Meal Planning and Preparation: We provide strategies and resources to help you plan and prepare healthy meals efficiently, even with a busy schedule.

Fitness: Unleashing Your Physical Potential

Physical activity isn't just about aesthetics; it's about strengthening your body, boosting your mood, and improving your overall well-being. The Beast Factory offers a variety of fitness options, focusing on:

beast factory health and wellness: The Nature of the Beast Louise Penny, 2015-08-25 *The Nature of the Beast* is a New York Times bestselling Chief Inspector Gamache novel from Louise Penny. Hardly a day goes by when nine year old Laurent LePage doesn't cry wolf. From alien invasions, to walking trees, to winged beasts in the woods, to dinosaurs spotted in the village of Three Pines, his tales are so extraordinary no one can possibly believe him. What they uncover deep in the forest sets off a sequence of events that leads to murder, leads to an old crime, leads to an old betrayal. Leads right to the door of an old poet. And now it is now, writes Ruth Zardo. And the dark thing is here. A monster once visited Three Pines. And put down deep roots. And now, Ruth knows, it is back. Armand Gamache, the

former head of homicide for the Sûreté du Québec, must face the possibility that, in not believing the boy, he himself played a terrible part in what happens next.

beast factory health and wellness: Natural Causes Barbara Ehrenreich, 2018-04-10 From the celebrated author of *Nickel and Dimed*, Barbara Ehrenreich explores how we are killing ourselves to live longer, not better. A razor-sharp polemic which offers an entirely new understanding of our bodies, ourselves, and our place in the universe, *Natural Causes* describes how we over-prepare and worry way too much about what is inevitable. One by one, Ehrenreich topples the shibboleths that guide our attempts to live a long, healthy life -- from the importance of preventive medical screenings to the concepts of wellness and mindfulness, from dietary fads to fitness culture. But *Natural Causes* goes deeper -- into the fundamental unreliability of our bodies and even our mind-bodies, to use the fashionable term. Starting with the mysterious and seldom-acknowledged tendency of our own immune cells to promote deadly cancers, Ehrenreich looks into the cellular basis of aging, and shows how little control we actually have over it. We tend to believe we have agency over our bodies, our minds, and even over the manner of our deaths. But the latest science shows that the microscopic subunits of our bodies make their own decisions, and not always in our favor. We may buy expensive anti-aging products or cosmetic surgery, get preventive screenings and eat more kale, or throw ourselves into meditation and spirituality. But all these things offer only the illusion of control. How to live well, even joyously, while accepting our mortality -- that is the vitally important philosophical challenge of this book. Drawing on varied sources, from personal experience and sociological trends to pop culture and current scientific literature, *Natural Causes* examines the ways in which we obsess over death, our bodies, and our health. Both funny and caustic, Ehrenreich then tackles the seemingly unsolvable problem of how we might better prepare ourselves for the end -- while still reveling in the lives that remain to us.

beast factory health and wellness: Lesser Beasts Mark Essig, 2015-05-05 Unlike other barnyard animals, which pull plows, give eggs or milk, or grow wool, a pig produces only one thing: meat. Incredibly efficient at converting almost any organic matter into nourishing, delectable protein, swine are nothing short of a gastronomic godsend—yet their flesh is banned in many cultures, and the animals themselves are maligned as filthy, lazy brutes. As historian Mark Essig reveals in *Lesser Beasts*, swine have such a bad reputation for precisely the same reasons they are so valuable as a source of food: they are intelligent, self-sufficient, and omnivorous. What's more, he argues, we ignore our historic partnership with these astonishing animals at our peril. Tracing the interplay of pig biology and human culture from Neolithic villages 10,000 years ago to modern industrial farms, Essig blends culinary and natural history to demonstrate the vast importance of the

pig and the tragedy of its modern treatment at the hands of humans. Pork, Essig explains, has long been a staple of the human diet, prized in societies from Ancient Rome to dynastic China to the contemporary American South. Yet pigs' ability to track down and eat a wide range of substances (some of them distinctly unpalatable to humans) and convert them into edible meat has also led people throughout history to demonize the entire species as craven and unclean. Today's unconscionable system of factory farming, Essig explains, is only the latest instance of humans taking pigs for granted, and the most recent evidence of how both pigs and people suffer when our symbiotic relationship falls out of balance. An expansive, illuminating history of one of our most vital yet unsung food animals, *Lesser Beasts* turns a spotlight on the humble creature that, perhaps more than any other, has been a mainstay of civilization since its very beginnings—whether we like it or not.

