wellness camps for women: Crimes Unspoken Miriam Gebhardt, 2016-12-20 The soldiers who occupied Germany after the Second World War were not only liberators: they also brought with them a new threat, as women throughout the country became victims of sexual violence. In this disturbing and carefully researched book, the historian Miriam Gebhardt reveals for the first time the scale of this human tragedy, which continued long after the hostilities had ended. Discussion in recent years of the rape of German women committed at the end of the war has focused almost exclusively on the crimes committed by Soviet soldiers, but Gebhardt shows that this picture is misleading. Crimes were committed as much by the Western Allies - American, French and British - as by the members of the Red Army. Nor was the suffering limited to the immediate aftermath of the war. Gebhardt powerfully recounts how raped women continued to be the victims of doctors, who arbitrarily granted or refused abortions, welfare workers, who put pregnant women in homes, and wider society, which even today prefers to ignore these crimes. Crimes Unspoken is the first historical account to expose the true extent of sexual violence in Germany at the end of the war,

offering valuable new insight into a key period of 20th century history.

wellness camps for women: Little Flower Yoga for Kids Jennifer Cohen Harper, 2013-11-01 Wouldn't it be great if your child could exercise, have fun, and build concentration skills all at the same time? In 2006, the Little Flower Yoga program was developed by teacher and certified yoga instructor Jennifer Cohen Harper, when her successful use of yoga in her kindergarten classroom led to requests by other students, teachers, and administrators for yoga programs of their own. Harper slowly began to teach more and more yoga classes, and eventually recruited other yoga teachers with education backgrounds to continue growing what had become a flourishing program. Little Flower Yoga for Kids offers this fun and unique program combining yoga and mindfulness in an easy-to-read format. Written specifically for parents and kids, the book aims at teaching children to pay attention, increase focus, and balance their emotions—all while building physical strength and flexibility. Based on a growing body of evidence that yoga and mindfulness practices can help children develop focus and concentration, the simple yoga exercises in this book can easily be integrated into their child's daily routine, ultimately improving health, behavior, and even school achievement. The book details the five main components of the program: connect, breath, move, focus, and relax. Drawing on these components, Harper shares practical activities that parents can use with their children both on a daily basis and as applied to particularly challenging issues. And while this book is targeted to parents, teachers may also find it extremely useful in helping students achieve better attention and focus. For more information about this innovative program, visit www.littlefloweryoga.com.

wellness camps for women: Inner Engineering Sadhguru, 2016-09-20 NEW YORK TIMES BESTSELLER • Thought leader, visionary, philanthropist, mystic, and yogi Sadhguru presents Western readers with a time-tested path to achieving absolute well-being: the classical science of yoga. "A loving invitation to live our best lives and a profound reassurance of why and how we can."—Sir Ken Robinson, author of *The Element*, *Finding Your Element*, and *Out of Our Minds: Learning to Be Creative* NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY SPIRITUALITY & HEALTH The practice of hatha yoga, as we commonly know it, is but one of eight branches of the body of knowledge that is yoga. In fact, yoga is a sophisticated system of self-empowerment that is capable of harnessing and activating inner energies in such a way that your body and mind function at their optimal capacity. It is a means to create inner situations exactly the way you want them, turning you into the architect of your own joy. A yogi lives life in this expansive state, and in this transformative book Sadhguru tells the story of his own awakening, from a boy with an unusual affinity for the natural world to a young daredevil who crossed the Indian continent on his motorcycle. He relates the moment of his enlightenment on a mountaintop in southern India, where time stood still and he emerged radically changed. Today, as the founder of Isha, an organization devoted to humanitarian causes, he lights the path for millions. The term guru, he notes, means "dispeller of darkness, someone who opens the door for you. . . . As a guru, I have no doctrine to teach, no philosophy to impart, no belief to propagate. And that is because the only solution for all the ills that plague humanity is self-transformation. Self-transformation means that nothing of the old remains. It is a dimensional shift in the way you perceive and experience life." The wisdom

distilled in this accessible, profound, and engaging book offers readers time-tested tools that are fresh, alive, and radiantly new. Inner Engineering presents a revolutionary way of thinking about our agency and our humanity and the opportunity to achieve nothing less than a life of joy.

