saje wellness pocket pharmacy: Letters to My Son Daynabelle Anderson, 2019-01-01 The death of your child breaks you. With some luck, you may be able to rebuild most of who you were before that loss so that you are not a complete stranger, even to yourself. Even then, you know that you will never be the same again. There will always be a piece of you missing, leaving you forever broken. With the loss of her son, Jeramie, to a car accident, author Daynabelle Anderson found this to be true of herself: a forever broken mom. She then had to decide whether to fight it and live her life, trying in vain to be whole again, only to punish herself over and over when her efforts resulted in failure. Or she could accept that this was who she was now--to allow herself to be broken and to forgive herself for it. She chose the latter, and now she chronicles her journey into that brokenness. This personal narrative offers one mother's story and her perspective on how to live with grief, intended for anyone who has lost a loved one and who feels pressured to move on.

saje wellness pocket pharmacy: Neurosurgery and Global Health Isabelle M. Germano, 2022-01-03 This book is a combination of ideas and experiences from over 100 dedicated and brilliant neurosurgeons around the world. Their common goal is to provide data for a deeper understanding of the multi-faceted aspects of neurosurgery and, by doing so, to better serve patients across the globe. Scientific curiosity, deep dedication, incredible work ethics, entrepreneurship, and creativity are the common traits among all neurosurgeons, and not the exception. By allowing readers to see the field of neurosurgery from the perspectives of surgeons spanning five continents, this book serves to provide multiple, diverse viewpoints and to build a foundation for future collaborations. The book's 24 chapters are organized into 3 parts. Part I provides the reader with an overview of the role of neurosurgery in worldwide health care, its evolution over the past decades, the current state and future directions of each neurosurgical subspecialty across the five continents. Over the years, the overarching goal for neurosurgeons has been to develop new, more effective and high-end solutions for complex diseases and to provide access to neurosurgical services for all patients. Part II discusses the differences and similarities of neurosurgery education and training across the globe, providing a snapshot of how new tools, technology, and paradigms reduce inequality and increase access to neurosurgical education. Educational accomplishments and challenges still present for the in different regions of the world are reviewed. Part III focuses on economic aspects influencing neurosurgery globally, including how to make efficient decisions in the face of scarcity, yet demand. The authors provide theories, models, and tools helpful to apply when planning to allocate resources, not just financial, but also human and intellectual. saje wellness pocket pharmacy: Statin Nation Justin Smith, 2017 Heart disease is the leading cause of death worldwide, and for decades conventional health authorities have pushed that the culprits are fat and cholesterol clogging up coronary arteries. Consequently, lowering cholesterol has become a hugely lucrative business, and cholesterol-lowering Statin drugs are now the most prescribed medication in the world, with clinical data showing one billion people eligible for prescription. However, these cholesterol guidelines have been heavily criticized, and increasingly, doctors and researchers have been questioning the role cholesterol plays in heart disease. We now know that people with heart disease often do not, in fact, have high cholesterol, and even the strongest supporters of the cholesterol hypothesis now admit that no ideal level of cholesterol can be identified. Large-scale studies have proven that statins are not generating the benefits that were predicted, and new research shows that high cholesterol may actually prevent heart disease. Worse still, millions of people in the United States and worldwide are taking statins preventatively, at great cost to their health. A complete reevaluation of the real causes of heart disease is long overdue, not to mention an inquiry into why the pharmaceutical industry continues to overprescribe statins (and market them aggressively to consumers) despite this evidence. Statin Nation offers a new understanding of heart disease, and Justin Smith forges an innovative path away from the outdated cholesterol myth with a viable alternative model to address the real causes of heart disease. Statin Nation provides detailed examinations of nutritional alternatives that are up to six times more effective than statins, and other interventions that have been shown to be up to eleven times more effective than statins. But all of these methods are currently ignored by health authorities. Smith provides a heart disease prevention plan that anyone can use, providing hope for the future of heart-disease treatment with a purpose.

saje wellness pocket pharmacy: The Georgia Straight Doug Sarti, Dan McLeod, 2017-09-12 This highly illustrated and beautifully produced coffee-table book brings together over 100 of the Georgia Straight's iconic covers, along with short essays, insider details and contributor reflections, putting each of these issues of the publication into its historical context. For 50 years the Georgia Straight has served as the voice of reason during a number of turbulent times. With fearless tenacity, the Straight has always taken the good fight to the powers that be, whether they come in the form of big business, city hall, the provincial legislature, parliament or just plain human folly. While known for hard-hitting journalism and pointed prose, the Straight has also always been a purposely visual publication. With eye-catching design strongly reflecting the times - from '60s psychedelia to new-millennium computer graphics - the newspaper has charted a course through both artistic trends and meaningful writing. Together in one place for the first time, this collection of Straight covers spans five decades of newsworthy figures, events, issues and pop culture. A visual time capsule of sorts, it's a significant graphic chronicle of both the counterculture and recent Vancouver history - after all, if it was important, entertaining or inspiring, the Straight covered it.