beast factory health and wellness: Why Can't You Afford a Home? Josh Ryan-Collins, 2018-11-26 Throughout the Western world, a whole generation is being priced out of the housing market. For millions of people, particularly millennials, the basic goal of acquiring decent, affordable accommodation is a distant dream. Leading economist Josh Ryan-Collins argues that to understand this crisis, we must examine a crucial paradox at the heart of modern capitalism. The interaction of private home ownership and a lightly regulated commercial banking system leads to a feedback cycle. Unlimited credit and money flows into an inherently finite supply of property, which causes rising house prices, declining home ownership, rising inequality and debt, stagnant growth and financial instability. Radical reforms are needed to break the cycle. This engaging and topical book will be essential reading for anyone who wants to understand why they can't find an affordable home, and what we can do about it.

beast factory health and wellness: *Living with a Wild God* Barbara Ehrenreich, 2014-04-08 From the New York Times bestselling author of *Nickel and Dimed* comes a brave, frank, and exquisitely written memoir that will change the way you see the world. Barbara Ehrenreich is one of the most important thinkers of our time. Educated as a scientist, she is an author, journalist, activist, and advocate for social justice. In *Living With a Wild God*, she recounts her quest-beginning in childhood-to find the Truth about the universe and everything else: What's really going on? Why are we here? In middle age, she rediscovered the journal she had kept during her tumultuous adolescence, which records an event so strange, so cataclysmic, that she had never, in all the intervening years, written or spoken about it to anyone. It was the kind of event that people call a mystical experience-and, to a steadfast atheist and rationalist, nothing less than shattering. In *Living With a Wild God*, Ehrenreich reconstructs her childhood mission, bringing an older woman's wry and erudite perspective to a young girl's impassioned obsession with the questions that, at one point or another, torment us all. The result is both deeply personal and cosmically sweeping-a searing memoir and a profound reflection on science, religion, and the human condition. With her signature combination of intellectual rigor and uninhibited imagination, Ehrenreich offers a true literary achievement-a work that has the power not only to entertain but amaze.

This book analyses the social and ethical implications of the globalization of emerging skin-whitening and anti-ageing biotechnology. Using an intersectional theoretical framework and a content analysis methodology drawn from cultural studies, the sociology of knowledge, the history of colonial medicine and critical race theory, it examines technical reports, as well as print and online advertisements from pharmaceutical and cosmetics companies for skin-whitening products. With close attention to the promises of ‘ageless beauty’, ‘brightened’, youthful skin and solutions to ‘pigmentation problems’ for non-white women, the author reveals the dynamics of racialization and biomedicalization at work. A study of a significant sector of the globalized health and wellness industries – which requires the active participation of consumers in the biomedicalization of their own bodies – *Wellness in Whiteness* will appeal to social scientists with interests in gender, race and ethnicity, biotechnology and embodiment.

beast factory health and wellness: *No Beast So Fierce* Edward Bunker, 2011-11-01 An ex-con struggles to adjust to life outside prison walls in "one of the great crime novels of the past 30 years" (James Ellroy). After eight years spent locked up, Max has gotten very good at being a prisoner. He knows the guards, the inmates, and how to survive. But the parole board has decided that he has sufficiently reformed, and it's time for him to say goodbye. When Max reaches the outside world, he finds that freedom doesn't make anything easier. Based on his own experiences in prison, Edward Bunker first drafted *No Beast So Fierce* in the 1950s, while incarcerated in San Quentin State Prison. He spent the next two decades in and out of jail, writing essays for various magazines and working on the novel, which was finally published in 1973. Eighteen months later, the book was used as evidence that he was fit to leave jail. He received parole, and spent the rest of his life a free man. Rooted in real-life experiences and hailed by Quentin Tarantino—who cast Bunker in his film *Reservoir Dogs*—as "the best first person crime novel I have ever read," *No Beast So Fierce* is a gritty and compelling read like no other.

beast factory health and wellness: *The Finest Traditions of My Calling* Abraham M. Nussbaum, 2016-01-01 Patients and doctors alike are keenly aware that the medical world is in the midst of great change. We live in an era of continuous healthcare reforms, many of which focus on high volume, efficiency, and cost-effectiveness. This compelling, thoughtful book is the response of a practicing physician who explains how population-based reforms are diminishing the relationship between doctor and patients, to the detriment of both. As an antidote to stubbornly held traditions, Dr. Abraham M. Nussbaum suggests ways that doctors and patients can learn what it means to be ill and to seek medical assistance. Drawing on personal stories, validated studies, and neglected history, the author develops a series of metaphors to explore a doctor's role in different healthcare reform scenarios: scientist, technician, author, gardener, teacher, servant, and witness. Each role shapes what physicians see when they encounter a patient. Dr. Nussbaum cautions that true healthcare reform can happen only when those who practice medicine can see, and be seen by, their patients as fellow creatures. His memoir makes a hopeful appeal for change, and his insights reveal the direction that change must take.--Jacket flap.

