xpress wellness urgent care junction city: Toxic Communities Dorceta E. Taylor, 2014

From St. Louis to New Orleans, from Baltimore to Oklahoma City, there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health. Due to entrenched segregation, zoning ordinances that privilege wealthier communities, or because businesses have found the OCypaths of least resistance, OCO there are many hazardous waste and toxic facilities in these communities, leading residents to experience health and wellness problems on top of the race and class discrimination most already experience. Taking stock of the recent environmental justice scholarship, a Toxic Communities aexamines the connections among residential segregation, zoning, and exposure to environmental hazards. Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low-income and minority communities and shows how they have been dumped on, contaminated and exposed. Drawing on an array of historical and contemporary case studies from across the country, Taylor explores controversies over racially-motivated decisions in zoning laws, eminent domain, government regulation (or lack thereof), and urban renewal. She provides a comprehensive overview of the debate over whether or not there is a link between environmental transgressions and discrimination,

drawing a clear picture of the state of the environmental justice field today and where it is going. In doing so, she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars. A fascinating landmark study, a Toxic Communities greatly contributes to the study of race, the environment, and space in the contemporary United States.

xpress wellness urgent care junction city: What is Critical Environmental Justice? David Naguib Pellow, 2017-11-27 Human societies have always been deeply interconnected with our ecosystems, but today those relationships are witnessing greater frictions, tensions, and harms than ever before. These harms mirror those experienced by marginalized groups across the planet. In this novel book, David Naguib Pellow introduces a new framework for critically analyzing Environmental Justice scholarship and activism. In doing so he extends the field's focus to topics not usually associated with environmental justice, including the Israel/Palestine conflict and the Black Lives Matter movement in the United States. In doing so he reveals that ecological violence is first and foremost a form of social violence, driven by and legitimated by social structures and discourses. Those already familiar with the discipline will find themselves invited to think about the subject in a new way. This book will be a vital resource for students, scholars, and policy makers interested in transformative approaches to one of the greatest challenges facing humanity and the planet.

xpress wellness urgent care junction city: **American Comics: A History** Jeremy Dauber, 2021-11-16 The sweeping story of cartoons, comic strips, and graphic novels and their hold on the American imagination. Comics have conquered America. From our multiplexes, where Marvel and DC movies reign supreme, to our television screens, where comics-based shows like The Walking Dead have become among the most popular in cable history, to convention halls, best-seller lists, Pulitzer Prize-winning titles, and MacArthur Fellowship recipients, comics shape American culture, in ways high and low, superficial, and deeply profound. In American Comics, Columbia professor Jeremy Dauber takes readers through their incredible but little-known history, starting with the Civil War and cartoonist Thomas Nast, creator of the lasting and iconic images of Uncle Sam and Santa Claus; the golden age of newspaper comic strips and the first great superhero boom; the moral panic of the Eisenhower era, the Marvel Comics revolution, and the underground comix movement of the 1960s and '70s; and finally into the twenty-first century, taking in the grim and gritty Dark Knights and Watchmen alongside the brilliant rise of the graphic novel by acclaimed practitioners like Art Spiegelman and Alison Bechdel. Dauber's story shows not only how comics have changed over the decades but how American politics and culture have changed them. Throughout, he describes the origins of beloved comics, champions neglected masterpieces, and argues that we can understand how America sees itself through whose stories comics tell. Striking and revelatory, American Comics is a rich chronicle of the last 150 years of American history through the lens of its comic strips, political cartoons, superheroes, graphic novels, and more. xpress wellness urgent care junction city: *Reading Ethics* Miranda Fricker, Samuel Guttenplan, 2009 This introductory text encourages students to engage with key problems and arguments in ethics through a series of classic and contemporary readings. It will inspire students to think about the distinctive nature of moral philosophy, and to draw comparisons between different

traditions of thought, between ancient and modern philosophies, and between theoretical and literary writing about the place of value in human life. Each of the book's six chapters focuses on a particular theme: the nature of goodness, subjectivity and objectivity in ethical thinking, justice and virtue, moral motivation, the place of moral obligation, and the idea that literature can be a form of moral philosophy. The historical readings come from Plato, Aristotle, Hume, Kant and Mill; and the contemporary readings from Foot, Rawls, McDowell, Mackie, Nagel, Williams, Nussbaum and Gaita. The editors' introductions to the themes, and the interactive commentaries they provide for each reading, are intended to make Reading Ethics come as close as possible to a seminar in philosophy.

xpress wellness urgent care junction city: Art without Death E-Flux Journal, 2017-09-08 According to the nineteenth-century teachings of Nikolai Fedorov—librarian, religious philosopher, and progenitor of Russian cosmism—our ethical obligation to use reason and knowledge to care for the sick extends to curing the dead of their terminal status. The dead must be brought back to life using means of advanced technology—resurrected not as souls in heaven, but in material form, in this world, with all their memories and knowledge. Fedorov's call to redistribute vital forces is wildly imaginative in emancipatory ambition. Today, it might appear arcane in its mystical panpsychism or eccentric in its embrace of realities that exist only in science fiction or certain diabolical strains of Silicon Valley techno-utopian ideology. It can be difficult to grasp how it ended up influencing the thinking behind a generation of young revolutionary anarchists and Marxists who incorporated Fedorov's ideas under their own brand of biocosmism before the 1917 Russian Revolution, even giving rise to the origins of the Soviet space program. This book of interviews and conversations with today's most compelling living and resurrected artists and thinkers seeks to address the relevance of Russian cosmism and biocosmism in light of its influence on the Russian artistic and political vanguard as well as on today's art-historical apparatuses, weird materialisms, extinction narratives, and historical and temporal politics. This unprecedented collection of exchanges on cosmism asks how such an encompassing and imaginative, unapologetically humanist and anthropocentric strain of thinking could have been so historically and politically influential, especially when placed alongside the politically inconsequential—but in some sense equally encompassing—apocalypticism of contemporary realist imaginaries. Contributors Bart De Baere, Franco "Bifo" Berardi, Boris Groys, Elena Shaposhnikova, Marina Simakova, Hito Steyerl, Anton Vidokle, Brian Kuan Wood, Arseny Zhilyaev, Esther Zonsheim Published in parallel with the eponymous exhibition at Haus der Kulturen der Welt, Berlin.
