brics business forum 2024: The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies

that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

brics business forum 2024: The BRICS Andrew Fenton Cooper, 2016 Brazil, Russia, India, China and South Africa represent almost 18 per cent of the world economy, with their contribution to world growth having already exceeded 50 per cent. But what does the emergence of the BRICS mean for global politics? Andrew Cooper discusses the BRICS as a concept and its practice in global politics.

brics business forum 2024: BRICS or Bust? Hartmut Elsenhans, Salvatore Babones, 2017-09-12 Once among the fastest developing economies, growth has slowed or stalled in Brazil, Russia, India, China, and South Africa. What policies can governments enact to jump-start the rise of these middle-income countries? Hartmut Elsenhans and Salvatore Babones argue that economic catch-up requires investment in the productivity of ordinary citizens. Diverging from the popular narrative of increased liberalization, this book argues specifically for direct government investment in human infrastructure; policies that increase wages and the bargaining power of labor; and the strategic use of exchange rates to encourage export-led growth. These measures raise up the majority and finance future productivity by driving broader consumption and fostering investment within national borders. Though strategies like full employment, mass education, and progressive taxation are not especially controversial, none of the BRICS have truly embraced them. Examining barriers to implementation, Elsenhans and Babones find that the main obstacle to such reforms is an absence of political will, stemming from closely guarded elite privilege under the current laws. BRICS or Bust? is a short, incisive read that underscores the need for demand-driven growth and why it has yet to be achieved.

brics business forum 2024: The BRICS Order David Monyae, Bhaso Ndzendze, 2021-02-08 This book examines the direction of the BRICS association. Beginning with historical analyses of the broader Global South and the fundamental composition of the BRICS countries and then moving on to present trends, *The BRICS Order* evaluates the variables that will influence the association's future. While the BRICS as a forum emerged as a result of the visible fragmentation of the post-1945 world order, it itself remains dogged by issues emanating from internal divergences among member states and from external factors. The contributors interrogate the extent to which this formation of “emerging economies” is indicative of a challenge to the West, or in fact a complimentary relation. Integral to these studies – which encompass examinations of such diverse areas as governance systems, issues in bilateral relations, security threats, multilateral institution building, the transnational creation and dissemination of knowledge, and technological innovation – are patterns of convergence and divergence which render the countries not a formal alliance, but as signifiers of a multilateral future in which the West is itself to become more heterogeneous and thus become occasionally complemented depending on the vacillating consensus within the BRICS association and on the interests of the BRICS countries at different points in time.

brics business forum 2024: Global Food Value Chains and Competition Law Ioannis Lianos,

Alexey Ivanov, Dennis Davis, 2022-05-05 The food industry is a notoriously complex economic sector that has not received the attention it deserves within legal scholarship. Production and distribution of food is complex because of its polycentric character (as it operates at the intersection of different public policies) and its dynamic evolution and transformation in the last few decades (from technological and governance perspectives). This volume introduces the global value chain approach as a useful way to analyse competition law and applies it to the operations of food chains and the challenges of their regulation. Together, the chapters not only provide a comprehensive mapping of a vast comparative field, but also shed light on the intricacies of the various policies and legal fields in operation. The book offers a conceptual and theoretical framework for competition authorities, companies and academics, and fills a massive gap in the competition policy literature dealing with global value chains and food.

brics business forum 2024: Brazillionaires Alex Cuadros, 2016 When Bloomberg News invited the young American journalist Alex Cuadros to report on Brazil's emerging class of billionaires at the height of the historic Brazilian boom, he was poised to cover two of the biggest business stories of our time: how the giants of the developing world were taking their place at the center of global capitalism, and how wealth inequality was changing societies everywhere. The billionaires of Brazil and their massive fortunes resided at the very top of their country's economic pyramid, and whether they quietly accumulated exceptional power or extravagantly displayed their decadence, they formed a potent microcosm of the world's richest .001 percent. They held sway over the economy, government, media, and stewardship of the environment; they determined the spiritual fates and populated the imaginations of their countrymen. In 2012, Eike Batista ranked as the eighth-richest person in the world, was famous for his marriage to a beauty queen, and was a fixture in the Brazilian press. But by 2015, Batista was bankrupt, his son Thor had been indicted for manslaughter, and Brazil--its president facing impeachment, its provinces combating an epidemic, and its business and political class torn apart by scandal--had become a cautionary tale of a country run aground by its elites. Over four years, Cuadros reported on media moguls and televangelists, energy barons and shadowy figures from the years of military dictatorship, soy barons who lived on the outskirts of the Amazon, and new-economy billionaires spinning money from speculation. His zealous reporting takes us from penthouses to courtrooms, from favelas to art fairs, from scenes of unimaginable wealth to desperate, massive street protests. Within a business narrative that deftly dramatizes the volatility of the global economy, Cuadros offers us literary journalism with a grand sweep.--Adapted from dust jacket.

