sapphire aesthetics and wellness: *The Sense of Beauty* George Santayana, 2002-01-01 The author of the introduction to this new edition, John McCormick, reminds us that *The Sense of Beauty* is the first work in aesthetics written in the United States. Santayana was versed in the history of his subject, from Plato and Aristotle to Schopenhauer and Taine in the nineteenth century. Santayana took as his task a complete rethinking of the idea that beauty is embedded in objects. Rather, beauty is an emotion, a value, and a sense of the good. In this aesthetics was unlike ethics: not a correction of evil or pursuit of the virtuous. Rather it is a pleasure that residues in the sense of self. The work is divided into chapters on the materials of beauty, form, and expression. A good many of Santayana's later works are presaged by this early effort. And this volume also anticipates the development of art as a movement as well as a value apart from other aspects of life.

sapphire aesthetics and wellness: Black Looks bell hooks, 2014-10-10 In the critical essays collected in *Black Looks*, bell hooks interrogates old narratives and argues for alternative ways to look at blackness, black subjectivity, and whiteness. Her focus is on spectatorship—in particular, the way blackness and black people are experienced in literature, music, television, and especially film—and her aim is to create a radical intervention into the way we talk about race and representation. As she describes: the essays in *Black Looks* are meant to challenge and unsettle, to disrupt and subvert. As students, scholars, activists, intellectuals, and any other readers who have engaged with the book since its original release in 1992 can attest, that's exactly what these pieces do.

sapphire aesthetics and wellness: The Metaphysical Book of Gems and Crystals Florence Mégemont, 2007-12-13 Details the powerful effects of gems as an alternative therapy for physical, psychological, and spiritual healing • Reveals the physical, healing, and astrological properties of over 70 minerals, along with instructions for maintaining and recharging their powers • Examines the “life” energy of stones, their basic vibratory patterns, and how this energy is used therapeutically to treat various disorders • Shows how to use gems in color therapy and to harmonize the chakras Gemstones have been used for both therapeutic and spiritual purposes since the beginning of time and in all traditions. Used properly, they can contribute to and accelerate healing through the practice of lithotherapy, which uses gems and minerals to restore enzymatic functions, and they can energize spiritual development. Alternative medicines such as homeopathy

have given prominence to the therapeutic character of certain minerals, but the use of gemstones in expanding awareness or establishing a holistic, energetic connection with the stone itself have scarcely been brought forward. In this reclaiming of ancient wisdom, Florence Mégemont explores the many potent and beneficial dimensions of the mineral world. Over 70 precious and semiprecious stones are inventoried as to their principal deposits, therapeutic applications, and zodiac correspondences. Readers will discover which physical and emotional disorders can be relieved by using which minerals and--with the application of chakra therapy--which gemstones are indispensable to their spiritual health. While not proposing that lithotherapy is a substitute for traditional allopathic treatment, Mégemont shows that it can be a powerful complement to it. Additionally, stones can act preventively, energizing both our health and spiritual resources to a state of balance and attunement.

These designs go beyond simple florals, weaving in animals, shells and other natural elements for lush, unique scenes that provide a sense of discovery. It's been proven that adult coloring books are the perfect way to de-stress, and Maggie's compositions are specifically designed to delight, engage and provide a haven of relaxation during busy days. Perforated pages and high-quality watercolor paper make it easy to display and gift personalized artwork. Maggie's stylish, imaginative pen and ink drawings will bring out everyone's inner artist.

sapphire aesthetics and wellness: *Nature Power* Anselm Adodo, OSB, 2013 When *Nature Power* was first published twelve years ago, the practice of herbal medicine in Nigeria and in most parts of Africa was identified with witchcraft, sorcery, ritualism, and all sorts of fetish practices. Because herbal medicine was associated with paganism, African Christians secretly patronize traditional healers, and the educated elite and religious figures did not want to be associated in any way with traditional African medicine. *Nature Power*, like a lonely voice in a wilderness, was written to correct the misconception that African herbal medicine is synonymous with paganism, ritualism, and fetishism. Since its publication, *Nature Power* has been reprinted more than eight times. It has contributed immensely in changing the attitudes of both the government and Christians toward the practice of herbal medicine. *Nature Power* has also helped show that health is more than an absence of disease. Health is wholeness of mind, soul, and body. Much of the information in this book is age-old secrets, which herbalists keep close to their chests. I have made them available here so that humanity may profit from them.

