nappi wellness institute address: Built to Love Jonathan Cagan, Peter Boatwright, 2011-08-19 Built to Love reveals how companies can create captivating products that energize the marketplace and set the standard for what customers want and expect. Firms often hope the answer is to produce the latest high technology devices - only to find that they fail to light up the marketplace. Or firms rely on ads that overstate or mislead, leaving the customer disappointed and disillusioned. Instead, a deeper emotional engagement between the customer and product is required, regardless of whether the products are physical products, services, technologies, software, systems, or brands. Using a combination of industry - based research and laboratory experiments, the authors demonstrate that customers will richly pay for products that authentically provide emotional fulfillment. They uncover the science behind successful products that create an avid and loyal following, and they present evidence that product emotions increase a product's success in the marketplace as well as a firm's success in the stock market (even when the economy is down!). Throughout, the book uses revealing case studies that show how to energize customers in both consumer and business - to - business worlds, in both large and small firms.

nappi wellness institute address: Retooling for an Aging America Institute of Medicine, Board on Health Care Services, Committee on the Future Health Care Workforce for Older Americans, 2008-08-27 As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. *Retooling for an Aging America* calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. nappi wellness institute address: Double Cup Love Eddie Huang, 2016-05-31 From the author of *Fresh Off the Boat*, now a hit ABC sitcom, comes a hilarious and fiercely original story of culture, family, love, and red-cooked pork Eddie Huang was finally happy. Sort of. He'd written a bestselling book and was the star of a TV show that took him to far-flung places around the globe. His New York City restaurant was humming, his OKCupid hand was strong, and he'd even hung fresh Ralph Lauren curtains to create the illusion of a bedroom in the tiny apartment he shared with his younger brother Evan, who ran their restaurant business. Then he fell in love—and everything fell apart. The business was creating tension within the family; his life as a media star took him away from his first passion—food; and the woman he loved—an All-American white girl—made him wonder: How Chinese am I? The only way to find out, he decided, was to reverse his parents' migration and head back to the motherland. On a quest to heal his family, reconnect with his culture, and figure out whether he should marry his American girl, Eddie flew to China with his two brothers and a mission: to set up shop to see if his food stood up to Chinese palates—and to immerse himself in the culture to see if his life made sense in China. Naturally, nothing went according to plan. *Double Cup Love* takes readers from Williamsburg dive bars to the skies over Mongolia, from Michelin-starred restaurants in Shanghai to street-side soup peddlers in Chengdu. The book rockets off as a sharply observed, globe-trotting comic adventure that turns into an existential suspense

story with high stakes. Eddie takes readers to the crossroads where he has to choose between his past and his future, between who he once was and who he might become. Double Cup Love is about how we search for love and meaning—in family and culture, in romance and marriage—but also how that search, with all its aching and overpowering complexity, can deliver us to our truest selves. Praise for Eddie Huang’s Double Cup Love “Double Cup Love invites the readers to journey through [Eddie Huang’s] love story, new friendships, brotherhood, a whole lot of eating and more. Huang’s honest recounting shouts and whispers on every page in all-caps dialogues and hilarious side-commentary. Huang pulls simple truths and humor out of his complex adventure to China. His forthright sharing of anecdotes is sincere and generates uncontrollable laughter. . . . His latest memoir affirms not only that the self-described “human panda” is an engaging storyteller but a great listener, especially in the language of food.”—Chicago Tribune “An elaborate story of love and self-discovery . . . Huang’s writing is wry and zippy; he regards the world with an understanding of its absurdities and injustices and with a willingness to be surprised.”—Jon Caramanica, The New York Times “Huang is determined to tease out the subtle and not-so-subtle ways in which Asian-Americans give up parts of themselves in order to move forward. . . . Fortunately for us, he’s not afraid to speak up about it.”—The New Yorker “Huang connects in Chengdu the same way he assimilated in America—through food, hip-hop and a never-ending authenticity, which readers experience through his hilarious writing voice and style.”—New York Daily News

