Mihesuah, Elizabeth Hoover, 2019-08-02 "All those interested in Indigenous food systems, sovereignty issues, or environment, and their path toward recovery should read this powerful book." —Kathie L. Beebe, *American Indian Quarterly* Centuries of colonization and other factors have disrupted indigenous communities' ability to control their own food systems. This volume explores the meaning and importance of food sovereignty for Native peoples in the United States, and asks whether and how it might be achieved and sustained. Unprecedented in its focus and scope, this collection addresses nearly every aspect of indigenous food sovereignty, from revitalizing ancestral gardens and traditional ways of hunting, gathering, and seed saving to the difficult realities of racism, treaty abrogation, tribal sociopolitical factionalism, and the entrenched beliefs that processed foods are superior to traditional tribal fare. The contributors include scholar-activists in the fields of ethnobotany, history, anthropology, nutrition, insect ecology, biology, marine environmentalism, and federal Indian law, as well as indigenous seed savers and keepers, cooks, farmers, spearfishers, and community activists. After identifying the challenges involved in revitalizing and maintaining traditional food systems, these writers offer advice and encouragement to those concerned about tribal health, environmental destruction, loss of species habitat, and governmental food control.

choctaw nation small business grants: A Sketch of the Life of Okah Tubbee Laah Ceil Manatoi Elaah Tubbee, 2018-10-01 A Sketch of the Life of Okah Tubbee, published in 1852, begins with testimonials regarding Okah Tubbee's flute-playing abilities and with a lightly edited version of Lewis Allen's Essay Upon the Indian Character from the earlier edition of Tubbee's narrative, as well as the so-called Indian Covenant between the Six Nations and the Choctaws. Tubbee's narrative begins with brief recollections of his father and Tubbee's childhood with his unnatural mother. Tubbee's visit to Choctaw Indians in Alexandria is described before his apprenticeship to the cruel blacksmith Mr. Russell, and his subsequent apprenticeship to Dr. A.P. Merrill, leading to his desire to become an Indian Doctor. Tubbee details his travels and voyages by steamboat, first as a musician with the Louisiana Volunteers and later on his own. Towards the end of his narrative, Tubbee expresses a desire to let his wife, Laah Ceil, speak for herself. In this final, additional section, Laah Ceil describes her birth, her education, her Christian convictions, and the manner in which she met and married Tubbee. She also recounts their travels together and their advocacy in behalf of the Indians and against forced relocation. The Sketch concludes with an original poem by Laah Ceil and a collection of letters, documents, and vouchers attesting to Okah Tubbee's identity and his medical skill. A DOCSOUTH BOOK. choctaw nation small business grants: **Teaching with Poverty in Mind** Eric Jensen, 2010-06-16 In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals * What poverty is and how it affects students in school; * What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain); * Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and * How to engage the resources necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.

Gillette, 2010-07-09 Head Start, Job Corps, Foster Grandparents, College Work-Study, VISTA, Community Action, and the Legal Services Corporation are familiar programs, but their tumultuous beginning has been largely forgotten. Conceived amid the daring idealism of the 1960s, these programs

originated as weapons in Lyndon Johnson's War on Poverty, an offensive spearheaded by a controversial new government agency. Within months, the Office of Economic Opportunity created an array of unconventional initiatives that empowered the poor, challenged the established order, and ultimately transformed the nation's attitudes toward poverty. In *Launching the War on Poverty*, historian Michael L. Gillette weaves together oral history interviews with the architects of the Great Society's boldest experiment. Forty-nine former poverty warriors, including Sargent Shriver, Adam Yarmolinsky, and Lawrence F. O'Brien, recount this inside story of unprecedented governmental innovation. The interviews capture the excitement and heady optimism of Americans in the 1960s along with their conflicts and disillusionment. This new edition of *Launching the War on Poverty* adds the voice of Lyndon Johnson to the story with excerpts from his recently-released White House telephone conversations. In these colorful and brutally candid conversations, LBJ exercises his full arsenal of presidential powers, political leverage, and legendary persuasiveness to win one of his most difficult legislative battles. The second edition also documents how the OEO's offspring survived their volatile origins to become broadly supported features of domestic policy.

In this sweeping narrative history, acclaimed scholar Walter Nugent explores this fundamental American contradiction by recounting the story of American land acquisition since 1782 and shows how this steady addition of territory instilled in the American people a habit of empire-building. From America's early expansions into Transappalachia and the Louisiana Purchase through later additions of Alaska and island protectorates in the Caribbean and Pacific, Nugent demonstrates that the history of American empire is a tale of shifting motives, as the early desire to annex land for a growing population gave way to securing strategic outposts for America's global economic and military interests. Thorough, enlightening, and well-sourced, this book explains the deep roots of American imperialism as no other has done.

choctaw nation small business grants: The Five Civilized Tribes Grant Foreman, 2013-04-17 Side by side with the westward drift of white Americans in the 1830's was the forced migration of the Five Civilized Tribes from Mississippi, Alabama, Georgia, and Florida. Both groups were deployed against the tribes of the prairies, both breaking the soil of the undeveloped hinterland. Both were striving in the years before the Civil War to found schools, churches, and towns, as well as to preserve orderly development through government and laws. In this book Grant Foreman brings to light the singular effect the westward movement of Indians had in the cultivation and settlement of the Trans-Mississippi region. It shows the Indian genius at its best and conveys the importance of the Cherokees, Chickasaws, Choctaws, Creeks, and Seminoles to the nascent culture of the plains. Their achievements between 1830 and 1860 were of vast importance in the making of America.
