veraldi hair beauty wellness: Not Just a Pretty Face Stacy Malkan, 2007-10-01 Lead in lipstick? 1,4 dioxane in baby soap? Coal tar in shampoo? How is this possible? Simple. The \$35 billion cosmetics industry is so powerful that they've kept themselves unregulated for decades. Not one cosmetic product has to be approved by the US Food and Drug Administration before hitting the market. Incredible? Consider this: The European Union has banned more than 1,100 chemicals from cosmetics. The United States has banned just 10. Only 11% of chemicals used in cosmetics in the US have been assessed for health and safety - leaving a staggering 89% with unknown or undisclosed effects. More than 70% of all personal care products may contain phthalates, which are linked to birth defects and infertility. Many baby soaps are contaminated with the cancer-causing chemical 1,4 dioxane. It's not just women who are affected by this chemists' brew. Shampoo, deodorant, face lotion and other products used daily by men, women and children contain hazardous chemicals that the industry claims are within acceptable limits. But there's nothing acceptable about daily multiple exposures to carcinogenic chemicals -- from products that are supposed to make us feel healthy and beautiful. Not Just a Pretty Face delves deeply into the dark side of the beauty industry, and looks to hopeful solutions for a healthier future. This scathing investigation peels away less-than-lovely layers to expose an industry in dire need of an extreme makeover. 15 percent of the purchase price of each book sold benefits the national Campaign for Safe Cosmetics, administered by the Breast Cancer Fund, through December 31, 2012.

veraldi hair beauty wellness: Textbook of Complementary and Alternative Medicine Chun-Su Yuan, Eric J. Bieber, 2003-02-11 The popularity of complementary and alternative medicine (CAM) has risen sharply in the last decade. This consumer driven movement affects all specialities of conventional medicine and can influence the decision-making process and practice of primary care physicians. It is critical for today's medical professionals to be familiar with the potential benefits, adverse effects, and interactions of different CAM therapies. Textbook of Complementary and Alternative Medicine presents a sound academic understanding of the healing therapies, approaches, and systems of CAM. The editors take a two-pronged approach to the subject. They discuss the underlying principles and their relevance to conventional medicine and provide in-depth information on specific therapies for common medical conditions. The book focuses on the CAM therapies most often used and therefore, most likely to effect a physician's practice. There are a number of CAM books available. However, most of authors of these books are CAM practitioners, neuropathic physicians, or both. This book is unique in that the contributors are academic physicians and other mainstream professionals. Thoroughly referenced, Textbook of Complementary and Alternative Medicine is a science-based guide to the wide range of herbal and other CAM therapies and to understanding their application to human health and their interaction with conventional medicine.

The conversation takes the reader to a medieval town high up in the mountains where time is told by the shadow the sun casts, where wheat and olive oil are the currency of choice (barter is in use), and where marriage is as much about property as it is about love. As they re-create that vanished world, the pair finds greater understanding of the tumultuous relationships that sometimes exist between immigrant mothers and their children.

In order to understand why particular organisms are able to colonise an anatomical region and why the resulting microbial community has a particular composition, an ecological approach is essential. Consequently, the key anatomical and physiological characteristics of each body site are described throughout the book. The crucial roles of the indigenous microbiota in protecting against exogenous pathogens, regulating the development of our immune system and mucosae, and providing nutrients are also discussed. The involvement of these organisms in infections of healthy and debilitated individuals are discussed throughout and methods of manipulating the composition of the indigenous microbiota for the benefit of human health are also described.

In 2013 Evan Spiegel, the brash CEO of the social network Snapchat, and his co-founder Bobby Murphy stunned the press when they walked away from a three-billion-dollar offer from Facebook: how could an app teenagers use to text dirty photos dream of a higher valuation? Was this hubris, or genius? In *How to Turn Down a Billion Dollars*, tech journalist Billy Gallagher takes us inside the rise of one of Silicon Valley's hottest start-ups. Snapchat developed from a simple wish for disappearing pictures as Stanford junior Reggie Brown nursed regrets about photos he had sent. After an epic feud between best friends, Brown lost his stake in the company, while Spiegel has gone on to make a name for himself as a visionary—if ruthless—CEO worth billions, linked to celebrities like Taylor Swift and his wife, Miranda Kerr. A fellow Stanford undergrad and fraternity brother of the company's founding trio, Gallagher has covered Snapchat from the start. He brings unique access to a company Bloomberg Business called “a cipher in the Silicon Valley technology community.” Gallagher offers insight into challenges Snapchat faces as it transitions from a playful app to one of the tech industry's preeminent public companies. In the tradition of great business narratives, *How to Turn Down a Billion Dollars* offers the definitive account of a company whose goal is no less than to remake the future of entertainment.

veraldi hair beauty wellness: Historical Narratives of East Asia in the 21st Century

Hitoshi Tanaka, 2020-03-17 In the twenty-first century, East Asia has been increasingly marked both by tensions at a government level and a chauvinistic mood among the polity. While China's rise is in one respect the proximate driver of these changes in tone, it draws on a range of unresolved grievances among the respective historical narratives of Mainland China, Taiwan, Japan and the Koreas. These conflicting views of the region's past are a crucial barrier to its cohesive and stable future. This book brings together East Asian scholars from a range of academic disciplines, including China historians, political historians and political scientists to illuminate the interconnectedness of East Asia and discuss how a shared historical narrative might be constructed. Their contributions are organised into 3 parts focusing respectively on historical narratives of China, historical narratives of East Asia, and reconciling historical narratives. veraldi hair beauty wellness: Vulnerable Colleen M. Flood, Vanessa MacDonnell, Jane Philpott, Sophie Thériault, Sridhar Venkatapuram, 2020-07-14 The novel coronavirus SARS-CoV-2, which causes the disease known as COVID-19, has infected people in 212 countries so far and on every continent except Antarctica. Vast changes to our home lives, social interactions, government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited, multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences, along with the legal, ethical and policy responses. These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance and legal structures; and vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will forces us to deeply reflect on how we govern and our policy priorities; to focus preparedness, precaution, and recovery to include all, not just some. Published in English with some chapters in French.