brics business forum 2024: BRICS and the New American Imperialism Vishwas Satgar, Ferrial Adam, Samir Amin, Patrick Bond, William K Carroll, Christopher Chase-Dunn, Alexander Gallas, Ana Garcia, Karina Kato, Nivedita Majumdar, Keamogetswe Seipato, 2020-03-01 Challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism BRICS is a grouping of the five major emerging economies of Brazil, Russia, India, China and South Africa. Volume five in the Democratic Marxism series, BRICS and the New American Imperialism challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism. It offers novel analyses of BRICS in the context of increasing US induced imperial chaos, deepening environmental crisis tendencies (such as climate change and water scarcity), contradictory dynamics inside BRICS countries and growing subaltern resistance. The authors revisit contemporary thinking on imperialism and anti-imperialism, drawing on the work of Rosa Luxemburg, one of the leading theorists after Marx, who attempted to understand the expansionary nature of capitalism from the heartlands to the peripheries. The richness of Luxemburg's pioneering work inspires most of the volume's contributors in their analyses of the dangerous contradictions of the contemporary world as well as forms of democratic

agency advancing resistance. While various forms of resistance are highlighted, among them water protests, mass worker strikes, anti-corporate campaigning and forms of cultural critique, this volume grapples with the challenge of renewing anti-imperialism beyond the NGO-driven World Social Forum and considers the prospects of a new horizontal political vessel to build global convergence. It also explores the prospects of a Fifth International of Peoples and Workers.

brics business forum 2024: Emerging Markets and the Future of the BRIC Nations Kelly Aceto, 2015-10-30 In 2008, it appeared that the BRIC nations' economies would continue to provide growth opportunities for businesses of all kinds. After a decade of unprecedented growth, however, Brazil, Russia, India, and China have unexpectedly slowed. In this innovative book, expert contributors diagnose and examine the factors that might be responsible for the changing trends in the BRIC and other emerging market economies and that may determine the future course of these economies and their prospects for sustained growth. This volume offers valuable insights into a wide range of issues pertaining to emerging economies that demand the attention of researchers and practitioners. In particular, contributors explore topics such as the importance of innovation, internationalization trends of emerging market firms, sustainability and social issues, market liberalization and entrepreneurship, consumer behavior and customer relations. Rigorous scholarly research, including empirical work, and perspectives from emerging markets make this an essential resource for doctoral students, business academics and executives, and politicians and policy makers involved in developing nations and their economies.

brics business forum 2024: The BRICs Superpower Challenge Kwang Ho Chun, 2016-03-23 In an imaginative and interesting way, Kwang Ho Chun seeks to capture the dynamics of the changing international system and the prospects for a change in the international distribution of

power. The idea that new superpowers could rise and that some of the BRICs (Brazil, Russia, India and China) could be such superpowers, is particularly intriguing and the main idea explored in this study. In line with neo-realist approaches, this book argues that in a unipolar world competitors will rise to challenge the global hegemon. As the power profiles of the BRICs rise and they gain greater control of geo-global politics, they are likely to attain significant regional dominance among other regional powers although their underdeveloped tradition of hard power and internal challenges could prevent them from gaining superpower status. This book captures the dynamics of the changing international system and the prospects for a change in the international distribution of power.