beast factory health and wellness: *Zebratown* Greg Donaldson, 2010-08-24 Eight years in the making, this edgy, in-depth account follows a black felon's attempt to find a new life for himself with a white woman in a small-town neighborhood where—as the book's title implies—such relationships are common. A remarkably intense read, *Zebratown* reveals a rhythm of life spiked with violence, betrayal, sex, and the emotional dangers created by passionate love. Greg Donaldson's *Zebratown* follows the life of Kevin Davis, an ex-con from Brownsville, Brooklyn, who, after his release from prison, moves to Elmira, New York, and takes up with Karen, a young woman with a six-year-old daughter. Kevin is seemingly the embodiment of hip-hop gangsterism—a heavily muscled, feared thug who has beaten a murder rap. And yet, as Donaldson's stunning reportage reveals, Kevin has survived on the streets and in prison with a sharp intelligence and a rigid code of practical morality and physical fitness while yearning to make a better life for himself and be a better man. Month by month and year by year, Donaldson follows Kevin and Karen's attempt to make a home together, a quest made harder by Kevin's difficulty finding legal employment. The dangerous lures of the street remain for him, both in New York City and in Zebratown, and he is not always successful at avoiding them. Meanwhile, as Kevin and Karen struggle, the reader comes to care for them, even as they act in ways that society may not condone. Theirs is a complex story with many moments of drama,

suffering, desire, and revelation—a story that is frequently astonishing and unforgettable to the end. Like Adrian Nicole LeBlanc in *Random Family*, Donaldson explores a largely hidden world; such immersion journalism is difficult to achieve but uniquely powerful to read. In addition to spending long periods with Kevin and Karen, Donaldson interviews policemen, judges, family members, and others in Kevin and Karen's orbit, providing a remarkably panoramic account of their lives. Relationships between white women and black men have long been a hot issue in American culture. Even years after the 2008 presidential election, when society has in some ways seemingly moved on to a postracial perspective, people still have a lot to say about interracial relationships. *Zebratown* takes us into the heart of one and offers the paradoxical truth that while race is rarely not an issue in such relationships, in the end, what transpires between a couple is intensely individual. Meanwhile, the difficulty that ex-cons have successfully reentering society is an ongoing problem—for them, their families, and the communities where they live. *Zebratown* makes this struggle real, as Kevin Davis confronts not only his criminal record and his poor formal education but the cruelties of the postindustrial economy. Both his and Karen's stories resonate powerfully with twenty-first-century American reality, and in telling them, Greg Donaldson confirms his position as one of the most intrepid journalists at work today.

Working out? Skipping that second beer or glass of wine? Healthy habits are THE WORST. If you're someone who gets up every morning and can't wait for your run, considers eating sweet potatoes a splurge, and sets aside thirty minutes before work to meditate—this book isn't for you. If you're someone who thinks about getting up to go for a run but goes back to sleep, regrets last night's dinner of fast food, and can barely get to work on time—let alone meditate—then this book will help you find the motivation you've been looking for to live your healthiest life, even when you don't want to. With this funny, in-your-face guide, you won't find advice on how to "enjoy" exercise, or tips for making broccoli and kale taste as good as donuts and ice cream. What you will find are solid skills to help you actually do the healthy things you know you should be doing. Using these skills—based in acceptance and commitment therapy (ACT) and neuroscience—you'll learn to find the motivation you're really craving to adopt healthy habits, even if they do suck. You'll also discover how to accept self-criticism, develop self-compassion, and live a more meaningful life. This book not only acknowledges that many healthy habits suck, it uses science to explain why we want the things we want (junk food), crave the things we crave (sugar), and dislike the things we dislike (exercise). At the end, you'll feel validated in feeling like these things are the absolute worst. But you'll also find the motivation to do them anyway.

