jackson state university business office: Student Resistance to Apartheid at the University of Fort Hare Rico Devara Chapman, 2016-05-12 The book explores forms of popular student resistance to apartheid education in South Africa, particularly at the University of Fort Hare (UFH), by tracing student activism at UFH from 1970 to 2000; highlighting the factors that influenced the development of a culture of student resistance; investigating the root causes that made Fort Hare exceptional in its stand against apartheid; and chronicling the educational and social implications that resulted from students' unparalleled and fearless actions against the apartheid system. Student resistance at Fort Hare can be traced as far back as the 1940s; however, this book will primarily focus on the critical 1970–2000 period, which was marked by increased student activism in South Africa. The 1980s and 1990s were peak years for student activism in the country. There is no doubt that student struggles during this period and thereafter helped dismantle apartheid and usher in a new South African government.

jackson state university business office: Joe T. Patterson and the White South's

Dilemma Robert E. Lockett Jr., 2015-08-24 As Mississippi's attorney general from 1956 to 1969, Joe T. Patterson led the legal defense for Jim Crow in the state. He was inaugurated for his first term two months before the launch of the Sovereignty Commission—charged “to protect the sovereignty of Mississippi from encroachment thereon by the federal government”—which made manifest a century-old states' rights ideology couched in the rhetoric of massive resistance. Despite the dubious legal foundations of that agenda, Patterson supported the organization's mission from the start and served as an ex-officio leader on its board for the rest of his life. Patterson was also a card-carrying member of the segregationist Citizens' Council and, in his own words, had “spent many hours and driven many miles advocating the basic principles for which the Citizens' Councils were originally organized.” Few ever doubted his Jim Crow credentials. That is until September 1962 and the integration of the University of Mississippi by James Meredith. That fall Patterson stepped out of his entrenchment by defying a circle of white power brokers, but only to a point. His seeming acquiescence came at the height of the biggest crisis for Mississippi's racist order. Yet even after the Supreme Court decreed that Meredith must enter the university, Patterson opposed any further desegregation and despised the federal intervention at Ole Miss. Still he faced a dilemma that confronted all white southerners: how to maintain an artificially elevated position for whites in southern society without resorting to violence or intimidation. Once the Supreme Court handed down its decision in *Meredith v. Fair*, the state attorney general walked a strategic tightrope, looking to temper the ruling's impact without inciting the mob and without retreating any further. Patterson and others sought pragmatic answers to the dilemma of white southerners, not in the name of civil rights but to offer a more durable version of white power. His finesse paved the way for future tactics employing duplicity and barely yielding social change while deferring many dreams.

jackson state university business office: Color and Money Peter G. Schmidt, 2007-08-07 What is the real story behind the fight over affirmative action at colleges? Veteran journalist Peter Schmidt exposes truths that will outrage readers and forever transform the debate. He reveals how: * colleges use affirmative action to mask how much they cater to the country club crowd and to solicit support from the big corporations they steer minority students toward; * conservatives have used opposition to affirmative action to advance a broader agenda that includes gutting government programs that help level the playing field; * selective colleges reward families for shielding their children from contact with other races and classes and help perpetuate societal discrimination by favoring applicants from expensive private schools or public schools in exclusive communities; * racial tensions like those witnessed at Duke University, the University of Michigan, and scores of other campuses in recent decades are a direct result of college admissions policies; * affirmative-action preferences for women and minorities may have survived recent court challenges, but in much of the nation they are unlikely to survive the forces of democracy; and * regardless of what happens with affirmative action, African Americans are going to be denied equal access to colleges for many decades to come unless American society undergoes revolutionary change. This is a startling, brave, and thoroughly researched book that will ignite a national debate on class and education for years to come.

In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. jackson state university business office: A Man in Full Tom Wolfe, 2010-04-01 The Bonfire of the Vanities defined an era--and established Tom Wolfe as our prime fictional chronicler of America at its most outrageous and alive. With A Man in Full, the time the setting is Atlanta, Georgia--a racially mixed late-century boomtown full of fresh wealth, avid speculators, and worldly-wise politicians. Big men. Big money. Big games. Big libidos. Big trouble. The protagonist is Charles Croker, once a college football star, now a late-middle-aged Atlanta real-estate entrepreneur turned conglomerate king, whose expansionist ambitions and outsize ego have at last hit up against reality. Charlie has a 28,000-acre quail-shooting plantation, a young and demanding second wife--and a half-empty office tower with a staggering load of debt. When star running back Fareek Fanon--the pride of one of Atlanta's grimmest slums--is accused of raping an Atlanta blueblood's daughter, the city's delicate racial balance is shattered overnight. Networks of illegal Asian immigrants crisscrossing the continent, daily life behind bars, shady real-estate syndicates, cast-off first wives of the corporate elite, the racially charged politics of college sports--Wolfe shows us the disparate worlds of contemporary America with all the verve, wit, and insight that have made him our most phenomenal, most admired contemporary novelist. A Man in Full is a 1998 National Book Award Finalist for Fiction.

jackson state university business office: *Electrifying India* Sunila S. Kale, 2014-04-09

Throughout the 20th century, electricity was considered to be the primary vehicle of modernity, as well as its quintessential symbol. In India, electrification was central to how early nationalists and planners conceptualized Indian development, and huge sums were spent on the project from then until now. Yet despite all this, sixty-five years after independence nearly 400 million Indians have no access to electricity. *Electrifying India* explores the political and historical puzzle of uneven development in India's vital electricity sector. In some states, nearly all citizens have access to electricity, while in others fewer than half of households have reliable electricity. To help explain this variation, this book offers both a regional and a historical perspective on the politics of electrification of India as it unfolded in New Delhi and three Indian states: Maharashtra, Odisha, and Andhra Pradesh. In those parts of the countryside that were successfully electrified in the decades after independence, the gains were due to neither nationalist idealism nor merely technocratic plans, but rather to the rising political influence and pressure of rural constituencies. In looking at variation in how public utilities expanded over a long period of time, this book argues that the earlier period of an advancing state apparatus from the 1950s to the 1980s conditioned in important ways the manner of the state's retreat during market reforms from the 1990s onward.
