medina wellness by owner: Voices from the Ancestors Lara Medina, Martha R. Gonzales, 2019-10-08 Voices from the Ancestors brings together the reflective writings and spiritual practices of Xicanx, Latinx, and Afro-Latinx womxn and male allies in the United States who seek to heal from the historical traumas of colonization by returning to ancestral traditions and knowledge. This wisdom is based on the authors' oral traditions, research, intuitions, and lived experiences—wisdom inspired by, and created from, personal trajectories on the path to spiritual conocimiento, or inner spiritual inquiry. This conocimiento has reemerged over the last fifty years as efforts to decolonize lives, minds, spirits, and bodies have advanced. Yet this knowledge goes back many generations to the time when the ancestors understood their interconnectedness with each other, with nature, and with the sacred cosmic forces—a time when the human body was a microcosm of the universe. Reclaiming and reconstructing spirituality based on non-Western epistemologies is central to the process of decolonization, particularly in these fraught times. The wisdom offered here appears in a variety of forms—in reflective essays, poetry, prayers, specific guidelines for healing practices, communal rituals, and visual art, all meant to address life transitions and how to live holistically and with a spiritual consciousness for the challenges of the twenty-first century.

Bernard Luckenbill, Barbara Froling Immroth, 2010-06-14 This holistic guide explains how school librarians and teachers can successfully integrate relevant health concepts and life skills throughout the curriculum for students K through 12. In the United States, convenience food and soft drink-based diets,

increasingly sedentary lifestyles, and obesity have become common in youth culture. The importance of health education merits integration throughout school curricula; unfortunately, research shows that many teachers do not feel prepared to teach health issues within their subject areas. This book will encourage all librarians and teachers—no matter their specific area of instruction—to include health lessons in their teaching. *Health Information in a Changing World: Practical Approaches for Teachers, Schools, and School Librarians* provides a complete action plan for librarians and teachers who want to provide better health information to students and their caregivers. It contains an extensive discussion of teaching health within curriculum areas such as literature, history and biography, art, science and mathematics, industrial technology, and agriculture. Tips on accessing and evaluating health information in print and electronic media are presented, as well as practical suggestions for effective instructional methods, including ideas on conducting demonstrations, field trips, speaker programs, and online distance education. New findings regarding teaching effectiveness assessment are also presented.