beast factory health and wellness: Living with the Gods Neil MacGregor, 2018-09-17 Following the award-winning BBC Radio 4 series, a panoramic exploration of peoples, objects and beliefs from the celebrated author of *A History of the World in 100 Objects* and *Germany* 'Riveting, extraordinary ... tells the sweeping story of religious belief in all its inventive variety. The emphasis is not on our differences, but on shared spiritual yearnings' Rachel Campbell-Johnston, *The Times*, Books of the Year One of the central facts of human existence is that every society shares a set of beliefs and assumptions - a faith, an ideology, a religion - that goes far beyond the life of the

individual. These beliefs are an essential part of a shared identity. They have a unique power to define - and to divide - us, and are a driving force in the politics of much of the world today. Throughout history they have most often been, in the widest sense, religious. Yet this book is not a history of religion, nor an argument in favour of faith. It is about the stories which give shape to our lives, and the different ways in which societies imagine their place in the world. Looking across history and around the globe, it interrogates objects, places and human activities to try to understand what shared beliefs can mean in the public life of a community or a nation, how they shape the relationship between the individual and the state, and how they help give us our sense of who we are. For in deciding how we live with our gods, we also decide how to live with each other. 'The new blockbuster by the museums maestro Neil MacGregor ... The man who chronicles world history through objects is back ... examining a new set of objects to explore the theme of faith in society' Sunday Times

In this "riveting...brilliant" (Booklist) debut, Hazel Severy, the owner of a struggling Seattle bookstore, receives a letter from her adoptive grandfather—mathematician Isaac Severy—days after he dies in a suspected suicide. In his puzzling letter, Isaac alludes to a secretive organization that is after his final bombshell equation, and he charges Hazel with safely delivering it to a trusted colleague. But first, she must find where the equation is hidden. While in Los Angeles for Isaac's funeral, Hazel realizes she's not the only one searching for his life's work, and that the equation's implications have potentially disastrous consequences for the extended Severy family, a group of dysfunctional geniuses unmoored by the sudden death of their patriarch. As agents of an enigmatic company shadow Isaac's favorite son—a theoretical physicist—and a long-lost cousin mysteriously reappears in Los Angeles, the equation slips further from Hazel's grasp. She must unravel a series of confounding clues hidden inside one of her favorite novels, drawing her ever closer to his mathematical treasure. But when her efforts fall short, she is forced to enlist the help of those with questionable motives. "A novel that is anything but clueless, filled with consideration and compassion" (The Washington Post), *The Last Equation of Isaac Severy* proves that, like Hazel, you don't have to love math to fall under the Severy spell.

beast factory health and wellness: *Separation Anxiety* Gavin Bradley, 2022-08-16 This poignant debut by Gavin Bradley explores the emotional toll of different kinds of separation: from a partner, a previously held sense of self, or a home and the people left behind. The main narrative describes the deterioration of a long-term relationship, interweaving poems dealing with the loneliness of immigration and the anxiety of separation from Northern Ireland, the poet's homeland. These personal poems enter their stories through a variety of characters and places, from dock

builders to dogs, from shorelines to volcanoes, to “mouths soft and humming like beehives.” Other sections of the collection examine a post-Troubles’ experience in Northern Ireland (evoking the lived-experience of growing up with bombs and domineering Catholicism), tell grandfather stories, and show a lasting love for the people, the language, and the land. Separation Anxiety ultimately conveys a message of hope, reminding us that “we’ll be remembered for / ourselves, and not the spaces we / leave behind.”

As a brown immigrant from Mexico, assimilation had been demanded of her since the moment she set foot in San Antonio, Texas, in 1994. She’d spent so much time getting rid of her accent so no one could tell English was her second language that in that moment she felt those words—you sound like a white girl?—were a compliment. As a child, she didn’t yet understand that assimilating to “American” culture really meant imitating “white” America—that sounding like a white girl was a racist idea meant to tame her, change her, and make her small. She ran the race, completing each stage, but never quite fit in, until she stopped running altogether. In this dual polemic and manifesto, Julissa dives into and tears apart the lie that assimilation leads to belonging. She combs through history and her own story to break down this myth, arguing that assimilation is a moving finish line designed to keep Black and brown Americans and immigrants chasing racist American ideals. She talks about the Lie of Success, the Lie of Legality, the Lie of Whiteness, and the Lie of English—each promising that if you obtain these things, you will reach acceptance and won’t be an outsider anymore. Julissa deftly argues that these demands leave her and those like her in a purgatory—neither able to secure the power and belonging within whiteness nor find it in the community and cultures whiteness demands immigrants and people of color leave behind. In *You Sound Like a White Girl*, Julissa offers a bold new promise: Belonging only comes through celebrating yourself, your history, your culture, and everything that makes you uniquely you. Only in turning away from the white gaze can we truly make America beautiful. An America where difference is celebrated, heritage is shared and embraced, and belonging is for everyone. Through unearthing veiled history and reclaiming her own identity, Julissa shows us how to do this.

