accounting connect: Managerial Accounting for Managers Eric W. Noreen, Peter C. Brewer, Ray H. Garrison, 2011 Managerial Accounting for Managers, 2nd Edition by Noreen/Brewer/Garrison is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen book was created to serve customers who do not wish to teach the financial accounting-oriented content that is included in the Garrison book. Of our three books (the Brewer book, the Garrison book, and the Noreen book), the Noreen book is the most pure management accounting textbook. The other two books have greater amounts of financial accounting content. Managerial Accounting for Managers, 2nd Edition is geared towards professors who love Garrison's market-leading managerial accounting content, but have been bothered by the debits and credits included in the book. It includes the same coverage of managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization without the journal entries. The job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting--planning, control, and decision making.

accounting connect: Accounting and Order Mahmoud Ezzamel, 2012-12-12 This book draws on ancient Egyptian inscriptions in order to theorize the relationship between accounting and order. It focuses especially on the performative power of accounting in producing and sustaining order in society. It explores how accounting intervened in various domains of the ancient Egyptian world: the cosmos; life on earth (offerings to the gods; taxation; transportation; redistribution for palace dependants; mining activities; work organization; baking and brewing; private estates and the household; and private transactions in semi-barter exchange); and the cult of the dead. The book emphasizes several possibilities through which accounting can be theorized over and above strands of theorizing that have already been explored in detail previously. These additional possibilities theorize accounting as a performative ritual; myth; a sign system; a signifier; a time ordering device; a spatial ordering device; violence; and as an archive and a cultural memory. Each of these themes are summarized with further suggestions as to how theorizing might be pursued in future research in the final chapter of the book. This book is of particular relevance to all accounting students and researchers concerned with theorize accounting and also with the relevance of history to the project of contemporary theorizing of accounting.
