business tower hotel lima: The Report: Peru 2015 Oxford Business Group, 2015-01-12 Expanding at an average rate of 6.4% per annum since the mid-2000s, Peru's economic growth has been remarkable, but also heavily dependent on one sector. Driven by a sharp rise in commodity prices, the mining industry spurred Peru's economy to the fastest sustained growth rate in Latin America during much of the past decade. The end of the commodities supercycle however, saw economic growth slow down substantially over the course of 2014, with the central bank revising growth projections to 3.1% in mid-October. In a bid to stimulate growth, the government has intensified diversification efforts and introduced a series of measures aimed at promoting investment. The current economic slowdown, attributable in part to delays in some major mining developments, is generally seen as a temporary one, and growth is expected to pick up again in 2015. While mining will remain the backbone of the Peruvian economy - in particular from 2016 and beyond as several large-scale copper projects come on-line - other sectors, including industry and tourism, should begin to play increasingly important roles.

business tower hotel lima: Cities of Power Göran Therborn, 2017-05-02 In this brilliant, very original survey of the politics and meanings of urban landscapes, leading sociologist Gran Therborn offers a tour of the world's major capital cities, and the forces that have shaped them. Through a global, historical lens, and with a thematic range extending from the mutations of modernist architecture to the contemporary return of urban revolutions, Therborn questions received assumptions about the source, manifestations and reach of urban power, combining perspectives on politics, sociology, urban planning, architecture, and urban iconography. With its unique systematic overview, from Washington DC and revolutionary Paris to the flamboyant twenty-first century capital of Kazakhstan, its wealth of urban observations from all the populated continents, and its sharp and multi-faceted analyses, *Cities of Power* forces us to rethink our urban future, as well as our historically shaped present.

In making these decisions, we have been assisted by an Advisory Board. As in the first volume, we have continued to define the word architect very broadly, so as to include planners, theorists, structural engineers, and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day. --Editor's note.

business tower hotel lima: *Unholy Alliance* David Yallop, 2014-10-23 Imagine a company so big and so powerful that its annual turnover is equal in size to China's entire GDP. A company whose gross turnover for just one financial year is sufficient to buy at current market value the world's three largest public companies: General Electric, Royal Dutch Shell and Microsoft. A company that if it dipped into its petty cash could in the same year also buy Coca-Cola. A company where ten days' turnover is in excess of the combined assets of the world's top fifty banks. It exists. Its current annual turnover of more than \$500 billion is derived from just three products: heroin, cocaine, marijuana. The drugs cartel of cartels is a factual reality, but sometimes it is only through fiction that one can get close to the real truth. Drawing on years of experience as a bestselling investigative writer, David Yallop has produced an explosive fiction debut. *Unholy Alliance* is a breath-taking high-speed race that goes straight to the truth behind the modern American nightmare and into an alarming, but all too believable future.

business tower hotel lima: *The Lake Shore Electric Railway Story* Herbert H. Harwood, Jr., Robert S. Korach, 2015-09-14 From 1901 to 1938 the Lake Shore Electric claimed to be—and was considered by many—The Greatest Electric Railway in the United States. It followed the shore of Lake Erie, connecting Cleveland and Toledo with a high-speed, limited-stop service and pioneered a form of intermodal transportation three decades before the rest of the industry. To millions of people the bright orange electric cars were an economical and comfortable means of escaping the urban mills and shops or the humdrum of rural life. In summers during the glory years there were never enough cars to handle the crowds. After reaching its peak in the early 1920s, however, the Lake Shore Electric suffered the fate of most of its sister lines: it was now competing with automobiles, trucks, and buses and could not rival them in convenience. The *Lake Shore Electric Railway Story* tells the story of this fascinating chapter in interurban transportation, including the missed opportunities that might have saved this railway.
