placerville animal wellness clinic placerville ca: **The Hoarder in You** Robin Zasio, 2012-11-13 We all have treasured possessions—a favorite pair of shoes, a much-beloved chair, an ever-expanding record collection. But sometimes, this emotional attachment to our belongings can spiral out of control and culminate into a condition called compulsive hoarding. From hobbyists and collectors to pack rats and compulsive shoppers—it is close to impossible for hoarders to relinquish their precious objects, even if it means that stuff takes over their lives and their homes. According to psychologist Dr. Robin Zasio, our fascination with hoarding stems from the fact that most of us fall somewhere on the hoarding continuum. Even though it may not regularly interfere with our everyday lives, to some degree or another, many of us hoard. *The Hoarder In You* provides practical advice for decluttering and organizing, including how to tame the emotional pull of acquiring additional things, make order out of chaos by getting a handle on clutter, and create an organizational system that reduces stress and anxiety. Dr. Zasio also shares some of the most serious cases of hoarding that she's encountered, and explains how we can learn from these extreme examples—no matter where we are on the hoarding continuum.

placerville animal wellness clinic placerville ca: **The Deeper the Roots** Michael Tubbs, 2021-11-16 "Insightful, emotional, and enraging. By sharing his story in gripping detail, Michael Tubbs embodies an old feminist tradition whereby the personal is political. He empowers us to fight for equal opportunities for our communities, and encourages us to amass the courage to overcome loss and injustice." —Ibram X. Kendi, National Book Award-winning author of *Stamped from the Beginning* and *How to Be an Antiracist* The making of a visionary political leader—and a blueprint for a more equitable country "Don't tell nobody our business," Michael Tubbs's mother often told him growing up. For Michael, that meant a lot of things: don't tell anyone about the day-to-day struggle of being Black and broke in Stockton, CA. Don't tell anyone the pain of having a father

incarcerated for 25 years to life. Don't tell anyone about living two lives, the brainy bookworm and the kid with the newest Jordans. And also don't tell anyone about the particular joys of growing up with three "moms"—a Nana who never let him miss church, an Auntie who'd take him to the library any time, and a mother, "She-Daddy", who schooled him in the wisdom of hip-hop and taught him never to take no for an answer. So for a long time Michael didn't tell anyone his story, but as he went on to a scholarship at Stanford and an internship in the Obama White House, he began to realize the power of his experience, the need for his perspective in the halls of power. By the time he returned to Stockton to become, in 2016 at age 26, its first Black mayor and the youngest-ever mayor of a major American city, he knew his story meant something. *The Deeper the Roots* is a memoir astonishing in its candor, voice, and clarity of vision. Tubbs shares with us the city that raised him, his family of badass women, his life-changing encounters with Oprah Winfrey and Barack Obama, the challenges of governing in the 21st century and everything in between—en route to unveiling his compelling vision for America rooted in his experiences in his hometown.

placerville animal wellness clinic placerville ca: **Counterpoints** Anti-Eviction Mapping Project, 2021-08-03 *Counterpoints: A San Francisco Bay Area Atlas of Displacement and Resistance* brings together cartography, essays, illustrations, poetry, and more in order to depict gentrification

and resistance struggles from across the San Francisco Bay Area and act as a roadmap to counter-hegemonic knowledge making and activism. Compiled by the Anti-Eviction Mapping Project, each chapter reflects different frameworks for understanding the Bay Area's ongoing urban upheaval, including: evictions and root shock, indigenous geographies, health and environmental racism, state violence, transportation and infrastructure, migration and relocation, and speculative futures. By weaving these themes together, Counterpoints expands normative urban-studies framings of gentrification to consider more complex, regional, historically grounded, and entangled horizons for understanding the present. Understanding the tech boom and its effects means looking beyond San Francisco's borders to consider the region as a socially, economically, and politically interconnected whole and reckoning with the area's deep history of displacement, going back to its first moments of settler colonialism. Counterpoints combines work from within the project with contributions from community partners, from longtime community members who have been fighting multiple waves of racial dispossession to elementary school youth envisioning decolonial futures. In this way, Counterpoints is a collaborative, co-created atlas aimed at expanding knowledge on displacement and resistance in the Bay Area with, rather than for or about, those most impacted.

placerville animal wellness clinic placerville ca: Digital Mammography Ulrich Bick, Felix Diekmann, 2010-03-11 Digital Radiography has been firmly established in diagnostic radiology during the last decade. Because of the special requirements of high contrast and spatial resolution needed for roentgen mammography, it took some more time to develop digital mammography as a routine radiological tool. Recent technological progress in detector and screen design as well as increased experience with computer applications for image processing have now enabled Digital Mammography to become a mature modality that opens new perspectives for the diagnosis of breast diseases. The editors of this timely new volume Prof. Dr. U. Bick and Dr. F. Diekmann, both well-known international leaders in breast imaging, have for many years been very active in the frontiers of theoretical and translational clinical research, needed to bring digital mammography finally into the sphere of daily clinical radiology. I am very much indebted to the editors as well as to the other internationally recognized experts in the field for their outstanding state of the art contributions to this volume. It is indeed an excellent handbook that covers in depth all aspects of Digital Mammography and thus further enriches our book series Medical Radiology. The highly informative text as well as the numerous well-chosen superb illustrations will enable certified radiologists as well as radiologists in training to deepen their knowledge in modern breast imaging.