nappi wellness institute address: *The End of Trauma* George A. Bonanno, 2021-09-07 With “groundbreaking research on the psychology of resilience” (Adam Grant), a top expert on human trauma argues that we vastly overestimate how common PTSD is in and fail to recognize how resilient people really are. After 9/11, mental health professionals flocked to New York to handle what everyone assumed would be a flood of trauma cases. Oddly, the flood never came. In *The End of Trauma*, pioneering psychologist George A. Bonanno argues that we failed to predict the psychological response to 9/11 because most of what we understand about trauma is wrong. For starters, it’s not nearly as common as we think. In fact, people are overwhelmingly resilient to adversity. What we often interpret as PTSD are signs of a natural process of learning how to deal with a specific situation. We can cope far more effectively if we understand how this process works. Drawing on four decades of research, Bonanno explains what makes us resilient, why we sometimes aren’t, and how we can better handle traumatic stress. Hopeful and humane, *The End of Trauma* overturns everything we thought we knew about how people respond to hardship.

nappi wellness institute address: A Handbook of Theories on Designing Alignment Between People and the Office Environment Rianne Appel-Meulenbroek, Vitalija Danivska, 2021-06-16
Although workplace design and management are gaining more and more attention from modern organizations, workplace research is still very fragmented and spread across multiple disciplines in academia. There are several books on the market related to workplaces, facility management (FM), and corporate real estate management (CREM) disciplines, but few open up a theoretical and practical discussion across multiple theories from different fields of studies. Therefore, workplace researchers are not aware of all the angles from which workplace management and effects of workplace design on employees has been or could be studied. A lot of knowledge is lost between disciplines, and sadly, many insights do not reach workplace managers in practice. Therefore, this new book series is started by associate professor Rianne Appel-Meulenbroek (Eindhoven University of Technology, the Netherlands) and postdoc researcher Vitalija Danivska (Aalto University, Finland) as editors, published by Routledge. It is titled 'Transdisciplinary Workplace Research and Management' because it bundles important research insights from different disciplinary fields and shows its relevance for both academic workplace research and workplace management in practice. The books will address the complexity of the transdisciplinary angle necessary to solve ongoing workplace-related issues in practice, such as knowledge worker productivity, office use, and more strategic workplace management. In addition, the editors work towards further collaboration and integration of the necessary disciplines for further development of the workplace field in research and in practice. This book series is relevant for workplace experts both in academia and industry. This first book in the series focuses on the employee as a user of the work environment. The 21 theories discussed and applied to workplace design in this book address people's ability to do their

job and thrive in relation to the office workplace. Some focus more on explaining why people behave the way they do (the psychosocial environment), while others take the physical and/or digital workplace quality as a starting point to explain employee outcomes such as health, satisfaction, and performance. They all explain different aspects for achieving employee-workplace alignment (EWA) and thereby ensuring employee thriving. The final chapter describes a first step towards integrating these theories into an overall interdisciplinary framework for eventually developing a grand EWA theory. nappi wellness institute address: Contemporary Obstetrics and Gynecology for Developing Countries Friday Okonofua, Joseph A. Balogun, Kunle Odunsi, Victor N. Chilaka, 2021-08-05 This book is a comprehensive and easy-to-read guide to obstetrics and gynecology in developing countries. Although significant progress has been made towards the reduction of maternal mortality and morbidity globally, they are still unacceptably high in developing countries. This can be directly or indirectly tied to poor quality maternal health care and lack of access to cost-effective, comprehensive healthcare. Health practitioners in developing countries also contend with trying to keep abreast of recent developments in obstetrics and gynecology while dealing with lack of time, resources, and access to relevant information. This textbook was thus created by experts in obstetrics and gynecology with extensive experience in African clinical settings and consultants in developed countries to teach proper and accurate diagnosis, treatment and management of gynecologic and obstetric health issues within the context of developing countries. This second edition has been fully updated throughout with an added 25+ chapters that cover topics such as reproductive health, gynecological cancers and research methods. The book is divided into six sections: Women's Reproductive Health; Obstetrics; Medical and Surgical Disorders in Pregnancy; General Gynecology; Gynecological Malignancies; Health Systems Organization, Research Methodology and Biostatistics. These section topics have been carefully covered by expert authors with the use of valid scientific data, policy instruments, and adapted to the cultural and social context of developing countries, with particular in depth coverage of conditions that have greater prevalence and incidence in developing countries. Each chapter also focuses on filling gaps in knowledge with a distinct pedagogical approach, starting with a set of learning objectives and ending with key takeaways for the chapter. This is an ideal guide for residents, medical students, practitioners of obstetrics and gynecology, midwives, general practitioners, and pediatricians, particularly those working in developing countries.