sapphire aesthetics and wellness: *Sacred Woman* Queen Afua, 2012-06-20 The twentieth anniversary edition of a transformative blueprint for ancestral healing—featuring new material and gateways, from the renowned herbalist, natural health expert, and healer of women's bodies and souls “This book was one of the first that helped me start practices as a young woman that focused on my body and spirit as one.”—Jada Pinkett Smith Through extraordinary meditations, affirmations, holistic healing plant-based medicine, KMT temple teachings, and The Rites of Passage guidance, Queen Afua teaches us how to love and rejoice in our bodies by spiritualizing the words we speak, the foods we eat, the relationships we attract, the spaces we live and work in, and the transcendent woman spirit we manifest. With love, wisdom, and passion, Queen Afua guides us to accept our mission and our mantle as Sacred Women—to heal ourselves, the generations of women in our families, our communities, and our world.

sapphire aesthetics and wellness: *Shapeshifters* Aimee Meredith Cox, 2015-08-07 In *Shapeshifters* Aimee Meredith Cox explores how young Black women in a Detroit homeless shelter contest stereotypes, critique their status as partial citizens, and negotiate poverty, racism, and gender violence to create and imagine lives for themselves. Based on eight years of fieldwork at the Fresh Start shelter, Cox shows how the shelter's residents—who range in age from fifteen to twenty-two—employ strategic methods she characterizes as choreography to disrupt the social

hierarchies and prescriptive narratives that work to marginalize them. Among these are dance and poetry, which residents learn in shelter workshops. These outlets for performance and self-expression, Cox shows, are key to the residents exercising their agency, while their creation of alternative family structures demands a rethinking of notions of care, protection, and love. Cox also uses these young women's experiences to tell larger stories: of Detroit's history, the Great Migration, deindustrialization, the politics of respectability, and the construction of Black girls and women as social problems. With *Shapeshifters* Cox gives a voice to young Black women who find creative and non-normative solutions to the problems that come with being young, Black, and female in America.

sapphire aesthetics and wellness: *Fashionable Technology* Sabine Seymour, 2008-05-19 The interplay of electronic textiles and wearable technology, wearables for short, and fashion, design and science is a highly promising and topical subject. Offered here is a compact survey of the theory involved and an explanation of the role technology plays in a fabric or article of clothing. The practical application is explained in detail and numerous illustrations serve as clarification. Over 50 well-known designers, research institutes, companies and artists, among them Philips, Burton, MIT Media Lab, XS Labs, New York University, Hussein Chalayan, Cute Circuit or International Fashion Machines are introduced by means of their latest, often still unpublished, project, and a survey of their work to date. Given for the first time is a list of all the relevant information on research institutes, materials, publications etc. A must for all those wishing to know everything about fashionable technology.

sapphire aesthetics and wellness: *Capitalist Realism* Mark Fisher, 2009-11-27 After 1989, capitalism has successfully presented itself as the only realistic political-economic system - a situation that the bank crisis of 2008, far from ending, actually compounded. The book analyses the development and principal features of this capitalist realism as a lived ideological framework. Using examples from politics, films, fiction, work and education, it argues that capitalist realism colours all areas of contemporary experience. But it will also show that, because of a number of inconsistencies and glitches internal to the capitalist reality program capitalism in fact is anything but realistic.

sapphire aesthetics and wellness: *What Is Syphilis?* Ursula Pang, 2021-12-15 Syphilis is more than just a disease from history books. The bad news is that STD is still around, infecting people all over the world. The good news is that it is completely treatable, especially if it's caught in the early stages. Readers will learn about the history of syphilis, as well as its stages, symptoms, and treatments. They'll learn how to deal with a diagnosis and communicate effectively to ensure their sexual health. This empowering book is a comprehensive guide to dealing with syphilis and staying smart about sex.

sapphire aesthetics and wellness: *Research into Design for a Connected World* Amaresh Chakrabarti, 2019-01-08 This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) - the largest in India in this area - written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been "Design for a Connected World". While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services.

