wellness plan oak park: The Homicidal Handyman of Oak Park: Morris Solomon Jr Tony Ray Harvey, 2012-07 AS FAR AS FITTING the STEREOTYPES bestowed to infamous chain-link murderers that exist outside African American culture, there was a time when black serial killers

were recognized, to some extent, implausible by purported experts who probably cared not to explore the primary nature of the slayers' transgressions. Nevertheless, the obscured story of handyman Morris Solomon Jr. has to be one of the most interesting tales untold as it is one of the most horrific yarns in the annals of American crime. the handyman's misdeeds, when briefly brought to the public's attention, virtually reminded society that killers continuously come in all colors, shapes, and sizes. Solomon was convicted of killing six young women, ages 16 to 29, in the Sacramento, California, neighborhood of Oak Park between 1986 and 1987. the handyman's grisly method of murder left detectives and medical examiners mystified. the identification process of his victims' remains was distinctly a laborious assignment, too. the victims --drug addicts, prostitutes, and devout mothers -- were stuffed in closets, hidden under debris, and arguably, one court judge strongly considers, buried alive. In retrospect, the handyman was first accused of murder in the mid-1970s; and authorities suspect him to be linked to four more homicides in Sacramento. Solomon -- once declared as a Mentally Disordered Sex Offender-- is now on death row in Northern California's San Quentin State Prison awaiting execution. the unassuming handyman's 18-year reign of terror includes a record of sexual assaults, attempted kidnappings, and separate despicable sex acts performed strictly for humiliation. In the *Homicidal Handyman of Oak Park: Morris Solomon Jr.*, author and journalist Tony Ray Harvey recounts the black serial killer's dysfunctional upbringing, atrocious crimes, and hardly noticeable court trial. Harvey's book also provides explicit crime scene photos, the history of the death penalty system in the state of California, the city of Sacramento's drug culture in the mid-1980s, and exclusive prison interviews of the mild-mannered handyman.

Johnson, 2023-12-28 *Creating a Person-Centered Library* provides a comprehensive overview of various services, programs, and collaborations to help libraries serve high-needs patrons as well as strategies for supporting staff working with these individuals. While public libraries are struggling to address growing numbers of high-needs patrons experiencing homelessness, food insecurity, mental health problems, substance abuse, and poverty-related needs, this book will help librarians build or contribute to library services that will best address patrons' psychosocial needs. The authors, experienced in both library and social work, begin by providing an overview of patrons' psychosocial needs, structural and societal reasons for the shift in these needs, and how these changes impact libraries and library staff. Chapters focus on best practices for libraries providing person-centered services and share lessons learned, including information about special considerations for certain patron populations that might be served by individual libraries. The book concludes with information about how library organizations can support public library staff. Librarians and library students who are concerned about both patrons and library staff will find the practical advice in this book invaluable.

wellness plan oak park: *Investing in the Health and Well-Being of Young Adults* National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Improving the Health, Safety, and Well-Being of Young Adults, 2015-01-27 Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way

to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.
