social Justice and Islamic Economics Toseef Azid, Lutfi Sunar, 2019-02-25 Under the rule of the current economic order, social injustice is ever-increasing. Issues such as poverty, inhumane working conditions, inadequate wages, social insecurity and an unhealthy labor market continue to persist. Many states are also unable to produce policies capable of resolving these problems. The characteristics of the capitalist system currently render it unable to provide social justice. In fact, on the contrary, the system reinforces these injustices and prevents economic and social welfare from reaching the masses. Many Muslim scholars have analyzed and, indeed, criticized this system for years. This book argues that an alternative and more equitable theoretical and practical economical order can been developed within the framework of Islamic principles. On the other hand, the experiences of societies under the rule of Muslim governments do not always seem to hold great promise for an alternative understanding of social justice. In addition, the behaviors of Muslim individuals within their economic lives are mostly shaped by the necessities of daily economic conditions rather than by the tenets of Islam that stand with social justice. Until 1990s, studies of Islamic economics made connections between finance and the notion of social justice, but work conducted more recently has neglected this issue. It is therefore evident that the topic of social justice needs to be revisited in a more in-depth manner. Filling an important gap in existing literature, the book uniquely connects social justice and Islamic finance and economics on this topic. Theory, practice and key issues are presented simultaneously throughout this book, which is based on the writings of a number of eminent scholars.

islamic business book: Introduction To Islamic Finance Dimas Bagus Wiranatakusuma Genevieve G. Panerio, 2024-01-24 The objective of organizing economic activities in any nation is the production of products and services to satisfy human wants. In the modern era, however, where division of labor and specialization are on the rise, those who produce products and services are not typically the same as those who consume or use them. Consequently, it is necessary to substitute one commodity for another. Barter required a 'double coincidence of desires'; B needed to possess both what A desired and what A could offer in exchange. This arrangement restricted the types of transactions that could be conducted, occupied additional time that could have been spent on production, and impeded the specialization of production. The limitations that the barter system placed on human ambitions lead to the evolution of money.

islamic business book: Introduction to Islamic Banking and Finance Brian Kettell, 2011-10-07 Introduction to Islamic Banking and Finance is a succinct guide to the key characteristics of Islamic banking highlighting how these differ from conventional banking. This detailed book illustrates how Islamic banking is consistent with the Sharia'a, a key element of which is the prohibition on collecting and paying interest. This central religious precept appears to rule out most aspects of modern finance but it does allow money to be used for trading tangible assets and business, which can then generate a profit. Brian Kettell's book looks at all aspects of Islamic banking, including chapters on its creation and evolution through to detailed discussions of the issues involved in the Sharia'a contracts of Murabaha, Mudaraba, Musharaka, Ijara, Istisna'a, and Salam. Islamic insurance (Takaful) is also covered. Finally the book takes a look at Sharia'a law and Sharia'a boards, indicating the roles and responsibilities that come with membership. Islamic banks have been operating in places such as Bahrain, Saudi Arabia, Malaysia and Dubai for some time. Conventional bankers have traditionally viewed the sector as a small, exotic niche but recent years have seen a dramatic surge in popularity. A number of Western investment banks have started working with Muslim clerics to create new ranges of financial products designed for devout Muslims, a large and growing market. Although estimates of the size of the Islamic finance industry vary greatly, everyone agrees that it is expanding rapidly and this is the perfect book for anyone looking to understand the industry.

islamic business book: *Islamic Fintech* Sara Sánchez Fernández, 2021-03-29 The implementation of new technologies is expected to boost the development of Islamic Finance by increasing accessibility to banking and other financial services in Islamic communities and democratizing access to investment opportunities. At the same time, new technologies will increase financing opportunities and facilitate asset management for Sharia-compliant businesses. This collection of essays from selected experts in the field comprise some of the most topical issues on Islamic Fintech, combining a business focus with legal insights. The book takes as a point of departure the role that Islamic Fintech can play in promoting sustainability. The social vision of welfare improvement and justice is already embedded in Sharia’s economic rules, which makes Islamic Finance particularly well suited to bridge the gap between sustainability and funding. Although it is not without challenges for the industry, technology will help unleash its potential. With a holistic approach to Islamic Fintech, the contributing authors address the application of new technologies to Islamic Finance, including robo-advisory, crowdfunding and digital ledger technology (both in the issuance of bitcoin and the registration of securities in tokenized form) and in certain sectors such as takaful (takaful-tech) and health (e-health). Finally, they explore the challenges posed by anti-money laundering (‘AML’) in the specific realm of Islamic Fintech. The book combines theoretical analysis with a practical focus, both through case studies and directly through the experiences of leading entrepreneurs. In addition, it provides insights on legal and regulatory aspects, which are key in a field that is still in its infancy and needs support from lawmakers and regulators. It is, thus, a reference for academics, legal practitioners, policymakers, entrepreneurs and the Islamic Finance community.