placerville animal wellness clinic placerville ca: *Engineering Eden* Jordan Fisher Smith, 2016-06-07 The fascinating story of a trial that opened a window onto the century-long battle to control nature in the national parks. When twenty-five-year-old Harry Walker was killed by a bear in Yellowstone Park in 1972, the civil trial prompted by his death became a proxy for bigger questions about American wilderness management that had been boiling for a century. At immediate issue was whether the Park Service should have done more to keep bears away from humans, but what was revealed as the trial unfolded was just how fruitless our efforts to regulate nature in the parks had always been. The proceedings drew to the witness stand some of the most important figures in twentieth century wilderness management, including the eminent zoologist A. Starker Leopold, who had produced a landmark conservationist document in the 1950s, and all-American twin researchers John and Frank Craighead, who ran groundbreaking bear studies at Yellowstone. Their testimony would help decide whether the government owed the Walker family restitution for Harry's death, but it would also illuminate decades of patchwork efforts to preserve an idea of nature that had never existed in the first place. In this remarkable excavation of American environmental history, nature writer and former park ranger Jordan Fisher Smith uses Harry Walker's story to tell the larger narrative of the futile, sometimes fatal, attempts to remake wilderness in the name of preserving it. Tracing a course from the founding of the national parks through the tangled twentieth-century growth of the conservationist movement, Smith gives the lie to the portrayal of national parks as Edenic wonderlands unspoiled until the arrival of Europeans, and shows how virtually every attempt to manage nature in the parks has only created cascading effects that require even more management. Moving across time and between Yellowstone, Yosemite, and Glacier national parks, *Engineering Eden* shows how efforts at wilderness management have always been undone by one fundamental problem--that the idea of what is wild dissolves as soon as we begin to examine it, leaving us with little framework to say what wilderness should look like and which human

interventions are acceptable in trying to preserve it. In the tradition of John McPhee's *The Control of Nature* and Alan Burdick's *Out of Eden*, Jordan Fisher Smith has produced a powerful work of popular science and environmental history, grappling with critical issues that we have even now yet to resolve.

placerville animal wellness clinic placerville ca: It Was Never About the Food Dr. Tony Paulson, Dr. Eve Snyder, Mark Gibson LCSW, 2021-04-29 It Was Never about the Food shows that recovery from eating disorders is possible. Whether you are someone entering treatment, returning to treatment, supporting someone in treatment, or even contemplating treatment, it is intended to shine a spotlight on the path to recovery. The authors share the stories of four individuals who developed and struggled with an eating disorder ... and overcame it. The stories answer questions such as: • What role does an eating disorder play in someone's life? • How does an eating disorder develop and how harmful can it be? • What does the path to recovery look like? Through these stories, you will see that recovery does not come from a predictable formula. You cannot say to anyone suffering from an eating disorder that if he or she would simply do X, Y, and Z, he or she will recover. Eating disorders require a personalized and comprehensive approach to recovery. A major component to recovery seems to be the willingness to ask for help and to accept support from others—and recognizing that it is never about the food.

placerville animal wellness clinic placerville ca: *Why People Don't Heal and How They Can* Caroline Myss, 2013-09-04 A bold account of the development of human consciousness and spirituality over the ages and an examination of the dynamic global transformation of attitudes about healing. For more than fifteen years, Caroline Myss has studied why some people heal, while others do not. In her previous book, *Anatomy of the Spirit*, Dr. Myss illuminated the hidden interactions of belief and body, soul and cell to show how, as she inimitably puts it, your biography becomes your biology. In *Why People Don't Heal and How They Can*, she builds on her earlier teachings of the seven different energy centers of the body to provide a vital self-healing program for physical and spiritual disorders. With her characteristic no-nonsense style and high-voltage storytelling, she exposes and explodes the five myths about healing, explains the cultural and individual contexts in which people become physically and spiritually ill and invested in woundology, and teaches new methods of working with the challenges that the seven energy centers embody. To help you get and stay on the path to wellness, Dr. Myss provides rituals and prayers for gaining a symbolic perspective on your life issues; for bolstering your personal power; and for connecting with a universal divine energy. Dr. Myss's breakthrough views on energy medicine and her active approach to healing life issues and physical illness will help you overcome the mental blocks that keep you from becoming well.
