itrust wellness group seneca sc: Christianity and Psychiatry John R. Peteet, H. Steven Moffic, Ahmed Hankir, Harold G. Koenig, 2021-09-02 This book aims to help readers appreciate the many-faceted relationship between Christianity, one of the world's major faith traditions, and the practice of psychiatry. Chapter authors in this book first consider challenges posed by historical antagonisms, church-based mental health stigma, and controversy over phenomena such as hearing voices. Next, others explore both how Christians often experience conditions such as mood and psychotic disorders, disorders in children and adolescents, moral injury and PTSD, and ways that their faith can serve as a resource in their healing. Twelve Step spirituality, originally informed by Christianity, is the subject of a chapter, as are issues raised for Christians by disability, death and dying. A set of chapters then focuses on the state of integration of Christian beliefs and practices into psychotherapy, treatment delivery, educational programming, clergy/clinician collaboration, and treatment by a non-Christian psychiatrist. Finally, there are chapters by a mental health professional who has been a patient, a Jewish psychiatrist, a Muslim psychiatrist knowledgeable about Christianity and psychiatry in the Muslim majority world, and a Christian psychiatrist. These chapters provide context, diversity and personal perspectives. Christianity and Psychiatry is a valuable resource for mental health professionals seeking to understand and address the particular challenges that arise when caring for Christian patients.

When all is said and done, the quality of education revolves around the aspirations, commitments, and wellness of teachers giving their best. —Carl Glickman, Scholar in Residence The University of Georgia

This invaluable resource provides principals and other school leaders with specific practices to positively influence teacher perspectives, and examines teacher emotions in five key areas: Job satisfaction and morale Stress, anxiety, and burn-out Sense of individual and collective self-efficacy Organizational commitment and engagement Willingness and motivation to improve their practices When educational leaders create conditions that support teachers in their work, schools can experience higher teacher retention rates, improved climate and culture, and increased student achievement.

itrust wellness group seneca sc: Consciousness and Loneliness: Theoria and Praxis Ben Mijuskovic, 2018-11-26 Current research claims loneliness is passively caused by external conditions: environmental, cultural, situational, and even chemical imbalances in the brain and hence avoidable. In this book, the author argues that loneliness is actively constituted by acts of reflexive self-consciousness (Kant) and transcendent intentionality (Husserl) and is, therefore,

unavoidable. This work employs a historical, conceptual, and interdisciplinary approach (philosophy, psychology, literature, sociology, etc.) criticizing both psychoanalysis and neuroscience. The book pits materialism, mechanism, determinism, empiricism, phenomenism, behaviorism, and the neurosciences against dualism, both subjective and objective idealism, rationalism, freedom, phenomenology, and existentialism. It offers a dynamic of loneliness, whose spontaneous subconscious sources undercuts the unconscious of Freud and the “computerism” of the neurosciences by challenging their claims to be predictive sciences. Mijuskovic demonstrates a psychological framework in which the self is motivated by a fear of loneliness and the desire for intimacy. The author thoroughly substantiates his perspective via a ‘History of Ideas’ format, which engages Plato’s metaphor of ‘the Battle between the Gods and the Giants,’ an allusion to the historical debate between idealists and materialists. Ultimately, these two groups and their allies attempt to address the question: can senseless matter think? The idealists, with whom Mijuskovic identifies, assert the reality of the self, reflexive self-consciousness, and the spontaneity of the mind. -Joshua Marcus Cragle, University of Amsterdam, Journal of Thought, Fall/Winter 2019 Ben Mijuskovic continues his ambitious life project in this fifth installment of an interdisciplinary series in consciousness and loneliness within philosophical, psychological, and literary discourse. Mijuskovic possesses the unique combination of academic, clinical, and professional experience to cross the aisle between philosophers and therapists. Such a CV emboldens his argument for a return to a metaphysical argument for human consciousness culminating in intrinsic and inevitable loneliness. Embracing this universal reality is the first step to philosophical grounding and psychological wholeness. His methodology, argumentation, and conclusions tend to be highly provocative in the age of contemporary neuroscientific and pharmaceutical predominance. -Michael D. Bobo, Norco College, Philosophy in Review 40.1 (February 2020)

itrust wellness group seneca sc: Education, Music, and the Lives of Undergraduates

Roger Mantie, Brent C. Talbot, 2020-12-10 The undergraduate years are a special time of life for many students. They are a time for study, yes, but also a time for making independent decisions over what to do beyond formal education. This book is based on a nine-year study of collegiate a cappella - a socio-musical practice that has exploded on college campuses since the 1990s. A defining feature of collegiate a cappella is that it is a student-run leisure activity undertaken by undergraduate students at institutions both large and small, prestigious and lower-status. With rare exceptions, participants are not music majors yet many participants interviewed had previous musical experience both in and out of school settings. Motivations for staying musically involved varied

considerably - from those who felt they could not imagine life without a musical outlet to those who joined on a whim. Collegiate a cappella is about much more than singing cover songs. It sustains multiple forms of inequality through its audition practices and its performative enactment of gender and heteronormativity. This book sheds light on how undergraduates conceptualize vocation and avocation within the context of formal education, holding implications for educators at all levels.

