📖 **Braou business organisation 110: Distance Education Technologies in Asia** Jon Baggaley, Tian Belawati, 2010-11-10 In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technologies across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century. The surveys reported cover different DE contexts, methodologies, and levels of generalisability, and add to the existing scholarship on the subject by providing previously unavailable, firm evidence about DE's prospects in Asia. The contributors give important recommendations that can be translated into practical and political

actions to help solve critical socio-economic problems of Asia as well as other parts of the world.

braou business organisation 110: Annihilation of Caste B.R. Ambedkar, 2014-10-07 "What the Communist Manifesto is to the capitalist world, Annihilation of Caste is to India." —Anand Teltumbde, author of *The Persistence of Caste* The classic work of Indian Dalit politics, reframed with an extensive introduction by Arundhati Roy B.R. Ambedkar's *Annihilation of Caste* is one of the most important, yet neglected, works of political writing from India. Written in 1936, it is an audacious denunciation of Hinduism and its caste system. Ambedkar – a figure like W.E.B. Du Bois – offers a scholarly critique of Hindu scriptures, scriptures that sanction a rigidly hierarchical and iniquitous social system. The world's best-known Hindu, Mahatma Gandhi, responded publicly to the provocation. The hatchet was never buried. Arundhati Roy introduces this extensively annotated edition of *Annihilation of Caste* in "The Doctor and the Saint," examining the persistence of caste in modern India, and how the conflict between Ambedkar and Gandhi continues to resonate. Roy takes us to the beginning of Gandhi's political career in South Africa, where his views on race, caste and imperialism were shaped. She tracks Ambedkar's emergence as a major political figure in the national movement, and shows how his scholarship and intelligence illuminated a political struggle beset by sectarianism and obscurantism. Roy breathes new life into Ambedkar's anti-caste utopia, and says that without a Dalit revolution, India will continue to be hobbled by systemic inequality.

braou business organisation 110: Cases on Challenges Facing E-Learning and National Development Ugur Demiray, 2010 E-Learning offers many opportunities for individuals and institutions all over the world. Individuals can access to education they need almost anytime and anywhere they are ready to. Institutions are able to provide more cost-effective training to their employees. E-learning context is very important. It is common to find educators who perceive e-learning as internet-only education that encourages a static and content-focused series of text pages on screen. Others envisage the shallow and random online messages that are typical of a social real-time chat session, and wonder how that type of communication could add any value to academic discourse. Some may have experienced e-learning done poorly, and extrapolate their experience into a negative impression of all e-learning. The book will examine the emergence and growth of e-learning. The use of the e prefix indicates the application of information and communication technology (ICT) in government, finance, and all forms of socio-economic and community development. This eBook is designed and presented in two volumes. The first volume consists of the country cases of Algeria, Belarus, Bulgaria, Egypt, Estonia, Finland, Greece, Jordan, Hungary, Iraq, Iran, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, and Morocco. braou business organisation 110: *Supporting Students for Success in Online and Distance Education* Ormond Simpson, 2012 *Supporting Students for Success in Online and Distance Learning*, Third Edition, provides a comprehensive overview of student support both on and off campus. While online and distance learning are the world's fastest growing areas of educational development, they have a fundamental weakness—their graduation rates, which can be lower than 20 percent. In this powerful new edition, Ormond Simpson builds on a rich history of research in distance and e-learning to show how retention rates can be improved through tested support methods, often at a net financial profit to the institutions involved. By comparing the evidence as well as the cost-effectiveness of various support tactics, this book describes how to promote student success and encourage skill-development from a number of different perspectives: definitions and purpose, theory and psychology, ethics, costs and benefits, activities, sources, media, proactive and reactive, assessment and feedback, staff development, writing support into course materials, research, quality assurance and institutional structures. This concise, practical guide is informal and jargon-free, yet its approach to evidence is rigorous, making it invaluable reading for all those interested in recruiting and teaching diverse students for successful online and distance learning.

braou business organisation 110: Mr Gandhi and Emancipation of the Untouchables B. R. Ambedkar, 2021-07 In response to the invitation of the Chairman of the Indian section of the Institute of Pacific Relations, I wrote in August last year a Paper on the Problem of the Untouchables of India for the Session of the Conference which was due to be held on December 1942 at Mont' Trablant in Quebec in Canada. The Paper is printed in the proceedings of the Conference. Ever since it became known that I had written such a Paper, the leaders of the Untouchables and Americans interested in their problem have been pressing me to issue it separately in the form of a book and make it available to the general public. It was not possible to refuse the demand. At the same time I could not without breach of etiquette publish the paper until the proceedings of the Conference were made public. I am now told by the Secretary of the Pacific Relations Conference that the proceedings have been made public and there can be no objection to the publication of my Paper if I desired it. This will explain why the Paper is published nearly 10 months after it was written.