brics business forum 2024: *The Coordination Of Brics Development Strategies Towards Shared Prosperity* Linggui Wang, Jianglin Zhao, 2019-10-03 BRICS countries, namely Brazil, Russia, India, China and South Africa (known as bloc), have been working closely together for more than a decade in areas as politics, economics, culture and security. The bloc plays a crucial role in facilitating the growth of not only emerging markets and developing countries, but also the world economy as a whole. Just as importantly, it contributes significantly towards improving global governance and the welfare of those living in BRICS countries. Contributed by more than 20 experts from major think tanks in BRICS countries, the chapters in this book analyze how the BRICS countries have realized shared prosperity and achieved global prominence by cooperating with one another. In addition, the authors also look at challenges faced by the bloc, and possible solutions to those problems.

brics business forum 2024: *BRICS and Global Governance* John Kirton, Marina Larionova, 2018-02-13 The past few decades have witnessed the development of an increasingly globalised and multipolar world order, in which the demand for multilateralism becomes ever more pronounced. The BRICS group established in 2009, has evolved into a plurilateral summit institution recognized both by sceptics and proponents as a major participant in the international system. Addressing the BRICS's role in global governance, this book critically examines the club's birth and evolution, mechanisms of inter-BRICS cooperation, its agenda priorities, BRICS countries' interests, decisions made by members, their collective and individual compliance with the agreed commitments, and the patterns of BRICS engagement with other international institutions. This volume advances the current state of knowledge on global governance architecture, the BRICS role in this system, and the benefits it has provided and can provide for world order. This book will interest scholars and graduate students who are researching the rise and role of emerging powers, global governance, China and India's approach to global order and relationship with the United States, Great Power politics, democratization as a foreign policy strategy, realist theory-building and hegemonic transitions, and the (crisis of) liberal world order.

brics business forum 2024: *How We Win* Farah Pandith, 2019-03-12 "Drawing on her decades of experience, Pandith unweaves the tangled web of extremism and demonstrates how government officials, tech CEOs, and concerned citizens alike can do their part to defeat it." – Former Secretary of State Madeleine K. Albright There is a war being fought, and we are losing it. Despite the billions of dollars spent since 9/11 trying to defeat terrorist organizations, the so-called Islamic State, Al Qaeda, and other groups remain a terrifying geopolitical threat. In some ways the threat has grown worse: The 9/11 hijackers came from far away; the danger today can come from anywhere—from the other side of the world to across the street. Unable to stem recruitment, we seem doomed to a worsening struggle with a constantly evolving enemy that remains several steps ahead of us. Unfortunately, current policies seem almost guaranteed not to reduce extremist violence but instead to make it easier for terrorists to spread their hateful ideas, recruit new members, and carry out attacks. We actually possess the means right now to inoculate communities against extremist ideologies. In *How We Win*, Farah Pandith presents a revolutionary new analysis of global extremism as well as powerful but seldom-used strategies for vanquishing it. Drawing on her visits to eighty

countries, the hundreds of interviews and focus groups she's conducted around the world, and her high-level experience in the Bush and Obama administrations, Pandith argues for a paradigm shift in our approach to combat extremism, one that mobilizes the expertise and resources of diplomats, corporate leaders, mental health experts, social scientists, entrepreneurs, local communities, and, most of all, global youth themselves. There is a war being fought, and we can win it. This is how.

brics business forum 2024: Post-Western World Oliver Stuenkel, 2017-09-05 With the United States' superpower status rivalled by a rising China and emerging powers like India and Brazil playing a growing role in international affairs, the global balance of power is shifting. But what does this mean for the future of the international order? Will China dominate the 21st Century? Will the so-called BRICS prove to be a disruptive force in global affairs? Are we headed towards a world marked by frequent strife, or will the end of Western dominance make the world more peaceful? In this provocative new book, Oliver Stuenkel argues that our understanding of global order and predictions about its future are limited because we seek to imagine the post-Western world from a parochial Western-centric perspective. Such a view is increasingly inadequate in a world where a billions of people regard Western rule as a temporary aberration, and the rise of Asia as a return to normalcy. In reality, China and other rising powers that elude the simplistic extremes of either confronting or joining existing order are quietly building a parallel order which complements today's international institutions and increases rising powers' autonomy. Combining accessibility with expert sensitivity to the complexities of the global shift of power, Stuenkel's vision of a post-Western world will be core reading for students and scholars of contemporary international affairs, as well as anyone interested in the future of global politics. A fascinating interpretation of our understanding of politics and global affairs, which demonstrates the evolving nature of power today. Oliver Stuenkel presents a compelling argument - not just about the Rise of the Rest, but also the overlooked power and influence of the non-Western world. Highly engaging and instructive. Dr Shashi Tharoor, India's Minister of State for External Affairs (2009-10) Oliver Stuenkel is one of the best new voices in the field of international politics. In Post-Western World, he explores the primary challenges of the global order and critiques the parochial, Eurocentric vision which conforms to international power structures. This book is essential reading for anyone seeking to understand what a multipolar world order would look like and how it might be effectively realized. Celso Amorim, Brazil's Minister of External Relations (1993-5, 2003-11) and Minister of Defence (2011-15)