beast factory health and wellness: *Dancing with Butterflies* Reyna Grande, 2009-10-06 In *Dancing with Butterflies*, Reyna Grande renders the Mexican immigrant experience in “lyrical and sensual” (Publishers Weekly, starred review) prose through the poignant stories of four women brought together through folklorico dance. *Dancing with Butterflies* uses the alternating voices of four very different women whose lives interconnect through a common passion for their Mexican heritage and a dance company called Alegría. Yesenia, who founded Alegría with her husband, Eduardo, sabotages her own efforts to remain a vital, vibrant woman when she travels back and forth across the Mexican border for cheap plastic surgery. Elena, grief-stricken by the death of her only child and the end of her marriage, finds herself falling dangerously in love with one of her underage students. Elena’s sister, Adriana, wears the wounds of abandonment by a dysfunctional family and becomes unable to discern love from abuse. Soledad, the sweet-tempered illegal immigrant who designs costumes for Alegría, finds herself stuck back in Mexico, where she returns to see her dying grandmother. Reyna Grande has brought these fictional characters so convincingly to life that readers will imagine they know them.

beast factory health and wellness: *Routledge Handbook of the Influence Industry* Emma L.

Briant, Vian Bakir, 2024-10-14 This Handbook provides the first comprehensive examination of the influence industry and how it operates worldwide across different domains. The rapid evolution of emerging technologies and data-driven persuasive practices has been linked to the spread of misleading content in domestic and foreign influence campaigns. This has prompted worldwide public and policy discussions about disinformation and how to curb its spread. However, less attention has been paid to the increasingly data-driven commercial industry taking advantage of the opportunities these new technologies afford. The handbook uses the term 'influence' here to include not only messaging and public relations (PR), which fell within the traditional focus of propaganda studies, but to consider the infrastructure and actors behind an advanced array of capabilities that can be used in a coordinated way to affect an audience's emotions, ideas and behaviors in order to advance a state or non-state actor's objectives - increasingly based on data-driven profiling. The volume fills a gap in scholarship exploring the recent technical, political and economic development of this industry, surveying the extent of different technologies and services offered to clients worldwide across multiple domains (commercial, political, national security and government). The chapters are divided into three thematic sections and evaluate Influence Industry practices, aims and effectiveness across audiences; business practices and economics; and democratic structures and human rights. They also offer advice for researchers and consider key ethical issues and new regulatory approaches. This volume will be of much interest to students of political science, propaganda studies, sociology, communication studies and journalism.

beast factory health and wellness: *The Well of Loneliness* Radclyffe Hall, 2015-04-24 This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

beast factory health and wellness: *Leonardo da Vinci* Walter Isaacson, 2017-10-17 The #1 New York Times bestseller from Walter Isaacson brings Leonardo da Vinci to life in this exciting new biography that is "a study in creativity: how to define it, how to achieve it...Most important, it is a powerful story of an exhilarating mind and life" (The New Yorker). Based on thousands of pages from Leonardo da Vinci's astonishing notebooks and new discoveries about his life and work, Walter

Isaacson “deftly reveals an intimate Leonardo” (San Francisco Chronicle) in a narrative that connects his art to his science. He shows how Leonardo’s genius was based on skills we can improve in ourselves, such as passionate curiosity, careful observation, and an imagination so playful that it flirted with fantasy. He produced the two most famous paintings in history, *The Last Supper* and the *Mona Lisa*. With a passion that sometimes became obsessive, he pursued innovative studies of anatomy, fossils, birds, the heart, flying machines, botany, geology, and weaponry. He explored the math of optics, showed how light rays strike the cornea, and produced illusions of changing perspectives in *The Last Supper*. His ability to stand at the crossroads of the humanities and the sciences, made iconic by his drawing of Vitruvian Man, made him history’s most creative genius. In the “luminous” (Daily Beast) Leonardo da Vinci, Isaacson describes how Leonardo’s delight at combining diverse passions remains the ultimate recipe for creativity. So, too, does his ease at being a bit of a misfit: illegitimate, gay, vegetarian, left-handed, easily distracted, and at times heretical. His life should remind us of the importance to be imaginative and, like talented rebels in any era, to think different. Here, da Vinci “comes to life in all his remarkable brilliance and oddity in Walter Isaacson’s ambitious new biography...a vigorous, insightful portrait” (The Washington Post).
