brazosport rehab wellness llc: Zoot Suit & Other Plays Luis Valdez, 1992-04-30 This critically acclaimed play by Luis Valdez cracks open the depiction of Chicanos on stage, challenging viewers to revisit a troubled moment in our nation's history. From the moment the myth-infused character El Pachuco burst onto the stage, cutting his way through the drop curtain with a switchblade, Luis Valdez spurred a revolution in Chicano theater. Focusing on the events surrounding the Sleepy Lagoon Murder Trial of 1942 and the ensuing Zoot Suit Riots that turned Los Angeles into a bloody war zone, this is a gritty and vivid depiction of the horrifying violence and racism suffered by young Mexican Americans on the home front during World War II. Valdez's cadre of young urban characters struggle with the stereotypes and generalizations of America's dominant culture, the questions of assimilation and patriotism, and a desire to rebel against the mainstream pressures that threaten to wipe them out. Experimenting with brash forms of narration, pop culture of the war era, and complex characterizations, this quintessential exploration of the Mexican-American experience in the United States during the 1940's was the first, and only, Chicano play to open on Broadway. This collection contains three of playwright and screenwriter

Luis Valdez's most important and recognized plays: *Zoot Suit*, *Bandido!* and *I Don't Have to Show You No Stinking Badges*. The anthology also includes an introduction by noted theater critic Dr. Jorge Huerta of the University of California-San Diego. Luis Valdez, the most recognized and celebrated Hispanic playwright of our times, is the director of the famous farm-worker theater, *El Teatro Campesino*.

brazosport rehab wellness llc: Patients at Risk Niran Al-Agba, Rebekah Bernard, 2020-11-01
Patients at Risk: The Rise of the Nurse Practitioner and Physician Assistant in Healthcare exposes a vast conspiracy of political maneuvering and corporate greed that has led to the replacement of qualified medical professionals by lesser trained practitioners. As corporations seek to save money and government agencies aim to increase constituent access, minimum qualifications for the guardians of our nation's healthcare continue to decline—with deadly consequences. This is a story that has not yet been told, and one that has dangerous repercussions for all Americans. With the rate of nurse practitioner and physician assistant graduates exceeding that of physician graduates, if you are not already being treated by a non-physician, chances are, you soon will be. While advocates for these professions insist that research shows that they can provide the same care as physicians, patients do not know the whole truth: that there are no credible scientific studies to support the safety and efficacy of non-physicians practicing without physician supervision. Written by two physicians who have witnessed the decline of medical expertise over the last twenty years, this data-driven book interweaves heart-rending true patient stories with hard data, showing how patients have been sacrificed for profit by the substitution of non-physician practitioners. Adding a dimension neglected by modern healthcare critiques such as *An American Sickness*, this book provides a roadmap for patients to protect themselves from medical harm. WORDS OF PRAISE and REVIEWS Al-Agba and Bernard tell a frightening story that insiders know all too well. As mega corporations push for efficiency and tout consumer focused retail services, American healthcare is being dumbed down to the point of no return. It's a story that many media outlets are missing and one that puts you and your family's health at real risk. --John Irvine, *Deductible Media* Laced with actual patient cases, the book's data and patterns of large corporations replacing physicians with non-physician practitioners, despite the vast difference in training is enlightening and astounding. The authors' extensively researched book methodically lays out the problems of our changing medical care landscape and solutions to ensure quality care. --Marilyn M. Singleton, MD, JD A masterful job of bringing to light a rapidly growing issue of what should be great concern to all of us: the proliferation of non-physician practitioners that work predominantly inside algorithms rather than applying years of training, clinical knowledge, and experience. Instead of a patient-first mentality, we are increasingly met with the sad statement of Profits Over Patients, echoed by hospitals and health insurance companies. --John M. Chamberlain, MHA, LFACHE, Board Chairman, Citizen Health A must read for patients attempting to navigate today's healthcare marketplace. --Brian Wilhelmi MD, JD, FASA

Scolieri, 2020 In January 1969, just months before the Stonewall Riots, Ted Shawn (1891-1972) wanted to tell a story about how his life, writings, and dances contributed to the rapidly evolving gay liberation movement around him. Shawn died before he was able to put forth a candid account about how he, the Father of American Dance, was homosexual, but he scrupulously archived his correspondence, diaries, photographs, and motion pictures of his dances, anticipating that the full significance of his choreography would reveal itself in time. Ted Shawn: His Life, Writings, and Dances tells that story.

brazosport rehab wellness llc: *Rhapsody in Schmaltz* Michael Wex, 2016-04-12 Bagels, deli sandwiches and gefilte fish are only a few of the Jewish foods to have crossed into American culture and onto American plates. Rhapsody in Schmaltz traces the history and social impact of the cuisine that Yiddish-speaking Jews from Central and Eastern Europe brought to the U.S. and that their American descendants developed and refined. The book looks at how and where these dishes came to be, how they varied from region to region, the role they played in Jewish culture in Europe, and the role that they play in Jewish and more general American culture and foodways today. Rhapsody in Schmaltz traces the pathways of Jewish food from the Bible and Talmud, to Eastern Europe, to its popular landing pads in North America today. With an eye for detail and a healthy dose of humor, Michael Wex also examines how these impact modern culture, from temple to television. He looks at Diane Keaton's pastrami sandwich in Annie Hall, Andy Kaufman's stint as Latke on Taxi and Larry David's Passover seder on Curb Your Enthusiasm, shedding light on how Jewish food permeates our modern imaginations. Rhapsody in Schmaltz is a journey into the sociology, humor, history, and traditions of food and Judaism.