brics business forum 2024: The BRICS and the Future of Global Order Oliver Stuenkel, 2020-02-03 The transformation of the BRIC acronym from an investment term into a household name of international politics and into a semi-institutionalized political outfit (called BRICS, with a capital 'S'), is one of the defining developments in international politics in the past decades. While the concept is now commonly used in the general public debate and international media, there has not yet been a comprehensive and scholarly analysis of the history of the BRICS term. The BRICS and the Future of Global Order, Second Edition offers a definitive reference history of the BRICS as a term and as an institution—a chronological narrative and analytical account of the BRICS concept from its inception in 2001 to the political grouping it is today. In addition, it analyzes what the rise of powers like Brazil, Russia, India, China, and South Africa means for the future of global order. Will the BRICS countries seek to establish a parallel system with its own distinctive set of rules, institutions, and currencies of power, rejecting key tenets of liberal internationalism, are will they seek to embrace the rules and norms that define today's Western-led order?

brics business forum 2024: Global China Tarun Chhabra, Rush Doshi, Ryan Hass, 2021-06-22 The global implications of China's rise as a global actor In 2005, a senior official in the George W. Bush administration expressed the hope that China would emerge as a "responsible stakeholder" on the world stage. A dozen years later, the Trump administration dramatically shifted course, instead calling China a "strategic competitor" whose actions routinely threaten U.S. interests. Both assessments reflected an underlying truth: China is no longer just a "rising" power. It has emerged as a truly global actor, both economically and militarily. Every day its actions affect nearly every region and every major issue, from climate change to trade, from conflict in troubled lands to

competition over rules that will govern the uses of emerging technologies. To better address the implications of China's new status, both for American policy and for the broader international order, Brookings scholars conducted research over the past two years, culminating in a project: *Global China: Assessing China's Growing Role in the World*. The project is intended to furnish policy makers and the public with hard facts and deep insights for understanding China's regional and global ambitions. The initiative draws not only on Brookings's deep bench of China and East Asia experts, but also on the tremendous breadth of the institution's security, strategy, regional studies, technological, and economic development experts. Areas of focus include the evolution of China's domestic institutions; great power relations; the emergence of critical technologies; Asian security; China's influence in key regions beyond Asia; and China's impact on global governance and norms. *Global China: Assessing China's Growing Role in the World* provides the most current, broad-scope, and fact-based assessment of the implications of China's rise for the United States and the rest of the world.

brics business forum 2024: *Education for sustainable development in BRICS* Ewelina K. Niemczyk, 2023-03-01 In the past ten years, the concept of education for sustainable development has become one of UNESCO's key educational initiatives to address current global challenges. However, the attention was mainly devoted to primary and secondary education, and higher education was somewhat neglected. The primary focus on basic education has also diverted academic attention from the research exploring the relationship between higher education and sustainable development. Only recently has the academic discourse on this topic begun to gain ground. On that note, this book is meant to place higher education at the core of the necessary transformations to create awareness of more sustainable practices and policies.

