services offered by root cause integrative wellness: Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

services offered by root cause integrative wellness: The Immunotype Breakthrough Heather Moday, 2021-12-21 A respected immunologist, allergist, and functional medicine doctor breaks down the latest science on immunity, offering “the most important guide available” (Mark Hyman, MD) to balancing your system for optimal health and longevity. To most of us, the immune system is seemingly unknowable—it's an invisible, complex network of cells, receptors, and messengers, and there's no standard way to see if it's functioning as it should. Yet in spite of this, it affects every aspect of our health, influencing (and sometimes even causing) nearly every disease known to humanity. Much has been made about “boosting” immunity, but what exactly does that mean, and what if boosting isn't really what your unique system needs? In *The Immunotype Breakthrough*, Dr. Heather Moday explains that for most, immune system balance is key. Drawing on a wealth of cutting edge research and fascinating case studies, Dr. Moday explains that the immune system is fluid and significantly influenced by our behaviors, diet, habits, and environment. She identifies four primary Immunotypes—Smoldering, Weak, Hyperactive, and Misguided—that underlie the immune imbalances that commonly lead to disease, chronic inflammation, infection, allergies, and autoimmunity. By identifying your personal immunotype—where you fall on this immunity spectrum—you can intervene by making focused, individualized, natural lifestyle changes to ensure it functions optimally. Featuring engaging and accessible science, practical and customizable takeaways, and interactive quizzes to help you zero in on your specific needs, *The Immunotype Breakthrough* is a revolutionary program for creating an individualized lifestyle and diet that will lead to immune resilience, vitality, and longevity.

services offered by root cause integrative wellness: Total Recovery Gary Kaplan, 2014-05-06 About 100 million Americans live with some form of chronic pain—more than the combined number who suffer from diabetes, heart disease, and cancer. But chronic pain has always been a mystery. It often returns at the slightest provocation, even when doctors can't find anything wrong. Oddly enough, whether the pain is physical or emotional, traumatic or slight, our brains register all pain as the same thing, and these signals can keep firing in the nervous system for months, even years. In *Total Recovery*, Dr. Gary Kaplan argues that we've been thinking about disease all wrong. Drawing on dramatic patient stories and cutting-edge research, the book reveals that chronic physical and emotional pain are two sides of the same coin. New discoveries show that disease is not the result of a single event but an accumulation of traumas. Every injury, every infection, every toxin, and every emotional blow generates the same reaction: inflammation, activated by tiny cells in the brain, called microglia. Turned on too often from too many assaults, it can have a devastating cumulative effect. Conventional treatment for these conditions is focused on symptoms, not causes, and can leave patients locked into a lifetime of pain and suffering. Dr. Kaplan's unified theory of chronic pain and depression helps us understand not only the cause of these conditions but also the issues we must address to create a pathway to healing. With this revolutionary new framework in place, we have been given the keys to recover.

services offered by root cause integrative wellness: Mind the Science Jonathan N. Stea, PhD, 2024-09-03 A clinical psychologist who regularly deals with some of society's most vulnerable exposes and debunks the predatory pseudoscience and grift of the multi-trillion-dollar wellness industry and points us towards a better way to take care of our mental health. Can the unbroken gaze of a lone man on a stage in front of hundreds of people truly alleviate their mental distress? Can Berlin Wall pills or a coffee enema cure depression? Can we improve our mental health with past-life regression therapy, cold-water shock therapy, rebirthing therapy? Wellness grifters and alternative-health snake oil salesmen are everywhere these days, and when our medical systems are under stress (and we are, too!) these costly purveyors of false hope are worse than a waste of money—they can lead us to delay badly needed care from real professionals, exacerbate our conditions and, in the most tragic of cases, even kill us. Today, people looking to care for their mental health face a market with at least 600 "brands" of psychotherapy—and counting. Most are ineffective, and many could be harmful. There exist countless unregulated providers of mental health services in the \$5.6 trillion USD wellness industry and alternative medicine community looking to exploit people's financial and emotional vulnerabilities. The world of mental health care is very much caveat emptor: buyer beware. Having seen so many of his patients hurt by the pseudoscience circulating in the industry, Dr. Jonathan N. Stea is on a mission to expose its harm and protect the public from mental health misinformation. In a landscape of rampant burnout and at a time when mental health concerns are at a fever pitch, Mind the Science provides hope and real

information to those who have been touched by mental illness, have been misled by false marketing, or are simply curious about the relationship between science and mental health.

