**Analyzing Your Features:** We'll provide a checklist of features to consider, such as your skin's lightness or darkness, the intensity of your hair color, and the overall contrast between your features.

**adored color analysis: Antkind** Charlie Kaufman, 2021-07-06 The bold and boundlessly original debut novel from the Oscar®-winning screenwriter of Being John Malkovich, Adaptation, Eternal Sunshine of the Spotless Mind, and Synecdoche, New York. **LOGLISTED FOR THE CENTER FOR FICTION FIRST NOVEL PRIZE** • “A dyspeptic satire that owes much to Kurt Vonnegut and Thomas Pynchon . . . propelled by Kaufman’s deep imagination, considerable writing ability and bull’s-eye wit.—The Washington Post “An astonishing creation . . . riotously funny . . . an exceptionally good [book].”—The New York Times Book Review • “Kaufman is a master of language . . . a sight to behold.”—NPR **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND MEN’S HEALTH** B. Rosenberger Rosenberg, neurotic and underappreciated film critic (failed academic, filmmaker, paramour, shoe salesman who sleeps in a sock drawer), stumbles upon a hitherto unseen film made by an enigmatic outsider—a film he’s convinced will change his career trajectory and rock the world of cinema to its core. His hands on what is possibly the greatest movie ever made—a three-month-long stop-motion masterpiece that took its reclusive auteur ninety years to complete—B. knows that it is his mission to show it to the rest of humanity. The only problem: The film is destroyed, leaving him the sole witness to its inadvertently ephemeral genius. All that’s left of this work of art is a single frame from which B. must somehow attempt to recall the film that just might be the last great hope of civilization. Thus begins a mind-boggling journey through the hilarious nightmarescape of a psyche as lushly Kafkaesque as it is atrophied by the relentless spew of Twitter. Desperate to impose order on an increasingly nonsensical existence, trapped in a self-imposed prison of aspirational victimhood and degeneratively inclusive language, B. scrambles to re-create the lost masterwork while attempting to keep pace with an ever-fracturing culture of “likes” and arbitrary denunciations that are simultaneously his *bête noire* and his *raison d’être*. A searing indictment of the modern world, *Antkind* is a richly layered meditation on art, time, memory, identity, comedy, and the very nature of existence itself—the grain of truth at the heart of every joke.

To the Green-eyed Lovebird: We met fifteen years ago, almost to the day, when I moved my stuff into the NYU dorm room next to yours at Senior House. You called us fast friends. I like to think it was more. We lived on nothing but the excitement of finding ourselves through music (you were obsessed with Jeff Buckley), photography (I couldn't stop taking pictures of you), hanging out in Washington Square Park, and all the weird things we did to make money. I learned more about myself that year than any other. Yet, somehow, it all fell apart. We lost touch the summer after graduation when I went to South America to work for National Geographic. When I came back, you were gone. A part of me still wonders if I pushed you too hard after the wedding... I didn't see you again until a month ago. It was a Wednesday. You were rocking back on your heels, balancing on that thick yellow line that runs along the subway platform, waiting for the F train. I didn't know it was you until it was too late, and then you were gone. Again. You said my name; I saw it on your lips. I tried to will the train to stop, just so I could say hello. After seeing you, all of the youthful feelings and memories came flooding back to me, and now I've spent the better part of a month wondering what your life is like. I might be totally out of my mind, but would you like to get a drink with me and catch up on the last decade and a half? M

**adored color analysis:** *The Portraitist* Steven Nadler, 2022-10-06 In the seventeenth century some of the most advanced painting in Europe was produced in the Netherlands. Rembrandt dominated the radical progress of painting in Amsterdam, and Vermeer did so in Delft. Frans Hals led the vanguard in Haarlem where he painted some of the most animated, individualized portraits of the era, or of any era, for that matter. Now, Steven Nadler has produced the first biography of this elusive Dutch artist to be published in many years. Hals left behind no letters or other personal papers, though luckily a wealth of other sources offer details of his life and personality. Nadler has fleshed out Hals's biography by casting it against the drama of Holland's revolution against Spanish rule, the acute struggles between Protestantism and Catholicism in the Low Countries, and the rise of Holland as a colonial power and center of industry and commerce. The result is an authoritative picture of Hals and life in his studio and a robust work of seventeenth-century social and cultural history. Nadler serves up the sights, smells, and sounds of life in Haarlem. He takes us into cloth factories, taverns, busy studios, and bustling markets. He takes us behind the scenes of the picture trade. He leads us along the newly invented shorelines where weavers laid out large, billowing lengths of cloth to bleach in the sun. He takes us into new Protestant churches and into old Catholic ones. We witness the bloody politics of the long Reformation and the 1635 plague that devastated the Dutch Republic. What emerges is a deftly written story of a complex artist and the tumultuous world he inhabited. Accented with images of life in seventeenth-century Holland and a color gallery of works by Hals and his peers, *The Portraitist* is a work of great charm and importance and will stand as the first full biography of one of Europe's most important artists for many years--