They examine the origins of these cultures from the historical and geographical perspectives.

brics business forum 2024: *Domestic Constraints on South Korean Foreign Policy* Scott A. Snyder, Geun Lee, Young Ho Kim, Jiyeon Kim, 2018-01-01 These essays support the argument that strong and effective presidential leadership is the most important prerequisite for South Korea to sustain and project its influence abroad. That leadership should be attentive to the need for public consensus and should operate within established legislative mechanisms that ensure public accountability. The underlying structures sustaining South Korea's foreign policy formation are generally sound; the bigger challenge is to manage domestic politics in ways that promote public confidence about the direction and accountability of presidential leadership in foreign policy.

brics business forum 2024: *Structural Change and Industrial Development in the BRICS* Wim Naudé, Adam Szirmai, Nobuya Haraguchi, 2015-06-18 This book provides a unique and timely analysis of the role of structural change in the economic development of Brazil, Russia, India, China, and South Africa (BRICS) with a consideration for the role of industry, and in particular manufacturing. The emergence of BRICS reflects an ongoing change in the international economic order. BRICS now account for very substantial part of global GDP, global manufactured value added and global manufactured exports. The book examines their economic experiences and structural change in BRICS over the past three decades, identifying both differences and commonalities, and deriving lessons for other industrializing countries. Section I contains comparative studies focusing on the commonalities and differences of the experiences of BRICS. Section II includes six country studies providing a more detailed analysis of the long-run experiences of each of the countries. Section III consists of a set of seven thematic studies focusing on specific topics such as global value chains, the role of transnational corporations in the food chain, the role of foreign versus domestic investment, the role of domestic versus foreign demand in economic growth the diffusion of environmental energy technology and the similarities, and the differences in industrial policies

pursued in the five countries. The book contains a summary chapter that provides an integrated perspective of the various contributions from the point of view of poverty reduction and development. It asks, whether the patterns of structural change and industrial development that BRICS experienced, had an impact on poverty outcomes, and if so, what were the channels and the consequences?

brics business forum 2024: Red Roulette Desmond Shum, 2021-09-07 THE BOOK CHINA DOESN'T WANT YOU TO READ.--CNN A riveting insider's story of how the Party and big money work in China today, by a man who, with his wife, Whitney Duan, rose to the zenith of power and wealth--and then fell out of favor. She was disappeared four years ago. News of this book led to a phone call from Whitney, proof that she's alive. As Desmond Shum was growing up impoverished in China, he vowed his life would be different. Through hard work and sheer tenacity he earned an American college degree and returned to his native country to establish himself in business. There, he met his future wife, the highly intelligent and equally ambitious Whitney Duan who was determined to make her mark within China's male-dominated society. Whitney and Desmond formed an effective team and, aided by relationships they formed with top members of China's Communist Party, the so-called red aristocracy, he vaulted into China's billionaire class. Soon they were developing the massive air cargo facility at Beijing International Airport, and they followed that feat with the creation of one of Beijing's premier hotels. They were dazzlingly successful, traveling in private jets, funding multi-million-dollar buildings and endowments, and purchasing expensive homes, vehicles, and art. But in 2017, their fates diverged irrevocably when Desmond, while residing overseas with his son, learned that his now ex-wife Whitney had vanished along with three coworkers. This is both Desmond's story and Whitney's, because she has not been able to tell it herself.

brics business forum 2024: *The Rise of the BRICS in Africa* Pádraig Carmody, 2013-09-12 A little over a decade ago Africa was being spoken of in the media as the 'lost' or 'hopeless' continent. Now it has some of the fastest growing economies in the world, largely because of the impact of the BRICS: Brazil, Russia, India, China and South Africa. In this first book to be written about the BRICS as a collective phenomenon, Pádraig Carmody reveals how their engagements with Africa, both individually and collectively, are often contradictory, generating new inequalities and potential for development. Crucially, Carmody shows how the geopolitics of the BRICS countries' involvement in Africa is impacted by and impacts upon their international relations more generally, and how the emergence of these economies has begun to alter the very nature of globalization, which is no longer purely a Western-led project. This is a path-breaking examination of Africa's changing role in the world.

