been celebrated as Louis XIV's minister of finance, trade, and industry. More recently, he has been viewed as his minister of culture and propaganda. In this lively and persuasive book, Jake Soll has given us a third Colbert, the information manager. ---Peter Burke, University of Cambridge Jacob Soll gives us a road map drawn from the French state under Colbert. With a stunning attention to detail Colbert used knowledge in the service of enhancing royal power. Jacob Soll's scholarship is impeccable and his story long overdue and compelling. ---Margaret Jacob, University of California, Los Angeles Nowadays we all know that information is the key to power, and that the masters of information rule the world. Jacob Soll teaches us that Jean-Baptiste Colbert had grasped this principle three and a half centuries ago, and used it to construct a new kind of state. This imaginative, erudite, and powerfully written book re-creates the history of libraries and archives in early modern Europe, and ties them in a novel and convincing way to the new statecraft of Europe's absolute monarchs. ---Anthony Grafton, Princeton University Brilliantly researched, superbly told, and timely, Soll's story is crucial for the history of the modern state. ---Keith Baker, Stanford University When Louis XIV asked his minister Jean-Baptiste Colbert---the man who was to oversee the building of Versailles and the Royal Academy of Sciences, as well as the navy, the Paris police force, and French industry---to build a large-scale administrative government, Colbert created an unprecedented information system for political power. In *The Information Master*, Jacob Soll shows how the legacy of Colbert's encyclopedic tradition lies at the very center of the rise of the modern state and was a precursor to industrial intelligence and Internet search engines. Soll's innovative look at Colbert's rise to power argues that his practice of collecting knowledge originated from techniques of church scholarship and from Renaissance Italy, where merchants recognized the power to be gained from merging scholarship, finance, and library science. With his connection of interdisciplinary approaches---regarding accounting, state administration, archives, libraries, merchant techniques, ecclesiastical culture, policing, and humanist pedagogy---Soll has written an innovative book that will redefine not only the history of the reign of Louis XIV and information science but also the study of political and economic history. cal poly slo accounting: Local Climate Action Planning Michael R. Boswell, Adrienne I. Greve, Tammy L. Seale, 2012-07-16 Climate change is a global problem, but the problem begins

locally. Cities consume 75% of the world's energy and emit 80% of the world's greenhouse gases. Changing the way we build and operate our cities can have major effects on greenhouse gas emissions. Fortunately, communities across the U.S. are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions. This is the first book designed to help planners, municipal staff and officials, citizens and others working at local levels to develop Climate Action Plans. CAPs are strategic plans that establish policies and programs for mitigating a community's greenhouse gas (GHGs) emissions. They typically focus on transportation, energy use, and solid waste, and often differentiate between community-wide actions and municipal agency actions. CAPs are usually based on GHG emissions inventories, which identify the sources of emissions from the community and quantify the amounts. Additionally, many CAPs include a section addressing adaptation-how the community will respond to the impacts of climate change on the community, such as increased flooding, extended drought, or sea level rise. With examples drawn from actual plans, Local Climate Action Planning guides preparers of CAPs through the entire plan development process, identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective.

Gentile, 2010-08-24 How can you effectively stand up for your values when pressured by your boss, customers, or shareholders to do the opposite? Drawing on actual business experiences as well as on social science research, Babson College business educator and consultant Mary Gentile challenges the assumptions about business ethics at companies and business schools. She gives business leaders, managers, and students the tools not just to recognize what is right, but also to ensure that the right things happen. The book is inspired by a program Gentile launched at the Aspen Institute with Yale School of Management, and now housed at Babson College, with pilot programs in over one hundred schools and organizations, including INSEAD and MIT Sloan School of Management. She explains why past attempts at preparing business leaders to act ethically too often failed, arguing that the issue isn't distinguishing what is right or wrong, but knowing how to act on your values despite opposing pressure. Through research-based advice, practical exercises, and scripts for handling a wide range of ethical dilemmas, Gentile empowers business leaders with the skills to voice and act on their values, and align their professional path with their principles. Giving Voice to Values is an engaging, innovative, and useful guide that is essential reading for anyone in business.

cal poly slo accounting: Giving Voice to Values in Accounting Tara Shawver, William Miller, 2018-10-11 There has been much written on the importance of responsibility accounting and integrated reporting to ensure business accountability, but not on how to be a responsible accountant. As the accounting profession is built on the foundation of maintaining public trust, making the right decisions when faced with a challenging dilemma has a major impact on the long-term performance and perception of the firm as well as personal credibility. Accountants make judgement calls on a regular basis: they are privy to highly confidential information regarding their clients and their clients' businesses. Unethical earnings management practices can easily lead to falsifying records, but how does the accounting professional avoid succumbing to these practices when faced with other pressures? Giving Voice to Values in Accounting is the first book to explain the ethical dilemmas faced by accountants in their day-to-day work and to provide clear guidance for accounting students and professionals in navigating through these issues. The Giving Voice to Values (GVV) framework focuses on resolving ethical conflict by encouraging individuals to act on their values. This book provides accounting educators, coaches, trainers and professionals with both the impetus and the tools to easily implement the GVV offering into their own work, their organizations and in the classroom.

cal poly slo accounting: Nonprofits in Policy Advocacy Sheldon Gen, Amy Conley Wright, 2020-08-01 Policy advocacy is an increasingly important function of many nonprofit organizations, as they seek broad social changes in their concerning issues. Their advocacy practices, however, have often been guided by their own past experiences, anecdotes from peer networks, and consultant advice. Most of their practices have largely escaped empirical and theoretical grounding that could better root their work in established theories of policy change. The first book of its kind, *Nonprofits in Policy Advocacy* bridges this gap by connecting real practices of on-the-ground policy advocates with the burgeoning academic literature in policy studies. In the process, it empirically identifies six distinct policy advocacy strategies, and their accompanying tactics, used by nonprofits. Case studies tell the stories of how advocates apply these strategies in a wide variety of issues including civil rights, criminal justice, education, energy, environment, public health, public infrastructure, and youth. This book will appeal to both practitioners and academicians, as each gains insights into the other's views of policy change and the actions that produce it.

