Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds What is the value of a liberal education? Traditionally characterized by a rigorous engagement with the classics of Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In *Rescuing Socrates*, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities. Montás emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University's renowned Core Curriculum, one of America's last remaining Great Books programs. The experience changed his life and determined his career—he went on to earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary reflection, *Rescuing Socrates* describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

There is also significant interest about what this growth will mean for the future of CS programs, the role of computer science in academic institutions, the field as a whole, and U.S. society more broadly. Assessing and Responding to the Growth of Computer Science Undergraduate Enrollments seeks to provide a better understanding of the current trends in computing enrollments in the context of past trends. It examines drivers of the current enrollment surge, relationships between the surge and current and potential gains in diversity in the field, and the potential impacts of responses to the increased demand for computing in higher education, and it considers the likely effects of those responses on students, faculty, and institutions. This report provides recommendations for what institutions of higher education, government agencies, and the private sector can do to respond to the surge and plan for a strong and sustainable future for the field of CS in general, the health of the institutions of higher education, and the prosperity of the nation.

wiscedu business unit stout: *Duty beyond the Battlefield* Le'Trice D. Donaldson, 2020-01-31 In a bold departure from previous scholarship, Le'Trice D. Donaldson locates the often overlooked era between the Civil War and the end of World War I as the beginning of black soldiers' involvement in the long struggle for civil rights. Donaldson traces the evolution of these soldiers as they used their military service to challenge white notions of an African American second-class citizenry and forged a new identity as freedom fighters willing to demand the rights of full citizenship and manhood.

Through extensive research, Donaldson not only illuminates this evolution but also interrogates the association between masculinity and citizenship and the ways in which performing manhood through military service influenced how these men struggled for racial uplift. Following the Buffalo soldier units and two regular army infantry units from the frontier and the Mexican border to Mexico, Cuba, and the Philippines, Donaldson investigates how these locations and the wars therein provide windows into how the soldiers' struggles influenced black life and status within the United States. Continuing to probe the idea of what it meant to be a military race man—a man concerned with the uplift of the black race who followed the philosophy of progress—Donaldson contrasts the histories of officers Henry Flipper and Charles Young, two soldiers who saw their roles and responsibilities as black military officers very differently. Duty beyond the Battlefield demonstrates that from the 1870s to 1920s military race men laid the foundation for the “New Negro” movement and the rise of Black Nationalism that influenced the future leaders of the twentieth century Civil Rights movement.

All came voluntarily and wholeheartedly. They served as teachers, evangelists, preachers, and printers, building the early foundation of Christianity in Gabon. Many eventually returned to their homelands, but others stayed for the duration of their lives, assimilating into the local community. This book celebrates the contribution of persons of African descent who served with the mission from 1834 until 1891, a time of complex and controversial race relations in America, which seeped into mission relations overseas. Private missionary correspondence and journals reveal the interrelationships, roles, and contributions of these individuals, and also the underlying perceptions of nationality, race, and gender. One must grieve the injustices evident in the stories, yet marvel at the giftedness, faith, determination and commitment of those who served, often with no official recognition. I introduce you to Mr. B. V. R. James, Lavinia Sneed, Charity Sneed Menkel, Mary Harding, and others--may their stories inspire you!

Jacobson, Kristin Allukian, Rickie-Ann Legleitner, Leslie Allison, 2018-05-04 This book highlights the multiplicity of American women's writing related to liminality and hybridity from its beginnings to the contemporary moment. Often informed by notions of crossing, intersectionality, transition, and transformation, these concepts as they appear in American women's writing contest as well as perpetuate exclusionary practices involving class, ethnicity, gender, race, religion, and sex, among other variables. The collection's introduction, three unit introductions, fourteen individual essays, and afterward facilitate a process of encounters, engagements, and conversations within, between, among, and across the rich polyphony that constitutes the creative acts of American women writers. The contributors offer fresh perspectives on canonical writers as well as introduce readers to new authors. As a whole, the collection demonstrates American women's writing is "threshold writing," or writing that occupies a liminal, hybrid space that both delimits borders and offers enticing openings.