itrust wellness group seneca sc: Quality Issues in Clinical Genetic Services Ulf

Kristoffersson, Jörg Schmidtke, J. J. Cassiman, 2014-09-25 Initially genetic disorders were all considered as rare diseases. At present, in the mid of 2009, the OMIM catalogue contains information on more than 12 000 entries of which about 2500 are available for clinical testing based on the identification of the responsible gene defect. However, altogether it has been estimated that about 8 percent of a population in the economically developed countries will during their lifetime suffer from a disease mainly as the result of their genetic constitution. Adding to that, it is estimated that all diseases have a genetic component, which will determine who will be at a higher than average risk for a certain disorder. Further it is postulated that in the near future, this genetic profiling could become useful in selecting an appropriate therapy adapted to the genetic constitution of the person. Thus, genetic disorders are not rare. Measuring quality of health care related processes became an issue in the 1990s, mainly in laboratory medicine, but also for hospitals and other health care systems. In many countries national authorities started to implement recommendations, guidelines or legal procedures regulating quality of health care delivery. In laboratory medicine, in parallel, the use of accreditation as a method assuring high quality standards in testing came in use. With the increasing possibilities of performing molecular genetic testing, genetic laboratories needed to become involved in this process. As many genetic disorders are rare, most laboratories worldwide offered analysis for a specific set of disorders, and, therefore, very early on a transborder flow of samples occurred. While international quality criteria (ISO) have been in existence for a number of years, the regulation of quality issues still may differ between countries. Based on their personal experience in the varying fields of quality research and clinical implementation of quality criteria in genetic services the authors of this book share their experience and give examples of the implementation of quality issues in national quality systems worldwide. This book, which is the result of the effort of many persons, is destined to aid laboratory managers and counsellors, health care managers and other stakeholders in national or international health care service to improve the services to the benefit of patients with suspected genetic disorders.

Speeches by the First Black Woman to Receive a College Education in the United States of America

(H Mary Church Terrell, 2018-08-28 Mary Church Terrell was an icon in the civil rights movement, advocating for equality and social justice for black women through a lifetime of campaigning and eloquent oration. Famed for being the first black woman to gain a college education in the United States, Mary Terrell put her education to great use. Beginning in the 1890s, she spoke publicly on a range of civil rights which black Americans and black women were deprived. Throughout these efforts, Terrell helped coordinate a series of local movements which campaigned for suffrage and enfranchisement for the black population. Mary Church Terrell began a trend in the civil rights movement; her language bursting with eloquence and reason, she argued for a better intellectual, social and economic life for black Americans. Black women, who lacked even the right to vote, were compelled to join the cause, which they did in their thousands. Living to the age of 90, Terrell was a bridge between the Reconstruction era and the modern civil rights movement.

HISTORY: My work was initially based on art, culture, education, science, technology, folklife, history, world religions, and philosophy. I, THE LITERATURE WRITER HAD TO BECOME A SPIRITUAL SCIENTIST AND CONTINUE CARL JUNG'S WORK BECAUSE BESIDES BEING THE BEST EXISTENT THERAPY FOR ALL MENTAL ILLNESSES AND EVEN PHYSICAL DISEASES, THE UNCONSCIOUS GUIDANCE IN DREAMS HAS A VERY IMPORTANT RELIGIOUS MEANING. THE UNCONSCIOUS WISDOM HELPS US ELIMINATE ALL SINS AND BEGIN A NEW LIFE, FAR FROM WICKEDNESS. MY SCIENTIFIC STUDIES SIMPLY COMPLETED THE RESEARCH I WAS MAKING THROUGH LITERATURE AND PHILOSOPHY FROM THE TIME I LEARNED HOW TO THINK AND I STARTED WRITING MY FIRST POEMS, STORIES, AND PHILOSOPHICAL CONCLUSIONS. MY WRITINGS WERE INSPIRED BY THE UNCONSCIOUS MIND, WHICH ALSO GIVES US ARTISTIC TALENTS, AND METAPHYSICAL OVER RELIGIOUS AND PHILOSOPHICAL INCLINATIONS, BESIDES PRODUCING OUR DREAMS. SCIENCE GIVES US SO MANY EXPLANATIONS ABOUT OUR REALITY THAT IT IS CONSIDERED AS A SOURCE THAT PROVIDES US WITH THE BEST PROOF WE COULD HAVE ABOUT THE VERACITY OF OUR CONCLUSIONS. YOU STILL NEED RELIGION, PHILOSOPHY, AND ART IN ORDER TO UNDERSTAND YOUR COMPLEX REALITY. SCIENCE IS NOT ENOUGH; IT CANNOT SHOW YOU EVERYTHING YOU MUST KNOW IN ORDER TO UNDERSTAND THE MULTIDIMENSIONAL TRUTH OF OUR UNIVERSE, MULTIVERSE, METAVERSE, XENOVERSE, OMNIVERSE, ALPHAVVERSE, AND OMEGAVVERSE. THIS MEANS THAT THE MATERIALISTIC MINDSET OF THE CURRENT CIVILIZATION DOESN'T HELP YOU UNDERSTAND YOUR REALITY. THE UNCONSCIOUS MIND THAT PRODUCES YOUR DREAMS IS THE GOD YOU FIRST MET IN YOUR FIRST RELIGIOUS EXPERIENCES. SOME PEOPLE STILL ONLY BELIEVE WHAT THEY WERE TAUGHT IN SUNDAY SCHOOL AND CHURCH IN AMERICA. PLEASE JOIN US IN THE ASCENSION CENTER OF THE ASCENSION AGE OF 2012 & BEYOND IN OUR BECOMING MORE FOR THE HEALTH AND PROSPERITY FOR ALL. WE NOW SHARE SUSTAINABILITY OF OUR PLANET AND SPECIES TOGETHER AS ONE GLOBAL BRAIN.