Just adjacent to these municipal links lies the Mayflower Country Club, the most exclusive private course in all of Boston and a major needle in their collective sides. Frustrated by the Mayflower's finely manicured greens and snooty members, three of Ponky's finest and most courageous—Two Down, Dannie, and Stick—set up a bet: \$1,000.00 apiece, and the first man to somehow finagle his way on to the Mayflower course takes all. Lying, cheating, and forgery are encouraged, to put it mildly, and with the constant heckling and rare aid of Chunkin' Charlie, Hoover, and Bluto--a few more of Ponky's elite--the games begin. One of the three will eventually play the Mayflower's course, but their friendships--and everything else--will change as various truths unravel and the old Ponky starts looking like the home they never should have left.

For instance, we know Southwest Airlines as laid back and friendly. We think of Google as innovative. To almost every well-known company we can assign a character. It is now well recognized that corporate culture has a significant impact on organizational health and performance. Yet, the concept of corporate culture and culture management is too often tantalizingly elusive. In this book, Flamholtz and Randle define culture, identifying and explaining the five key dimensions that determine it: a customer orientation; a people orientation; a process orientation; strong standards of performance and accountability; innovation and openness to change. They explain why culture is a critical factor in organizational success and failure—a key determinant of financial performance. Then, they provide a theoretically sound, highly practical, and field-tested method for managing corporate culture—presenting a set of international and domestic cases that show how actual companies have leveraged culture as the ultimate source of sustainable competitive advantage. In addition to well-known companies such as Starbucks, Ritz-Carlton, American Express, IBM, and Toyota, the text presents lesser known culture stars, such as Smartmatic and Infogix. While other titles on culture have focused too heavily on the organization as a psychological being, or on academic studies of culture as a business lever, *Corporate Culture* draws on empirics to present a go-to, must-read guide for leveraging corporate culture as a source of competitive advantage and as a means of impacting the bottom line.

A singular example of lived creativity, his radical performances are odds with the art worlds and art marketplaces that have increasingly dominated contemporary art and performance art over the period of his career. Queer Communion, an exploration of Athey's career, refuses the linear narratives of art discourse and instead pays homage to the intensities of each mode of Athey's performative practice and each community he engages. Emphasizing the ephemeral and largely uncollectible nature of his work, the book places Athey's own writing at its center, turning to memoir, memory recall, and other modes of retrieval and narration to archive his performances. In addition to documenting Athey's art, ephemera, notes, and drawings, the volume features commissioned essays, concise object lessons on individual objects in the Athey archive, and short testimonials by friends and collaborators by contributors including Dominic Johnson, Amber Musser, Julie Tolentino, Ming Ma, David Getsy, Alpesh Patel, and Zackary Drucker, among others. Together they form Queer Communion, a counter history of contemporary art.

cal poly slo accounting: For the Love of Cities Peter Kageyama, 2011 The mutual love affair between people and their place is one of the most powerful influences in our lives, yet rarely thought of in terms of a relationship. As cities begin thinking of themselves as engaged in a relationship with their citizens, and citizens begin to consider their emotional connections with their places, we open up new possibilities in community, social and economic development by including the most powerful of motivators-the human heart-in our toolkit of city-making. The book explores what makes cities lovable, what motivates ordinary citizens to do extraordinary things for their places and how some cities, such as New Orleans, Detroit, and Cleveland are using that energy to fill in the gaps that official city makers have left as resources have disappeared. Meet those amazing people who are truly in love with their cities and learn how they are key to the future development of our communities. Praise for the book: What Kageyama has done is to introduce the vital piece into the urban discussion-- the matter of love; the piece without which all city building must fail, for love the corner stone of civic citizenship. It takes some bravura and acumen to champion the subject of love in the urban forum that wants to quantify, when only love qualifies and justifies the discussion of cities. Mr. Kageyama goes one step further. He provides precious indicators. Many city thinkers will follow suit, but for the time being, this is the essential book. Pier Giorgio Di Cicco Poet Laureate Emeritus, Toronto, Ontario Author of Municipal Mind: Manifestos for The Creative City For the Love

of Cities succeeds in putting an exclamation point on the exceptional value of deepening the relationship that city dwellers feel for their neighborhoods by adding amenities such as parks, outdoor cafes, art galleries, trees, flowers and even sidewalks to create a meaningful sense of place. It also explores the often hidden added value of creative entrepreneurs in creating a sense of place that attracts, nurtures and retains citizens. The book is a love note from Author Peter Kageyama to cities everywhere that will prompt you to more closely examine your own relationship with where you live, work and play. Diane Egner Publisher and Managing Editor, 83 Degrees Media Former Book Editor, The Tampa Tribune For the Love of Cities is a must read for city changemakers. Jeff Slobotski Silicon Prairie News & Founder, Big Omaha Peter has captured something very important... love. When we love a city, we are committed to it, we engage with it, we care for it, we give our best to it. A city that is loved also gives back. It makes those who live there feel enriched. And so you have a virtuous cycle. Charles Landry Author of The Creative City: A Toolkit for Urban Innovators and The Art of City Making