sapphire aesthetics and wellness: *The Shape of Green* Lance Hosey, 2012-06-11 Does going green change the face of design or only its content? The first book to outline principles for the

aesthetics of sustainable design, *The Shape of Green* argues that beauty is inherent to sustainability, for how things look and feel is as important as how they're made. In addition to examining what makes something attractive or emotionally pleasing, Hosey connects these questions with practical design challenges. Can the shape of a car make it more aerodynamic and more attractive at the same time? Could buildings be constructed of porous materials that simultaneously clean the air and soothe the skin? Can cities become verdant, productive landscapes instead of wastelands of concrete? Drawing from a wealth of scientific research, Hosey demonstrates that form and image can enhance conservation, comfort, and community at every scale of design, from products to buildings to cities. Fully embracing the principles of ecology could revolutionize every aspect of design, in substance and in style. Aesthetic attraction isn't a superficial concern — it's an environmental imperative. Beauty could save the planet.

sapphire aesthetics and wellness: Difference Matters Brenda J. Allen, 2010-07-19 Allens proven ability and flare for presenting complex and oftentimes sensitive topics in nonthreatening ways carry over in the latest edition of *Difference Matters*. Her down-to-earth analysis of six social identity categories reveals how communication establishes and enacts identity and power dynamics. She provides historical overviews to show how perceptions of gender, race, social class, sexuality, ability, and age have varied throughout time and place. Allen clearly explains pertinent theoretical perspectives and illustrates those and other discussions with real-life experiences (many of which are her own). She also offers practical guidance for how to communicate difference more humanely. While many examples are from organizational contexts, readers from a wide range of backgrounds can relate to them and appreciate their relevance. This eye-opening, vibrant text, suitable for use in a variety of disciplines, motivates readers to think about valuing difference as a positive, enriching feature of society. Interactive elements such as Spotlights on Media, I.D. Checks, Tool Kits, and Reflection Matters questions awaken interest, awareness, and creative insights for change.

sapphire aesthetics and wellness: Advances in Physical Ergonomics & Human Factors Ravindra S. Goonetilleke, Waldemar Karwowski, 2018-06-25 This book reports on the state of the art in physical ergonomics and addresses the design of products, processes, services, and work systems to ensure they are productive, safe, and enjoyable for people to use. The human body's responses to physical and physiological work demands, strain injuries from repetition, vibration, force, and posture are the most common types of issues examined, along with their design implications. The book explores a wide range of topics in physical ergonomics, including the consequences of repetitive motion, materials handling, workplace safety, the usability of portable devices, design, working postures, and the work environment. Mastering physical ergonomics and safety engineering concepts is fundamental to creating products and systems that people can safely and conveniently use, as well as avoiding stresses and minimizing the risk of accidents. Based on the AHFE 2018 Conference on Physical Ergonomics and Human Factors, held on July 21-25, 2018, in Orlando, Florida, USA, this book provides readers with a comprehensive perspective on the current challenges in physical ergonomics, which is a critical aspect in the design of any human-centered technological system, and for factors influencing human performance.

sapphire aesthetics and wellness: *Bastard Out of Carolina* Dorothy Allison, 2005-09-06 A profound portrait of family dynamics in the rural South and "an essential novel" (*The New Yorker*) "As close to flawless as any reader could ask for . . . The living language [Allison] has created is as exact and innovative as the language of *To Kill a Mockingbird* and *The Catcher in the Rye*." —*The New York Times Book Review* The publication of Dorothy Allison's *Bastard Out of Carolina* was a landmark event that won the author a National Book Award nomination and launched her into the literary spotlight. Critics have likened Allison to Harper Lee, naming her the first writer of her generation to dramatize the lives and language of poor whites in the South. Since its appearance, the novel has inspired an award-winning film and has been banned from libraries and classrooms, championed by fans, and defended by critics. Greenville County, South Carolina, is a wild, lush place that is home to the Boatwright family—a tight-knit clan of rough-hewn, hard-drinking men who shoot up each other's trucks, and indomitable women who get married young and age too quickly. At the heart of this story is Ruth Anne Boatwright, known simply as Bone, a bastard child who observes the world around her with a mercilessly keen perspective. When her stepfather Daddy Glen, "cold as death, mean as a snake," becomes increasingly more vicious toward her, Bone finds herself caught in a family triangle that tests the loyalty of her mother, Anney—and leads to a final, harrowing encounter from which there can be no turning back.