islamic business book: Dilemmas and Challenges in Islamic Finance Yasushi Suzuki, Mohammad Dulal Miah, 2018-03-09 The phenomenal growth of Islamic finance in the last few decades has been accompanied by a host of interesting questions and challenges. One of the critical challenges is how Islamic financial institutions can be motivated to participate in the 'equity-like' profit-and-loss sharing (PLS) contracts. It is observed that Islamic banks are reluctant to participate in the pure PLS scheme which is manifested by the rising concentration of investment on murabaha or mark-up financing. This phenomenon has been the hotbed of academic criticism on the contemporary practice of Islamic banking. This book explains the 'murabaha syndrome' in light of the incentive provided by the current institutional framework and what are the changes required in the governance structure to mend this anomaly.

islamic business book: The Role of Islamic Spirituality in the Management and Leadership Process Abdul Mutalib, Mahazan, Rafiki, Ahmad, 2021-05-07 Leaders nowadays need to know, learn, and apply the concept of qalb leadership where it has been taught by the Prophet Muhammad as well as explained by Islamic scholars. The comparison with other mindful leadership concepts is required to provide solutions and options in leadership for better outcomes and spiritual awareness. It is found that leadership literature, in general, is unable to generate an understanding of a leadership concept that is both intellectually compelling and emotionally satisfying. As for qalb leadership, it focuses on the spirituality of leadership that can aid in facing unpredictable manners and provide better outcomes for followers. Research on Islamic leadership and spirituality may pave the way for better leadership practices in the future. The Role of Islamic Spirituality in the Management and Leadership Process will elaborate the spirituality and qalb in human life and leadership along with providing a discussion on the role and function of qalb in the overall leadership process. Through spirituality, human interdependence, creativity, and social justice can be created and molded. This type of leadership enables transformation in a natural way without denying basic human nature and imparts balance to both the outer and inner needs of humans. With the discussion of four cardinal virtues of Al-Ghazali, leaders can solve many problems that emerge in their organizations. This book is ideal for managers, executives, theologians, professionals, researchers, academicians, and students who are interested in how Islamic spirituality plays a role in leadership.

islamic business book: A Comparative Study of Islamic Finance in Australia and the UK Imran Lum, 2021-09-28 This book provides valuable insights into the practical challenges faced by the nascent Islamic finance industry and compares the Australian experience to developments in the UK. It contributes to a greater understanding of how Muslims living as a minority in Australia and the UK negotiate Islamic doctrine in secular societies by focusing on one aspect of this negotiation, namely the prohibition of ribā. There is little debate in the Islamic tradition on the prohibition of ribā. The differences, however, lie in the interpretation of ribā and the question of how Muslims live in a society that is heavily reliant on interest and conventional banking, yet at the same time adhere to Islamic guidelines. Through the words of religious leaders, Muslim professionals and university students, Imran Lum provides real accounts of how Muslims in Australia and the UK practically deal with conventional banking and finance products such as home loans, savings accounts and credit cards. He also explores Muslim attitudes towards Islamic finance and queries whether religion is the sole determining factor when it comes to its uptake. Drawing on his own unique experience as a practitioner responsible for growing an Islamic business in a conventional bank, Lum provides a firsthand account of the complexities associated with structuring Islamic finance products that are not only sharia compliant but also competitive in a non-Muslim jurisdiction. Using ṣukūk bonds as a case study, he highlights the tangible and non-tangible barriers to product development, such as tax and regulatory requirements and the rise of Islamophobia. Combining academic and industry experience, Lum unpacks the relationship of Islamic finance with Muslim identity construction in the West and how certain modalities of religiosity can lead to an uptake of Islamic finance, while others can lead to its rejection.

islamic business book: Islamic Insurance Aly Khorshid, 2004 Some Muslims believe insurance is unnecessary, as society should help its victims. Muslims can no longer ignore the fact that they live, trade and communicate with open global systems, and they can no longer ignore the need for banking and insurance. Aly Khorshid demonstrates how initial clerical apprehensions were overcome to create pioneering Muslim-friendly banking systems, and applies the lessons learnt to a workable insurance framework by which Muslims can compete with non-Muslims in business and have cover in daily life. The book uses relevant Quranic and Sunnah extracts, and the arguments of pro- and anti-insurance jurists to arrive at its conclusion that Muslims can enjoy the peace of mind and equity of an Islamic insurance scheme.
