clifton park laser and wellness: The One Thing You Need to Know Marcus Buckingham, 2008-09-04 Drawing on a wide body of research, including extensive in-depth interviews, THE ONE THING YOU NEED TO KNOW reveals the central insights that lie at the core of: Great Managing, Great Leadership and Great Careers. Buckingham uses a wealth of relevant examples to reveal that at the heart of each insight lies a controlling insight. Lose sight of this 'one thing' and all of your best efforts at managing, leading, or individual achievement will be diminished. For great managing, the controlling insight has less to do with fairness, or team building, or clear expectations (although all are important). Rather, the one thing great managers know is the need to discover and then capitalize on what is unique about each person. For leadership, the controlling insight is the opposite - discover and capitalize on what is universal to all your people, regardless of differences in personality, race, sex, or age. For sustained individual success, the controlling insight is the need to discover what you don't like doing, and know how and when to stop doing it. In every way a groundbreaking work, THE ONE THING YOU NEED TO KNOW offers crucial performance and career lessons for business people at every level.

clifton park laser and wellness: The Soil and Health Albert Howard, 2011-01-23 During his years as a scientist working for the British government in India, Sir Albert Howard conceived of and refined the principles of organic agriculture. Howard's *The Soil and Health* became a seminal and inspirational text in the organic movement soon after its publication in 1945. *The Soil and Health* argues that industrial agriculture, emergent in Howard's era and dominant today, disrupts the delicate balance of nature and irrevocably robs the soil of its fertility. Howard's classic treatise links the burgeoning health crises facing crops, livestock, and humanity to this radical degradation of the Earth's soil. His message—that we must respect and restore the health of the soil for the benefit of future generations—still resonates among those who are concerned about the effects of chemically enhanced agriculture.

The text is divided into three sections and commences with a discussion of the essential elements of diet, including sections on carbohydrates, proteins, fats, vitamins and trace elements, and drugs associated with nutrition. disrupts established feeding patterns or introduces new hazards), environmental aspects of nutrition (including altitude and heat), and the role of sports nutritional products.

This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship. Our joint values put people first. If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients, then our efforts will have succeeded.

inhabitants. But as real estate on this tiny barrier island becomes increasingly valuable, residents are calling upon world-class designers to help fine-tune their visions, giving rise to a fresh tropical design vernacular. Fashion designer Josie Natori, for instance, asked architect Calvin Tsao to transform a standard two-bedroom apartment into an airy retreat with rattan furniture and ethnic accessories that are perfectly suited to Palm Beach's subtropical setting and pay tribute to her Asian heritage. These homes aren't slavish copies of interior design magazines or decorators' dictates but testaments to what can be achieved when inspired by the natural beauty of a unique locale and when imagination is one's only limitation. *Tropical Chic: Palm Beach at Home* captures the enduring charm of newly restored seaside fantasies by Mizner, Fatio and Volk, celebrated for their Cuban coquina courtyards and soaring miradors overlooking tiled pools and arching fountains. Jennifer Ash Rudick, a long-time Palm Beach resident, leads an insider's tour of twenty-five houses, cottages, Moorish casbahs, artists' compounds, and Mad Men-era vintage condos. Jessica Klewicki, a Palm Beach-based photographer, captures extraordinary gardens, verandas, lakeside pavilions, a rustic ranch, and simple pastel Bermudan houses sheltered by dense thickets of Norfolk pines and age-old banyans. It is this eclectic mix of old and new, of Spanish and Caribbean, of contemporary design and sun-faded WASP thrift, that makes Palm Beach chic.