**adored color analysis: *Helmholtz*** Michel Meulders, 2012-09-14 The first biography in English of a nineteenth-century German scientist whose experimental approach influences today's neuroscience. Although Hermann von Helmholtz was one of most remarkable figures of nineteenth-century science, he is little known outside his native Germany. Helmholtz (1821-1894) made significant contributions to the study of vision and perception and was also influential in the painting, music, and literature of the time; one of his major works analyzed tone in music. This book, the first in English to describe Helmholtz's life and work in detail, describes his scientific studies, analyzes them in the context of the science and philosophy of the period—in particular the German *Naturphilosophie*—and gauges his influence on today's neuroscience. Helmholtz, trained by Johannes Müller, one of the best physiologists of his time, used a resolutely materialistic and empirical scientific method in his research. His work, eclipsed at the beginning of the twentieth century by new ideas in neurophysiology, has recently been rediscovered. We can now recognize in Helmholtz's methods—which were based on his belief in the interconnectedness of physiology and psychology—the origins of neuroscience.

More than two years on The New York Times bestseller list. As a boy in Brooklyn's Red Hook projects, James McBride knew his mother was

different. But when he asked her about it, she'd simply say 'I'm light-skinned.' Later he wondered if he was different too, and asked his mother if he was black or white. 'You're a human being! Educate yourself or you'll be a nobody!' she snapped back. And when James asked about God, she told him 'God is the color of water.' This is the remarkable story of an eccentric and determined woman: a rabbi's daughter, born in Poland and raised in the Deep South who fled to Harlem, married a black preacher, founded a Baptist church and put twelve children through college. A celebration of resilience, faith and forgiveness, *The Color of Water* is an eloquent exploration of what family really means.

**adored color analysis: Saying Goodbye** Anita G. Schmukler, 2013-05-13 Termination of psychoanalysis or psychotherapy is centrally important both to the process of treatment and to the patient's experience of treatment. It is surprising, then, that there has heretofore been no comprehensive study of the subject. This book begins to bridge the gap in this area. It is the first volume devoted entirely to issues surrounding the ending of treatment in analytic and therapeutic work with children and adolescents. Organized into separate clinical and theoretical sections, framed by a preface and sectional introductions, and covering a wide range of psychopathology, this book explores the different ways in which children and adolescents grapple with the experience of separation at the conclusion of treatment. Of special note is the contributors' recognition that the parents of children ending treatment face their own termination experience in relinquishing the support of their child's therapist. The presentations are enriched, as well, by frank discussions of countertransference as it enters into the termination phase of treatment.

**adored color analysis: A Spell for Chameleon (The Parallel Edition... Simplified)** Piers Anthony, 2012-02-14 Piers Anthony's bestselling Xanth series is one of the cornerstones of fantasy, a lively and whimsical interpretation of a genre often criticized for taking itself too seriously. Anthony's first Xanth novel, *A Spell for Chameleon*, was initially edited to target a more traditional audience. Now, in an eBook exclusive, *A Spell for Chameleon* has been reworked line by line—its language matching the simpler, playful way with words that made Piers Anthony an enduring fan favorite. Xanth is an enchanted land where magic rules, a land of centaurs and dragons and basilisks where every citizen has a unique spell to call their own. For Bink of North Village, however, Xanth is no fairy tale. He alone has no magic. And unless he gets some—and fast!—he will be exiled. Forever. But the Good Magician Humfrey is convinced that Bink does indeed have magic. In fact, both Beauregard the genie and the magic wall chart insist that Bink has magic as powerful as any possessed by the King, the Good Magician Humfrey, or even the Evil Magician Trent. Be that as it may, no one can fathom the nature of Bink's very special magic. This is even worse than having no magic at all . . . and he still faces exile!

**adored color analysis: Light of the Mind, Light of the World** Spencer Klavan, 2024-10-15 The world is not a machine. Humanity is not a mistake. For centuries, a grim anti-human outlook has taken hold of the public imagination, teaching us all to view ourselves as random products of a cruel and uncaring natural world. Today, from apocalyptic environmentalism to twisted eugenics and dystopian bionic augmentation, movements are rising around the world to dispense with humanity or subordinate it to a pitiless mechanical logic. For many, it has come to seem as if the human spirit is obsolete, religious faith is illusory, and mankind is destined to be extinguished or surpassed. Some might even see the end of humanity as a good thing. But that is not our future. *Light of the Mind*, *Light of the World* tells a daring new story about how we got here, and how we can chart a better path forward. Surveying the history of science and faith from the astronomers of Babylon to the quantum physicists of postwar Europe and America, classicist and scholar Spencer A. Klavan argues that science itself is leading us not away from God but back to him, and to the ancient faith that places the human soul at the center of the universe. Reconciling the discoveries of science with the truths of the Bible, Klavan shows how the search for knowledge of the natural world can help illuminate the glories of its Creator, and how the latest developments in physics can help shatter the illusion of materialism.
