sevier county wellness clinic: Channel Kindness: Stories of Kindness and Community
Born This Way Foundation Reporters, Lady Gaga, 2020-09-22 A New York Times Bestseller For Lady Gaga, kindness is the driving force behind everything she says and does. The quiet power of kindness can change the way we view one another, our communities, and even ourselves. She embodies this mission, and through her work, brings more kindness into our world every single day. Lady Gaga has always believed in the importance of being yourself, being kind to yourself, and being kind to others, no matter who they are or where they come from. With that sentiment in mind, she and her mother, Cynthia Germanotta, founded Born This Way Foundation, a nonprofit organization dedicated to making the world a kinder and braver place. Through the years, they've collected stories of kindness, bravery and resilience from young people all over the world, proving that kindness truly is the universal language. And now, we invite you to read these stories and follow along as each and every young author finds their voice just as Lady Gaga has found hers. Within these pages, you'll meet young changemakers who found their inner strength, who prevailed in the face of bullies, who started their own social movements, who decided to break through the mental health stigma and share how they felt, who created safe spaces for LGBTQ+ youth, and who have embraced kindness with every fiber of their being by helping others without the expectation of anything in return. In one story, you'll read about a young person with an autoimmune disease, who after being bullied at school, learned how to practice self-love and started an organization with the mission of educating others about the importance of self-love, too; and in another story, you'll meet a young person who decided to start a movement to help eliminate the stigma surrounding mental health and encouraged others to talk about their feelings openly and honestly, a reminder that kindness and mental wellness go hand in hand. Not only were we moved by these individual acts of kindness, but we were also touched by the many stories of organizations, neighborhoods, and entire communities that fully dedicated themselves to helping those in need and found new, innovative ways to make our world a kinder and braver place. Individually and collectively, these stories prove that kindness not only saves lives but builds community. Kindness is inclusion, it is pride, it is empathy, it is compassion, it is self-respect and it is the guiding light to love. Kindness is always transformational, and its never-ending ripples result in even more kind acts that can change our lives, our communities, and our world.

sevier county wellness clinic: Registries for Evaluating Patient Outcomes Agency for Healthcare Research and Quality/AHRQ, 2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or

exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

sevier county wellness clinic: *Strongmen: Mussolini to the Present* Ruth Ben-Ghiat, 2020-11-10 What modern authoritarian leaders have in common (and how they can be stopped). Ruth Ben-Ghiat is the expert on the strongman playbook employed by authoritarian demagogues from Mussolini to Putin—enabling her to predict with uncanny accuracy the recent experience in America and Europe. In *Strongmen*, she lays bare the blueprint these leaders have followed over the past 100 years, and empowers us to recognize, resist, and prevent their disastrous rule in the future. For ours is the age of authoritarian rulers: self-proclaimed saviors of the nation who evade accountability while robbing their people of truth, treasure, and the protections of democracy. They promise law and order, then legitimize lawbreaking by financial, sexual, and other predators. They use masculinity as a symbol of strength and a political weapon. Taking what you want, and getting away with it, becomes proof of male authority. They use propaganda, corruption, and violence to stay in power. Vladimir Putin and Mobutu Sese Seko's kleptocracies, Augusto Pinochet's torture

sites, Benito Mussolini and Muammar Gaddafi's systems of sexual exploitation, and Silvio Berlusconi and Donald Trump's relentless misinformation: all show how authoritarian rule, far from ensuring stability, is marked by destructive chaos. No other type of leader is so transparent about prioritizing self-interest over the public good. As one country after another has discovered, the strongman is at his worst when true guidance is most needed by his country. Recounting the acts of solidarity and dignity that have undone strongmen over the past 100 years, Ben-Ghiat makes vividly clear that only by seeing the strongman for what he is—and by valuing one another as he is unable to do—can we stop him, now and in the future.

sevier county wellness clinic: *From the Seeds of Sadness* Gemma M. Geisman, 2009-05-20 It all began when the Geismans son, Mike, was born with numerous fractures, some of which had occurred in the womb before birth. The cause was osteogenesis imperfecta (OI), a genetic disorder that, at the time, was thought to be so rare that the only information the delivering physician could provide was a brief description in a medical textbook. Wanting to share their story about living with this rare disorder, Gemma recounts Mikes life experiences, from his birth to his growing up years, describing with candid detail how caring for Mike was like handling an extremely fragile china doll. She illustrates the difficulties of the lonely, early years, the ambivalent and upsetting feelings and the reluctance to let go as Mike struggled to live a normal and independent life. Believing that her familys experiences with the disease were too valuable not to be shared, Gemma tells of her attempts to get her story published, breaking through finally with a story and two follow-up pieces in Redbook magazine. Gemma also shares how she established, together with other parents, the Osteogenesis Imperfecta Foundation (OIF), the only national organization that sponsors research and serves families affected by OI. *From the Seeds of Sadness* is a poignant story of unconditional love, of joys and sorrows, and of lessons learned. It recounts the Geisman familys journey through the complexities of raising a breakable baby, how they conquered fear and anguish and turned what they thought to be an agonizing burden into a gift of hope for generations to come. Heart wrenching but inspiring, this memoir is a symbol of courage and hope for others who are facing the difficult challenges of raising a child with an incurable illness

sevier county wellness clinic: *The Future of Nursing 2020-2030* National Academies of Sciences Engineering and Medicine, Committee on the Future of Nursing 2020-2030, 2021-09-30 The decade ahead will test the nation's nearly 4 million nurses in new and complex ways. Nurses live and work at the intersection of health, education, and communities. Nurses work in a wide array of settings and practice at a range of professional levels. They are often the first and most frequent line of contact with people of all backgrounds and experiences seeking care and they represent the largest of the health care professions. A nation cannot fully thrive until everyone - no matter who they are, where they live, or how much money they make - can live their healthiest possible life, and helping people live their healthiest life is and has always been the essential role of nurses. Nurses have a critical role to play in achieving the goal of health equity, but they need robust education, supportive work environments, and autonomy. Accordingly, at the request of the Robert Wood Johnson Foundation, on behalf of the National Academy of Medicine, an ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine conducted a study aimed at envisioning and charting a path forward for the nursing profession to help reduce inequities in people's ability to achieve their full health potential. The ultimate goal is the

achievement of health equity in the United States built on strengthened nursing capacity and expertise. By leveraging these attributes, nursing will help to create and contribute comprehensively to equitable public health and health care systems that are designed to work for everyone. The Future of Nursing 2020-2030: Charting a Path to Achieve Health Equity explores how nurses can work to reduce health disparities and promote equity, while keeping costs at bay, utilizing technology, and maintaining patient and family-focused care into 2030. This work builds on the foundation set out by The Future of Nursing: Leading Change, Advancing Health (2011) report.
