wellness wednesday post ideas: *The Topography of Wellness* Sara Jensen Carr, 2021-06-15
The COVID-19 pandemic has re-ignited discussions of how architects, landscapes, and urban planners can shape the environment in response to disease. This challenge is both a timely topic and one with an illuminating history. In *The Topography of Wellness*, Sara Jensen Carr offers a chronological narrative of how six epidemics transformed the American urban landscape, reflecting changing views of the power of design, pathology of disease, and the epidemiology of the environment. From the infectious diseases of cholera and tuberculosis, to so-called social diseases of idleness and crime, to the more complicated origins of today's chronic diseases, each illness and its associated combat strategies has left its mark on our surroundings. While each solution succeeded in eliminating the disease on some level, sweeping environmental changes often came with significant social and physical consequences. Even more unexpectedly, some adaptations inadvertently incubated future epidemics. From the Industrial Revolution to present day, this book illuminates the constant evolution of our relationship to wellness and the environment by documenting the shifting grounds of illness and the urban landscape.

wellness wednesday post ideas: Creatrix Rising Stephanie Raffelock, 2021-08-24 Ever since Eve was banned from the garden, women have endured the oftentimes painful and inaccurate definitions foisted upon them by the patriarchy. Maiden, mother, and crone, representing the three stages assigned to a woman's life cycle, have been the limiting categories of both ancient and modern (neo-pagan) mythology. And one label in particular rankles: crone. The word conjures a wizened hag—useless for the most part, marginalized by appearance and ability. None of us has ever truly fit the old-crone image, and for today's midlife women, a new archetype is being birthed: the creatrix. In *Creatrix Rising*, Stephanie Raffelock lays out—through personal stories and essays—the highlights of the past fifty years, in which women have gone from a quiet strength to a resounding voice. She invites us along on her own transformational journey by providing probing questions for reflection so that we can flesh out and bring to life this new archetype within ourselves. If what the Dalai Lama has predicted—that women will save the world—proves true, then the creatrix will for certain be out front, leading the pack.

wellness wednesday post ideas: *In the Dream House* Carmen Maria Machado, 2019-11-05 A revolutionary memoir about domestic abuse by the award-winning author of *Her Body and Other Parties* *In the Dream House* is Carmen Maria Machado's engrossing and wildly innovative account of a relationship gone bad, and a bold dissection of the mechanisms and cultural representations of psychological abuse. Tracing the full arc of a harrowing relationship with a charismatic but volatile woman, Machado struggles to make sense of how what happened to her shaped the person she was becoming. And it's that struggle that gives the book its original structure: each chapter is driven by its own narrative trope—the haunted house, erotica, the bildungsroman—through which Machado holds the events up to the light and examines them from different angles. She looks back at her religious adolescence, unpacks the stereotype of lesbian relationships as safe and utopian, and widens the view with essayistic explorations of the history and reality of abuse in queer relationships. Machado's dire narrative is leavened with her characteristic wit, playfulness, and openness to inquiry. She casts a critical eye over legal proceedings, fairy tales, *Star Trek*, and

Disney villains, as well as iconic works of film and fiction. The result is a wrenching, riveting book that explodes our ideas about what a memoir can do and be.

wellness wednesday post ideas: *Post Traumatic Slave Syndrome* Joy DeGruy, 2017-05-23 From acclaimed author and researcher Dr. Joy DeGruy comes this fascinating book that explores the psychological and emotional impact on African Americans after enduring the horrific Middle Passage, over 300 years of slavery, followed by continued discrimination. From the beginning of American chattel slavery in the 1500's, until the ratification of the Thirteenth Amendment in 1865, Africans were hunted like animals, captured, sold, tortured, and raped. They experienced the worst kind of physical, emotional, psychological, and spiritual abuse. Given such history, Dr. Joy DeGruy asked the question, "Isn't it likely those enslaved were severely traumatized? Furthermore, did the trauma and the effects of such horrific abuse end with the abolition of slavery?" Emancipation was followed by another hundred years of institutionalized subjugation through the enactment of Black Codes and Jim Crow laws, peonage and convict leasing, and domestic terrorism and lynching. Today the violations continue, and when combined with the crimes of the past, they result in further unmeasured injury. What do repeated traumas visited upon generation after generation of a people produce? What are the impacts of the ordeals associated with chattel slavery, and with the institutions that followed, on African Americans today? Dr. DeGruy answers these questions and more as she encourages African Americans to view their attitudes, assumptions, and emotions

through the lens of history. By doing so, she argues they will gain a greater understanding of the impact centuries of slavery and oppression has had on African Americans. *Post Traumatic Slave Syndrome* is an important read for all Americans, as the institution of slavery has had an impact on every race and culture. "A masterwork. [DeGruy's] deep understanding, critical analysis, and determination to illuminate core truths are essential to addressing the long-lived devastation of slavery. Her book is the balm we need to heal ourselves and our relationships. It is a gift of wholeness."—Susan Taylor, former Editorial Director of *Essence* magazine

wellness wednesday post ideas: *The Coddling of the American Mind* Greg Lukianoff, Jonathan Haidt, 2018-09-04 Something is going wrong on many college campuses in the last few years. Rates of anxiety, depression, and suicide are rising. Speakers are shouted down. Students and professors say they are walking on eggshells and afraid to speak honestly. How did this happen? First Amendment expert Greg Lukianoff and social psychologist Jonathan Haidt show how the new problems on campus have their origins in three terrible ideas that have become increasingly woven into American childhood and education: what doesn't kill you makes you weaker; always trust your feelings; and life is a battle between good people and evil people. These three Great Untruths are incompatible with basic psychological principles, as well as ancient wisdom from many cultures. They interfere with healthy development. Anyone who embraces these untruths—and the resulting culture of safetyism—is less likely to become an autonomous adult able to navigate the bumpy road of life. Lukianoff and Haidt investigate the many social trends that have intersected to produce these untruths. They situate the conflicts on campus in the context of America's rapidly rising political polarization, including a rise in hate crimes and off-campus provocation. They explore changes in childhood including the rise of fearful parenting, the decline of unsupervised play, and the new world of social media that has engulfed teenagers in the last decade. This is a book for anyone who is confused by what is happening on college campuses today, or has children, or is concerned about the growing inability of Americans to live, work, and cooperate across party lines.