wellness camps for women: Sanatoriums of New Mexico Richard Melzer, 2014 Tuberculosis, also known as consumption, the White Plague, or simply TB, was the number-one killer in the United States in the late 19th and early 20th centuries. Many physicians of the era advised their patients to chase the cure for tuberculosis in the Southwest, where the regions clean, dry, fresh air, high altitude, and sunshine offered relief for most and recovery for some. New Mexico, called the well country, was particularly eager to promote itself as a mecca for lungers with the coming of the railroad to the territory in 1880 and the creation of many new hospitals, known as sanitariums or sanatoriums (sans), which specialized in the treatment of TB. This is a brief history of New Mexico sans, their patients, and the doctors, nurses, and staff who served them during the golden age of the TB industry, from the turn of the 20th century to the eve of World War II.--

wellness camps for women: Wisdom at Work Chip Conley, 2018-09-18 Experience is making

a comeback. Learn how to repurpose your wisdom. At age 52, after selling the company he founded and ran as CEO for 24 years, rebel boutique hotelier Chip Conley was looking at an open horizon in midlife. Then he received a call from the young founders of Airbnb, asking him to help grow their disruptive start-up into a global hospitality giant. He had the industry experience, but Conley was lacking in the digital fluency of his 20-something colleagues. He didn't write code, or have an Uber or Lyft app on his phone, was twice the age of the average Airbnb employee, and would be reporting to a CEO young enough to be his son. Conley quickly discovered that while he'd been hired as a teacher and mentor, he was also in many ways a student and intern. What emerged is the secret to thriving as a mid-life worker: learning to marry wisdom and experience with curiosity, a beginner's mind, and a willingness to evolve, all hallmarks of the Modern Elder. In a world that venerates the new, bright, and shiny, many of us are left feeling invisible, undervalued, and threatened by the digital natives nipping at our heels. But Conley argues that experience is on the brink of a comeback. Because at a time when power is shifting younger, companies are finally waking up to the value of the humility, emotional intelligence, and wisdom that come with age. And while digital skills might have only the shelf life of the latest fad or gadget, the human skills that mid-career workers possess--like good judgment, specialized knowledge, and the ability to collaborate and coach - never expire. Part manifesto and part playbook, *Wisdom@Work* ignites an urgent conversation about ageism in the workplace, calling on us to treat age as we would other type of diversity. In the process, Conley liberates the term elder from the stigma of elderly, and inspires us to embrace wisdom as a path to growing whole, not old. Whether you've been forced to make a mid-career change, are choosing to work past retirement age, or are struggling to keep up with the millennials rising up the ranks, *Wisdom@Work* will help you write your next chapter.

wellness camps for women: Ultramarathon Man Dean Karnazes, 2006-03-02 In one of his most ambitious physical efforts to date, Dean Karnazes attempted to run 50 marathons, in 50 states, in 50 days to raise awareness of youth obesity and urge Americans of all fitness levels to take that next step. *UltraMarathon Man: 50 Marathons - 50 States - 50 Days*, a Journeyfilm documentary, follows Dean's incredible step-by-step journey across the country. Ultrarunning legend Dean Karnazes has run 262 miles-the equivalent of ten marathons-without rest. He has run over mountains, across Death Valley, and to the South Pole-and is probably the first person to eat an entire pizza while running. With an insight, candor, and humor rarely seen in sports memoirs (and written without the aid of a ghostwriter or cowriter), *Ultramarathon Man* has inspired tens of thousands of people-nonrunners and runners alike-to push themselves beyond their comfort zones and be reminded of what it feels like to be truly alive, says Sam Fussell, author of *Muscle*. *Ultramarathon Man* answers the questions Karnazes is continually asked: - Why do you do it? - How do you do it? - Are you insane? And in the new paperback edition, Karnazes answers the two questions he was most asked on his book tour: - What, exactly, do you eat? - How do you train to stay in such good shape?

wellness camps for women: *Chi Nei Tsang* Mantak Chia, 2006-12-26 An ancient Taoist system for detoxifying and rejuvenating the internal organs • Presents techniques to clear blockages in the body's energy flow • Includes illustrated exercises to relieve common ailments, revitalize the organs, and enable readers to take charge of their own health and well-being • Focuses on the navel center, where negative emotions, stress, and illness accumulate The techniques of Chi Nei Tsang evolved in Asia during an era when few physicians were available and people had to know how to heal themselves. Many people today have symptoms that modern medicine is not able to cure because a physical source for the problem is not easily found. The energies of negative emotions, stress, and tension--all common in modern life--and the weight of past illness accumulate in the abdominal center, causing energy blockages and congestion. When this occurs, all vital functions stagnate and myriad problems arise. By practicing the techniques of Chi Nei Tsang, this stagnation is removed and the vital organs surrounding the navel center are detoxified and rejuvenated. Master Chia teaches readers how to avoid absorbing negative energies from others and take full charge of their health through the self-healing techniques of Chi Nei Tsang. He offers fully illustrated exercises that show how to detoxify the internal organs and clear the energy (chi) channels throughout the body. He also presents methods for balancing emotions, managing stress, and observing the body in order to recognize, ameliorate, and prevent maladies before they become a problem.