brics business forum 2024: **India-Brazil-South Africa Dialogue Forum (IBSA)** Oliver Stuenkel, 2019-11-12 The establishment of the IBSA as one of the principal platforms of South-South cooperation is one of the most notable developments in international politics during the first decade of the twenty-first century. While the concept is now frequently referred to in discussions about the Global South, there has not yet been a comprehensive and scholarly analysis of the history of the IBSA grouping and its impact on global order. This book: Offers a definitive reference history of the IBSA grouping (India, Brazil and South Africa) - a comprehensive, fact-focused narrative and analytical account from its inception as an ad hoc meeting in 2003 to the political grouping it is today. Situates the IBSA grouping in the wider context of South-South cooperation and the global shift of power away from the United States and Europe towards powers such as Brazil, India and South Africa. Provides an outlook and critically assesses what the IBSA grouping means for global order in the twenty-first century. Offering the first full-length and detailed treatment of the IBSA, this work will be of great interest to students and scholars of International organizations, international relations and the global south.

brics business forum 2024: *India at the Global High Table* Teresita C. Schaffer, Howard B. Schaffer, 2016-04-05 An integrated picture of India's global vision, its foreign policy, and the negotiating practices that link the two. In recent decades, India has grown as a global power, and has been able to pursue its own goals in its own way. Negotiating for India's Global Role gives an insightful and integrated analysis of India's ability to manage its evolving role. Former ambassadors Teresita and Howard Schaffer shine a light on the country's strategic vision, foreign policy, and the negotiating behavior that links the two. The four concepts woven throughout the book offer an exploration of India today: its exceptionalism; nonalignment and the drive for "strategic autonomy;" determination to maintain regional primacy; and, more recently, its surging economy. With a specific focus on India's stellar negotiating practice, *Negotiating for India's Global Role* is a unique, comprehensive understanding of India as an emerging international power player, and the choices it will face between its classic view of strategic autonomy and the desirability of finding partners in the fast-evolving world.

brics business forum 2024: *China's Disruptors* Edward Tse, 2015-07-14 In September 2014, Chinese e-commerce giant Alibaba raised \$25 billion in the world's biggest-ever initial public offering. Since then, millions of investors and managers worldwide have pondered a fundamental question: What's really going on with the new wave of China's disruptors? Alibaba wasn't an outlier—it's one of a rising tide of thriving Chinese companies, mostly but not exclusively in the technology sector. Overnight, its founder, Jack Ma, appeared on the same magazine covers as American entrepreneurial icons like Mark Zuckerberg. Ma was quickly followed by the founders of other previously little-known companies, such as Baidu, Tencent, and Xiaomi. Over the past two decades, an unprecedented burst of entrepreneurialism has transformed China's economy from a closed, impoverished, state-run system into a major power in global business. As products in China become more and more sophisticated, and as its companies embrace domestically developed technology, we will increasingly see Chinese goods setting global standards. Meanwhile, companies in the rest of the world wonder how they can access the fast-rising incomes of China's 1.3 billion consumers. Now Edward Tse, a leading global strategy consultant, reveals how China got to this point, and what the country's rise means for the United States and the rest of the world. Tse has spent more than twenty years working with senior Chinese executives, learning firsthand how China's most powerful companies operate. He's an expert on how private firms are thriving in what is still, officially, a communist country. His book draws on exclusive interviews and case studies to explore questions such as *What drives China's entrepreneurs? Personal fame and fortune—or a quest for national pride and communal achievement? *How do these companies grow so quickly? In 2005, Lenovo sold just one category of products (personal computers) in one market, China. Today, not only is it the world's largest PC seller; it is also the world's third-largest smartphone seller. *How does Chinese culture shape the strategies and tactics of these business leaders? Can outsiders copy what the Chinese are doing? *Can capitalists really thrive within a communist system? How does Tencent's Pony Ma serve as a member of China's parliament while running a company that dominates online games and messaging? *What impact will China have on the rest of the world as its private companies enter new markets, acquire foreign businesses, and threaten established firms in countless industries? As Tse concludes: "I believe that as a consequence of the opening driven by China's entrepreneurs, the push to invest in science, research, and development, and the new freedoms that people are enjoying across the country, China has embarked on a renaissance that could rival its greatest era in history—the Tang dynasty. These entrepreneurs are the front line in China's intense hunger for success. They will have an even more remarkable impact on the global economy in the future, through the rest of this decade and beyond."