With work from a multitude of artists using various media and contrasting styles, this collection illustrates - literally - how the Straight was able to seize the moral high ground in the culture wars and turn civil disobedience into an art form. Along with a sense of history, there's a strongly ingrained emotional component to these old Straight covers: they've lost none of their power to evoke an impassioned response. Some are beautiful, some are funny, some will shock and some will enrage. But they'll all make you feel something.

saje wellness pocket pharmacy: Mediated Shame of Class and Poverty Across Europe Irena Reifová, Martin Hájek, 2021-07-05 The key concepts of the book are media, class, poverty, and shaming. The contributors to this book examine how certain social relations and their cultural meanings in the media, namely class and poverty, are transformed into factual or moral attributes of people and situations. Class and poverty are not understood as certain things and actions, or concepts and numbers; both class and poverty are assumed to be, above all, particular social relationships or a set of relations between people, things and symbols. Without denying that contempt for the destitute Other is an affect found throughout history and in various socioeconomic contexts, the chapters in this book – through their concern with the mediated gaze on class – narrate predominantly the challenges brought about by the media’s spectacular take on poverty and low status as they (at least) coincide with the neoliberal era. This volume will be essential reading for the scholars specialising in the study of media and social inequalities from the vantage points of Media Studies, Sociology, Anthropology or European Studies.

how Julia Child first discovered French cooking and the French way of life. Paul and Julia moved to Paris in 1948 where he was cultural attaché for the US Information Service, and in this role he met Henri Cartier-Bresson, Robert Capa, Brassai, and other leading lights of the photography world. As Julia recalled: "Paris was wonderfully walkable, and it was a natural subject for Paul." Their wanderings through the French capital and countryside, frequently photographed by Paul, would help lead to the classic *Mastering the Art of French Cooking*, and Julia's brilliant and celebrated career in books and on television. Though Paul was an accomplished photographer (his work is in the collection of the Museum of Modern Art), his photographs remained out of the public eye until the publication of Julia's memoir, *My Life in France*, in which several of his images were included. Now, with more than 200 of Paul's photographs and personal stories recounted by his great-nephew Alex Prud'homme, *France is a Feast* not only captures this magical period in Paul and Julia's lives, but also brings to light Paul Child's own remarkable photographic achievement.

saje wellness pocket pharmacy: *How Is It Love?* Simran Mittal, 2022-03-11 *How Is It Love?* is Simran's first professionally published book which explores the themes of contemporary love stories set in Indian states and Utah to the strained family ties of the modern era. The five short stories raise the issues of how family background impacts the lives of people in the long run which makes them vulnerable to violence, abuse and insecurities. Hidden in the layers of love and romance, the focus is on how love beyond gender, age and caste, self-love, and firm determination become the indispensable elements of healing others and oneself. Besides, another theme highlighted, stemming from mental health issues, is self-harm by a male character to show that men suffer too. The last story in the collection is not the representation of the usual terrorist activities that people come across in society, but it shows how some events make a teenager turn into a body thirsty for blood and vengeance.

This paper evaluates the impact of the Nutrition Improvement Program (NIP), a large-scale school meal program in rural China, on the health and nutritional status of compulsory education students aged 6-16. We use data from multiple rounds of the China Health and Nutrition Survey between 2004-2015 and implement a quasi-experimental approach exploiting cross-county variations in program implementation. We find that NIP participation is, on average, associated with a higher height-for-age z-score in the order of 0.22-0.42 standard deviations. The impacts are larger among students in a better health condition but small or not significant among the most disadvantaged. We do not observe heterogeneous effects across several individual and household characteristics. We also do not find significant effects on Body Mass Index-for-age and weight-for-age z scores. The results suggest that NIP partially improved students' health over the first years of implementation, but more support is needed to achieve broader impacts that effectively reach all vulnerable students. Several robustness checks support our findings.

"A mindful leader makes the work environment a generative social field in which compassion, connection, and creativity thrive. director of Mindsight Institute Today's leaders are grappling with the pace and complexity of change, the challenge of supporting healthy collaboration and alignment among teams, and the resulting stress and burnout. The practice of mindful leadership may be one of the most important competencies in business today if leaders are to move beyond fear, anxiety, nagging self-doubt, and the feeling of constant overwhelm. Marc Lesser has taught his proven seven-step method to leaders at Google, Genentech, SAP, Facebook, and dozens of other Fortune 500 companies for over twenty years and has distilled a lifetime of mindfulness and business experience into these chapters. This incredibly practical yet accessible book draws on Marc's experience as a CEO of three companies, as cofounder of the world-renowned Search Inside Yourself (SIY) program within Google, and as a longtime Zen practitioner. The principles in this book can be applied to leadership at any level, providing readers with the tools they need to shift awareness, enhance communication, build trust, eliminate fear and self-doubt, and minimize unnecessary workplace drama. Embracing any one of the seven practices alone can be life-changing. When used together, they support a path of well-being, productivity, and positive influence. Practicing mindful leadership will allow you to achieve results — with more energy, clarity, meaning, and connection. Your intentions and actions will be more aligned. You will accomplish more with less wasted effort. After reading this book, you'll understand why some of the world's most successful companies routinely incorporate the Seven Practices of a Mindful Leader, integrating mindfulness, emotional intelligence, and business savvy to create great corporate cultures, and even a better world.

America Ferrera has always felt wholly American, and yet, her identity is inextricably linked to her parents' homeland and Honduran culture. Speaking Spanish at home, having Saturday-morning-salsa-dance-parties in the kitchen, and eating tamales alongside apple pie at Christmas never seemed at odds with her American identity. Still, she yearned to see that identity reflected in the larger American narrative. Now, in *American Like Me*, America invites thirty-one of her friends, peers, and heroes to share their stories about life between cultures. We know them as actors, comedians, athletes, politicians, artists, and writers. However, they are also immigrants, children or grandchildren of immigrants, indigenous people, or people who otherwise grew up with deep and personal connections to more than one culture. Each of them struggled to establish a sense of self, find belonging, and feel seen. And they call themselves American enthusiastically, reluctantly, or not at all. Ranging from the heartfelt to the hilarious, their stories shine a light on a quintessentially American experience and will appeal to anyone with a complicated relationship to family, culture, and growing up.