nappi wellness institute address: Leading Through a Pandemic Michael J. Dowling, Charles Kenney, 2020-08-25 A clarifying must-read in these uncertain times." —GOVERNOR ANDREW CUOMO Journey behind the front lines of the coronavirus pandemic with Northwell Health, New York's largest health system. What was it like at the epicenter, inside the health system that cared for more COVID-19 patients than any other in the United States? *Leading Through a Pandemic: The Inside Story of Lessons Learned about Innovation, Leadership, and Humanity During the COVID-19 Crisis* takes readers inside Northwell Health, New York's largest health system. From the

C-suite to the front lines, the book reports on groundwork that positioned Northwell as uniquely prepared for the pandemic. Two decades ago, Northwell leaders began preparing for disasters—floods, hurricanes, blackouts, viruses, and more based on the belief that bad things will happen and we have to be ready. Following a course highly unusual for an American health system, Northwell developed one of the most advanced non-government emergency response systems in the country. Northwell reached a point where leaders could confidently say we are comfortable being uncomfortable in a crisis. But even with sustained preparation, the pandemic stands as a singularly humbling experience. *Leading Through a Pandemic* offers guidance on how hospitals and health systems throughout the country can prepare more effectively for the next viral threat. The book includes dramatic stories from the front lines at the peak of the viral assault and lessons of what went well, and what did not. The authors draw upon the Northwell experience to prescribe changes in the health care system for next time. Beyond the obvious need for increased stockpiles of supplies and equipment is the far more challenging task of fundamentally changing the culture of American health care to embrace a more robust emergency response capability in hospitals and systems of all sizes across the nation. The book is a must read for health care professionals, policy-makers, journalists, and readers whose curiosity demands a deeper dive into the surreal realm of the coronavirus pandemic.

nappi wellness institute address: *The Death Gap* David A. Ansell, MD, 2021-06-16 We hear plenty about the widening income gap between the rich and the poor in America and about the expanding distance separating the haves and the have-nots. But when detailing the many things that the poor have not, we often overlook the most critical—their health. The poor die sooner. Blacks die sooner. And poor urban blacks die sooner than almost all other Americans. In nearly four decades as a doctor at hospitals serving some of the poorest communities in Chicago, David A. Ansell, MD, has witnessed firsthand the lives behind these devastating statistics. In *The Death Gap*, he gives a grim survey of these realities, drawn from observations and stories of his patients. While the contrasts and disparities among Chicago's communities are particularly stark, the death gap is truly a nationwide epidemic—as Ansell shows, there is a thirty-five-year difference in life expectancy between the healthiest and wealthiest and the poorest and sickest American neighborhoods. If you are poor, where you live in America can dictate when you die. It doesn't need to be this way; such divisions are not inevitable. Ansell calls out the social and cultural arguments that have been raised as ways of explaining or excusing these gaps, and he lays bare the structural violence—the racism, economic exploitation, and discrimination—that is really to blame. Inequality is a disease, Ansell argues, and we need to treat and eradicate it as we would any major illness. To do so, he outlines a vision that will provide the foundation for a healthier nation—for all. As the COVID-19 mortality rates in underserved communities proved, inequality is all around us, and often the distance between high and low life expectancy can be a matter of just a few blocks. Updated with a new foreword by Chicago mayor Lori Lightfoot and an afterword by Ansell, *The Death Gap* speaks to the urgency to face this national health crisis head-on.