brazosport rehab wellness llc: This Messy Magnificent Life Geneen Roth, 2018-03-06 Geneen Roth, author of the #1 New York Times bestseller *Women Food and God*, explains how to take the journey to find one's own best self in this "beautiful, funny, deeply relevant" (Glennon Doyle) collection of personal reflections. With an introduction by Anne Lamott, *This Messy Magnificent Life* is a personal and exhilarating read on freeing ourselves from daily anxiety, lack, and discontent. It's a deep dive into what lies behind our self-criticism, whether it is about the size of our thighs, the expression of our thoughts, or the shape of our ambitions. And it's about stopping the search to fix ourselves by realizing that on the other side of the "Me Project" is spaciousness, peace, and the capacity to reclaim one's power and joy. *This Messy Magnificent Life* explores the personal beliefs, hidden traumas, and social pressures that shape not just women's feelings about their bodies

but also their confidence, choices, and relationships. After years of teaching retreats and workshops on weight, money, and other obsessions, Roth realized that there was a connection that held her students captive in their unhappiness. With laugh-out-loud humor, compassion, and dead-on insight she reveals the paradoxes in our beliefs and shows how to move beyond our past to build lives that reflect our singularity and inherent power. This Messy Magnificent Life is a brilliant, bravura meditation on who we take ourselves to be, what enough means in our gotta-get-more culture, and being at home in our minds and bodies.

brazosport rehab wellness llc: *The Dead Man* Drac Von Stoller, 2024-11-09 The Wilson mansion loomed against the autumn sky like a dying thing, its Victorian turrets piercing the low-hanging clouds. Located miles from the nearest town, the estate's wrought-iron gates were perpetually rusted half-open, as if eternally inviting - or warning away - visitors. Local teenagers whispered stories about the place, about the screams that sometimes echoed across the overgrown grounds on moonless nights. But Dr. Clive Wilson paid no attention to such tales. In his basement laboratory, surrounded by humming machines and walls of mysterious equipment, he was on the verge of something unprecedented. The doctor's hands, once steady enough to perform the most delicate surgeries, now trembled with excitement as he reviewed his notes for the thousandth time. The formulas, the calculations, the precise measurements of electrical current needed to bridge the gap between life and death - it was all there, waiting to be proven. His daughter Maria watched him from the doorway of his study, her dark eyes filled with concern. At twenty-four, she had inherited her late mother's ethereal beauty - pale skin, raven hair, and features that seemed almost too perfect to be real. But lately, living alone in this massive house with only her increasingly obsessed father for company had taken its toll. Dark circles had formed under her eyes, and her once-vibrant smile had faded to something more haunted. Father, she said softly, you need to rest. You've been at this for days. Dr. Wilson barely looked up from his notes. Just a little longer, dear. The alignment of the electromagnetic fields must be perfect. One miscalculation and... He trailed off, lost again in his work. Maria sighed and retreated to her room, where she spent hours staring out the window at the family cemetery that dotted the far corner of the property. The marble mausoleum stood like a sentinel among the weathered headstones, holding generations of Wilsons in its cold embrace. She often wondered if her mother's spirit wandered those grounds, and if so, what she would think of what her husband had become. When Derrick Stevens answered the advertisement in the

newspaper, it seemed like fate. He appeared at their door one crisp morning, his blonde hair catching the autumn sun like a halo. Maria felt her heart stop when their eyes met – his were the color of a summer sky, bright and clear and full of life. But there was something else there too, a shadow of desperation that made her want to reach out and comfort him. Dr. Wilson's eyes lit up for entirely different reasons when he saw Derrick. Here was his perfect subject – young, healthy, and most importantly, alone in the world. The doctor's questions during the interview were precise, calculated: No living relatives? No close friends in the area? Perfect. What Dr. Wilson didn't count on was the way Derrick and Maria gravitated toward each other. During the preliminary tests, they would steal glances across the laboratory. When Dr. Wilson was absorbed in his work, they would meet in the garden, walking among the dying roses and sharing pieces of their lives. Derrick told her about the car crash that took his parents, about bouncing between foster homes, about his failed modeling career and mounting debts. Maria shared her own loneliness, her mother's death, her father's growing obsession with his work. The mansion seemed less oppressive with Derrick there. For the first time in years, laughter echoed through its halls. But Dr. Wilson noticed the change in his daughter, saw the way she looked at Derrick, and something dark began to grow in his heart. The thought of losing his only child to this penniless drifter, of being truly alone in his great house of shadows, was unbearable. When Dr. Wilson's old colleague, Dr. Steve Timmons, arrived to witness the experiment, the tension in the mansion was palpable. Timmons was a cautious man, his years of medical practice having taught him that playing God always came with a price. He watched with growing unease as Dr. Wilson explained the procedure – how Derrick would be technically dead for precisely three minutes before being brought back through a specific sequence of electromagnetic pulses, activated by a series of taps on the control panel. Three taps, pause, two taps, Dr. Wilson demonstrated, his fingers drumming on his desk with practiced precision. The sequence must be exact. Derrick had done this before, multiple times, each successful resurrection building Dr. Wilson's confidence. But this time was different. Just before the experiment began, Maria burst into the laboratory, her face glowing with joy, an engagement ring sparkling on her finger. Derrick and I are getting married! she announced. The look that crossed Dr. Wilson's face in that moment was something Dr. Timmons would never forget – a flash of such primal rage and fear that it transformed his features