services offered by root cause integrative wellness: *The Cancer Revolution* Leigh Erin Connealy, 2018-07-17 Integrative health pioneer offers her groundbreaking approach to treating (and preventing) cancer, based on 6 Revolutionary Findings, with a practical program and strategies. When it comes to cancer, conventional doctors are trained to treat their patients exclusively with surgery, radiation, and chemotherapy. These methods are grueling on the whole body--and they don't treat beyond the tumor or the cancer itself. The focus is on the disease, not the whole person--and because of this, the outcomes in conventional medicine can be bleak. But it doesn't have to be this way. Dr. Leigh Erin Connealy has developed a whole-person approach to treating cancer--and these treatments have helped thousands of patients through her Cancer Center for Healing. In *The Cancer Revolution*, Dr. Connealy shows you how to get to the root causes of cancer and the practical steps you can take to get back on the path to healing--from balancing your body's chemistry with nutritional supplements, following a healthy food plan, detoxifying your body and home, exercising regularly, getting deep restful sleep every night, practicing stress reduction techniques, and putting together a supportive healing team. Chemotherapy and radiation have their place in treatment, but in many cases, they are simply not enough, because cancer isn't caused by one thing, but by many different factors. All of these causes must be addressed, not just the tumor. *The Cancer Revolution* will equip you to make impactful, achievable lifestyle choices that fight the root of the disease, and that offer hope for recovery and a cancer-free life.

services offered by root cause integrative wellness: *Integrative Cardiology* Stephen Devries, James E. Dalen, 2011-02-03 Integrative Cardiology is an exploration of a new and much-needed perspective in cardiac care: the intelligent synthesis of conventional medicine with alternative approaches not typically part of Western medical curriculum. More than a blending of two approaches, this new perspective in cardiology highlights specific gaps in conventional heart care, and examines how alternative approaches may be ideally suited to address these missed opportunities. Cardiology is an ideal specialty for an integrative approach. Heart disease is largely preventable. The influence of nutrition, physical activity, metabolic factors, and emotional state on heart health is unmistakable, and the wide-angle lens of integrative medicine is an ideal model to address these multi-faceted needs. Most importantly, the focus of this work is directed at prevention. The approaches described in this book emphasize collaboration of the patient and health care provider--both seeking to obtain the best possible outcome taking into account the intangible, but vital, nuances of the patient's culture, beliefs, and preferences. The first section in this book describes the core elements of integrative cardiology, beginning with nutrition. Foundational

chapters that follow include exercise, botanicals, aspirin, metabolic cardiology, acupuncture, spirituality, mind/body approaches, and energy medicine. Contributing authors, all of whom have a background in academic medicine, share the approaches they have found most effective in their own practices, referencing their work with the best scientific evidence available.

services offered by root cause integrative wellness: Complementary and Alternative Medicine in the United States Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on the Use of Complementary and Alternative Medicine by the American Public, 2005-04-13 Integration of complementary and alternative medicine therapies (CAM) with conventional medicine is occurring in hospitals and physicians offices, health maintenance organizations (HMOs) are covering CAM therapies, insurance coverage for CAM is increasing, and integrative medicine centers and clinics are being established, many with close ties to medical schools and teaching hospitals. In determining what care to provide, the goal should be comprehensive care that uses the best scientific evidence available regarding benefits and harm, encourages a focus on healing, recognizes the importance of compassion and caring, emphasizes the centrality of relationship-based care, encourages patients to share in decision making about therapeutic options, and promotes choices in care that can include complementary therapies where appropriate. Numerous approaches to delivering integrative medicine have evolved. Complementary and Alternative Medicine in the United States identifies an urgent need for health systems research that focuses on identifying the elements of these models, the outcomes of care delivered in these models, and whether these models are cost-effective when compared to conventional practice settings. It outlines areas of research in convention and CAM therapies, ways of integrating these therapies, development of curriculum that provides further education to health professionals, and an amendment of the Dietary Supplement Health and Education Act to improve quality, accurate labeling, research into use of supplements, incentives for privately funded research into their efficacy, and consumer protection against all potential hazards.

services offered by root cause integrative wellness: The Future of Nursing 2020-2030

National Academies of Sciences Engineering and Medicine, Committee on the Future of Nursing 2020-2030, 2021-09-30 The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by The Future of Nursing: Leading Change, Advancing Health (2011) report.

services offered by root cause integrative wellness: Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Pain Management and Regulatory Strategies to Address Prescription Opioid Abuse, 2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