Sundstrom, 2015-10-08 Reproductive rights are human rights. Reproductive Justice and Women's Voices: Health Communication across the Lifespan offers an in-depth analysis of women's reproductive health in a transformative, sociopolitical moment that is redefining women's access to health care; reducing disparities in maternal and child health is a critical public health goal for the United States. Sundstrom contributes to patient-centered public health by analyzing women's reproductive health across the lifespan. Four critical body episodes: contraceptive use dynamics, pregnancy, childbirth, and the post-partum period explicate women's understandings of control and embodiment in the context of technology. Women's meaning making of each body episode is interrogated in three areas: (1) the physiological experience of reproductive health, (2) perceptions of medicine and the biomedical model, and (3) opinions of mediated messages about reproduction, including new media. Through stories and silence, the women interviewed in this book demand accurate information, including the risks and benefits of health care, and access to reproductive services and technologies. The analysis disrupts the nature/technology dualism and reconceptualizes health outside of the normative processes of menstruation, pregnancy, and childbirth. By talking with women, this study privileges women's decision-making about reproductive health and offers insight for how women's partners, families, and health care providers can support them in this process.

nappi wellness institute address: The Dancing Healers Carl A. Hammerschlag, 1989-09-13 This fascinating account of a Yale-trained psychiatrist's twenty-year experience with Native American healing interweaves autobiography with stories of the Native Americans who challenged his medical school assumptions about their methods. While working as a family physician in a Native

American hospital in the Southwest, Carl Hammerschlag was introduced to a patient named Santiago, a Pueblo priest and clan chief, who asked him where he had learned how to heal. Hammerschlag responded almost by rote, rattling off his medical education, internship, and certification. The old man replied, Do you know how to dance? To humor Santiago, Hammerschlag shuffled his feet at the priest's bedside. Despite his condition, Santiago got up and demonstrated the proper steps. You must be able to dance if you are to heal people, he admonished the young doctor. I can teach you my steps, but you will have to hear your own music. Hammerschlag synthesizes his Jewish heritage with his experience with Native Americans to produce a practice open to all methods of healing. He discovers the wisdom of the Pueblo priest's question to his Western doctor, Do you know how to dance?

nappi wellness institute address: *Grace from the Garden* Debra Landwehr Engle, 2003-05-23 Gardening is the most basic of languages, the labor from which we're all born and nourished. . . . In these pages, we travel the country with Debra Landwehr Engle as she visits 20 gardens and gardeners from California to Maine and Minnesota to Arkansas, showing us that grassroots campaigns actually can and do involve roots--and seeds and garden trowels. That any person with a steadfast resolve and an open patch of dirt can help bridge the gap between multinational refugees. That lush vegetation and running water and cool stones can help spark the fading memories of our elderly. And that our children can learn about where food comes from, labyrinths, wetlands systems, and healing from grief and loss just by digging in the earth with a caring adult hand to guide them. As the stories in this remarkable collection demonstrate, the simplest act of gardening can produce significant changes in the lives of people we might never even meet. Consider the man who sends seedlings and greenhouses halfway around the world to feed hospital patients, or the immigrant woman who began selling her own flowers as a way to raise money for overseas charities, or the couple who offers their land as a midday retreat for the residents of nearby nursing homes. These acts and others are not heroic--or even unusual--as Ms. Engle tells us. We see ourselves in these uplifting tales from the garden, as they inspire us to transform our own little parts of the world into places of greater peace, repose, play, and healing. For gardeners, community activists, and those who understand the spiritual value of putting a spade in the soil, these stories capture the promise renewed each time we plant a seed and give us fresh ideas for changing the world, one garden at a time.