The book suggests ways and means to follow for knowledge management implementation, especially for organizations with multiple business verticals to follow. The book underlines that knowledge is both an entity and organizational asset which can be managed. A holistic view of knowledge management implementation has been provided. It also emphasizes the phenomenological importance of human resource parameters as compared to that of technological parameters. Various hypotheses have been tested to validate the significant models hypothesized. This work will prove useful to corporations, researchers, and independent professionals working to study or implement knowledge management paradigms.

braou business organisation 110: India Stephen P. Cohen, 2004-05-13 For years, Americans have seen India as a giant but inept state. That negative image is now obsolete. After a decade of drift and uncertainty, India is taking its expected place as one of the three major states of Asia. Its pluralist, secular democracy has allowed the rise of hitherto deprived castes and ethnic communities. Economic liberalization is gathering steam, with six percent annual growth and annual exports in excess of \$30 billion. India also has a modest capacity to project military power. The country will soon have a two-carrier navy and it is developing a nuclear-armed missile capable of reaching all of Asia. This landmark book provides the first comprehensive assessment of India as a political and strategic power since India's nuclear tests, its 1999 war with Pakistan, and its breakthrough economic achievements. Stephen P. Cohen examines the domestic and international causes of India's emergence, he discusses the way social structure and tradition shape Delhi's perceptions of the world, and he explores India's relations with neighboring Pakistan and China, as well as the United States. Cohen argues that American policy needs to be adjusted to cope with a rising India—and that a relationship well short of alliance, but far more intimate than in the past, is appropriate for both countries.

In sharp contrast to the dominant, bourgeois-dominated Congress party, Dr. Ambedkar

provides a perceptive picture of the absence of political rights enjoyed by Scheduled Caste candidates (during the election). This book also seeks to debunk the misconception that Mahatma Gandhi was the benefactor of the Dalit.

braou business organisation 110: Principals in Succession Robert E. White, Karyn Cooper, 2011-06-11 Contributors to this volume examine structures and processes that school boards have in place directly relating to the process of principal or vice-principal succession. As well, they consider the effect that these structures and processes have upon staff and administrators themselves. These contributors investigate policies, procedures and practices that school boards employ in terms of leadership succession, and explore implications of these constructs for the sustainability of school improvement. This volume presents an overview of the process of principal or vice-principal succession, descriptions of school district practices surrounding this process and discussions regarding how succession procedures affect individuals and groups of individuals. This volume also highlights those board policies that incorporate practices used to develop models that support and allow administrators to succeed. It articulates how school leaders and staff members deal with change and improvement efforts in successive schools, as well as how board policies and practices support principals and vice-principals at any stage in the succession process. This volume is useful as a reference guide relating to transfer and rotation procedures in school systems across the nation.

braou business organisation 110: *Capital Market and Financial System in India* Asheesh Pandey, 2014-01-01 The financial system of a country promotes savings by providing a wide variety of financial assets to the general public. Savings collected from the household sector are pooled together and allocated to various sectors of the economy for raising production levels. If the allocation of credit is judicious and socially equitable, it can help achieve the twin objectives of growth and social justice. An understanding of financial markets -- as part of the financial system -- is important as they are at the core of the transmission mechanism of monetary policy. In India, financial markets have been developed with a specific emphasis on increasing allocative efficiency of

resources and promoting financial stability. Financial markets in India comprise, in the main, money market, Government securities market, capital market, corporate debt market, credit market, and foreign exchange market. Capital market plays a very important role in the development of financial system of any economy. It is a market where financial assets such as equities/debts are traded over a long period of time. Although the capital market in India has a long history, it remained on the periphery of the financial system for a long time. Various reforms undertaken since the early 1990s by the Securities and Exchange Board of India (SEBI) and the Government have brought about a significant structural transformation in the Indian capital market. As a result, the Indian equity market has become modern and transparent. The equity market has witnessed widespread development in infrastructure and its functioning is comparable to international standards. It has seen significant increase in growth and diversity in composition since early 1990s.

braou business organisation 110: *Public Sector Reform and Performance Management in Developed Economies* Zahirul Hoque, 2021 Over the past two decades, there has been a shift of paradigm in public administration and public sector accounting around the world with the increasing emphasis on outcomes as opposed to inputs and outputs focus. Understanding of how government departments and agencies develop and implement outcomes-based approaches to their services and programs to strengthen public accountability, financial scrutiny and good governance worldwide is limited. Covering a selection of international practices on outcomes-based approaches to government departments, agencies and public higher educational institutions in developed economies, this comprehensive compilation provides an essential reading in the public sector accounting, accountability and performance management field. The contributions are grouped into three jurisdictions: Australasia, UK and Europe, and North America. It incorporates outcomes-based practices in public services from advanced economies and will be of significant interest to global public sector regulators, consultants, researchers, and academic communities as well as academic researchers in public administration and development studies fields. The insights offered by a country-specific practice will also be useful to governments in other countries implementing similar systems and practices and facing similar socio-political environments. This book will also help to gain an understanding of the issues of government accountability from a management point of view as well as from a socio-political point of view--