sapphire aesthetics and wellness: Representations of Femininity in American Genre Cinema David Greven, 2011-04-25 The theme of female transformation informs the Hollywood representation of femininity from the studio era to the present. Whether it occurs physically, emotionally, or on some other level, transformation allows female protagonists to negotiate their own complex desires and to resist the compulsory marriage plot. A sweeping study of Hollywood from *Now, Voyager*, *The Heiress*, and *Flamingo Road* to *Carrie*, the *Alien* films, *The Brave One*, and

the slasher horror genre, this book boldly unsettles commonplace understandings of genre film, female sexuality, and Freudian theory as it makes a strong new case for the queer relevance of female representation.

sapphire aesthetics and wellness: The Planets Within Thomas Moore, 1990 The Planets Within asks us to return to antiquity with new eyes. It centers on one of the most psychological movements of the prescientific age -- Renaissance Italy, where a group of 'inner Columbuses' charted territories that still give us today a much-needed sense of who we are and where we have come from, and the right routes to take toward fertile and unexplored places. Chief among these masters of the interior life was Marsilio Ficino, presiding genius of the Florentine Academy, who taught that all things exist in soul and must be lived in its light. This study of Ficino broadens and deepens our understanding of psyche, for Ficino was a doctor of soul, and his insights teach us the care and nurture of soul. Moore takes as his guide Ficino's own fundamental tool -- imagination. Respecting the integrity and autonomy of images, The Planets Within unfolds a poetics of soul in a kind of dialogue between the laconic remarks of Ficino and the need to give these remarks a life and context for our day.

sapphire aesthetics and wellness: Infoquake David Louis Edelman, 2019-07-22 Natch is a master of bio/logics, the programming of the human body. He's clawed and scraped his way to the top of the bio/logics market using little more than his wits. Now his sudden notoriety has brought him to the attention of Margaret Surina, the owner of a mysterious new technology called MultiReal. Only by enlisting Natch's devious mind can Margaret keep MultiReal out of the hands of High Executive Len Borda and his ruthless armies. To fend off the intricate net of enemies closing in around him, Natch and his apprentices must accomplish the impossible. They must understand this strange new technology, run through the product development cycle, and prepare MultiReal for release to the public—all in three days. Meanwhile, hanging over everything is the spectre of the infoquake, a lethal burst of energy that's disrupting the bio/logic networks and threatening to send the world crashing back into the Dark Ages. Book 1 in the Jump 225 Series. About the Jump 225 Series: ". . . novels chockfull of ideas . . ."—Orson Scott Card "Infoquake is a stunning debut novel by a lucid, precise, and talented new voice in the genre."—SSF World "Edelman has managed to capture the mania and obsession of internet moguls nicely."—SF Revu Praise for Infoquake: "Slick high-finance melodrama and dizzying technical speculation lift Edelman's SF debut. . . . Bursting with invention and panache, this novel will hook readers for the story's next installment."—Publishers Weekly "INFOQUAKE should appeal to just about any SF reader, but if you like Herbert's Dune or any of Stross' work, you should really enjoy this book." —SF Signal Praise for MultiReal: "Edelman brings fresh air to the technological thriller. . . . MultiReal itself is firmly established as one of the most fascinating singularity technologies in years." —Publishers Weekly "Once you realize that Natch is less Neo than he is Steve Jobs, you're in for a swell ride." —Sci-Fi Weekly Praise for Geosynchron: "This smart, idiosyncratic blend of cyberpunk, libertarian

entrepreneurship, and social engineering will, I think, stand as a seminal work of 21st century SF.” —Locus “Takes the series one level higher, beyond mundanity to true sense-of-wonder SF, so it finally plays on the level of the masters of modern SF.” —Fantasy Book Critic At the publisher's request, this title is sold without DRM (Digital Rights Management).
