surterra wellness north port: Grass Roots Emily Dufton, 2017-12-05 How earnest hippies, frightened parents, suffering patients, and other ordinary Americans went to war over marijuana In the last five years, eight states have legalized recreational marijuana. To many, continued progress seems certain. But pot was on a similar trajectory forty years ago, only to encounter a fierce backlash. In *Grass Roots*, historian Emily Dufton tells the remarkable story of marijuana's crooked path from acceptance to demonization and back again, and of the thousands of grassroots activists who made changing marijuana laws their life's work. During the 1970s, pro-pot campaigners with roots in the counterculture secured the drug's decriminalization in a dozen states. Soon, though, concerned parents began to mobilize; finding a champion in Nancy Reagan, they transformed pot into a national scourge and helped to pave the way for an aggressive war on drugs. Chastened marijuana advocates retooled their message, promoting pot as a medical necessity and eventually declaring legalization a matter of racial justice. For the moment, these activists are succeeding -- but marijuana's history suggests how swiftly another counterrevolution could unfold.

surterra wellness north port: Buying Gay David K. Johnson, 2019-03-12 In 1951, a new type of publication appeared on newsstands—the physique magazine produced by and for gay men. For many men growing up in the 1950s and 1960s, these magazines and their images and illustrations of nearly naked men, as well as articles, letters from readers, and advertisements, served as an initiation into gay culture. The publishers behind them were part of a wider world of “physique entrepreneurs”: men as well as women who ran photography studios, mail-order catalogs, pen-pal services, book clubs, and niche advertising for gay audiences. Such businesses have often been seen

as peripheral to the gay political movement. In this book, David K. Johnson shows how gay commerce was not a byproduct but rather an important catalyst for the gay rights movement. Offering a vivid look into the lives of physique entrepreneurs and their customers, and presenting a wealth of illustrations, *Buying Gay* explores the connections—and tensions—between the market and the movement. With circulation rates many times higher than the openly political “homophile” magazines, physique magazines were the largest gay media outlets of their time. This network of producers and consumers helped foster a gay community and upend censorship laws, paving the way for open expression. Physique entrepreneurs were at the center of legal struggles, especially against the U.S. Post Office, including the court victory that allowed full-frontal male nudity and open homoeroticism. *Buying Gay* reconceives the history of the gay rights movement and shows how consumer culture helped create community and a site for resistance.

surterra wellness north port: *Organized Innovation* Steven C. Currall, Ed Frauenheim, Sara Jansen Perry, Emily M. Hunter, 2014-01-07 Organized and innovation are words rarely heard together. But an organized approach to innovation is precisely what America needs today. This book presents a blueprint for coordinating technology breakthroughs to advance America's global competitiveness and prosperity. That prosperity is at risk. As other nations bolster technology innovation efforts, America's research, development, and commercialization enterprise is falling behind. An innovation gap has emerged in recent decades, where US universities focus on basic research and industry concentrates on incremental product development. The country has failed to address the innovation gap because of three myths--innovation is about lone geniuses, the free market, and serendipity. These myths blind us from recognizing our dysfunctional system of unorganized innovation. In *Organized Innovation*, Currall, Frauenheim, Perry and Hunter provide a framework for optimizing the way America creates, develops, and commercializes technology breakthroughs. A roadmap for universities, business, and government, the book is grounded in the authors' seminal study of the National Science Foundation's Engineering Research Center program, which has returned to the US economy more than ten times the funding invested in it. For too long, our approach to technology innovation has been unorganized. The authors enable us to turn the page. They show us how to organize innovation for a more prosperous, hopeful future.

surterra wellness north port: *The Last Madam* Chris Wiltz, 2014-07-01 The "raunchy, hilarious, and thrilling" true story of the incomparable Norma Wallace, proprietor of a notorious 1920s New Orleans brothel (NPR). Norma Wallace grew up fast. In 1916, at fifteen years old, she went to work as a streetwalker in New Orleans' French Quarter. By the 1920s, she was a "landlady"—or, more precisely, the madam of what became one of the city's most lavish brothels. It was frequented by politicians, movie stars, gangsters, and even the notoriously corrupt police force. But Wallace acquired more than just repeat customers. There were friends, lovers . . . and also enemies. Wallace's romantic interests ran the gamut from a bootlegger who shot her during a fight to a famed bandleader to the boy next door, thirty-nine years her junior, who became her fifth husband. She knew all of the Crescent City's dirty little secrets, and used them to protect her own interests—she never got so much as a traffic ticket, until the early 1960s, when District Attorney Jim Garrison decided to clean up vice and corruption. After a jail stay, Wallace went legitimate as successfully as she had gone criminal, with a lucrative restaurant business—but it was love that would undo her in the end. *The Last Madam* combines original research with Wallace's personal memoirs, bringing to life an era in New Orleans history rife with charm and decadence, resurrecting "a secret world, like those uncovered by Luc Sante and James Ellroy" (Publishers Weekly). It reveals the colorful, unforgettable woman who reigned as an underworld queen and "capture[s] perfectly the essential, earthy complexity of the most fascinating city on this continent" (Robert Olen Butler).

Cordell, 2016-08-01 At the outbreak of the Civil War, nearly everybody was caught up in patriotic fervor—men and women, Union and Confederate. Disguised as a white male soldier, she put the fear of Hell into Confederate enemies. Mary Carroll, a Missouri rebel, forged a copy of a jail cell key to break her brother out before his scheduled execution. These and other little-known stories are told through gripping narrative, primary source documents, and contextualizing sidebars.
