Despite this, many people with hearing loss do not seek or receive hearing health care. The reasons are numerous, complex, and often interconnected. For some, hearing health care is not affordable. For others, the appropriate services are difficult to access, or individuals do not know how or where to access them. Others may not want to deal with the stigma that they and society may associate with needing hearing health care and obtaining that care. Still others do not recognize they need hearing health care, as hearing loss is an invisible health condition that often worsens gradually over time. In the United States, an estimated 30 million individuals (12.7 percent of Americans ages 12 years or older) have hearing loss. Globally, hearing loss has been identified as the fifth leading cause of years lived with disability. Successful hearing health care enables individuals with hearing loss to have the freedom to communicate in their environments in ways that are culturally appropriate and that preserve their dignity and function. Hearing Health Care for Adults focuses on improving the accessibility and affordability of hearing health care for adults of all ages. This study examines the hearing health care system, with a focus on non-surgical technologies

and services, and offers recommendations for improving access to, the affordability of, and the quality of hearing health care for adults of all ages.

costco fife business center: Fresh Fruit, Broken Bodies Seth M. Holmes, Jorge Ramirez-Lopez, 2023-11-28 Fresh Fruit, Broken Bodies provides an intimate examination of the everyday lives, suffering, and resistance of Mexican migrants in our contemporary food system. Seth Holmes, an anthropologist and MD in the mold of Paul Farmer and Didier Fassin, shows how market forces, anti-immigrant sentiment, and racism undermine health and health care. Holmes was invited to trek with his companions clandestinely through the desert into Arizona and was jailed with them before they were deported. He lived with Indigenous families in the mountains of Oaxaca and in farm labor camps in the United States, planted and harvested corn, picked strawberries, and accompanied sick workers to clinics and hospitals. This "embodied anthropology" deepens our theoretical understanding of the ways in which social inequities come to be perceived as normal and natural in society and in health care. In a substantive new epilogue, Holmes and Indigenous Oaxacan scholar Jorge Ramirez-Lopez provide a current examination of the challenges facing farmworkers and the lives and resistance of the protagonists featured in the book.

costco fife business center: Hidden Mercy Michael J. O'Loughlin, 2021-11-30 The 1980s and

1990s, the height of the AIDS crisis in the United States, was decades ago now, and many of the stories from this time remain hidden: A Catholic nun from a small Midwestern town packs up her life to move to New York City, where she throws herself into a community under assault from HIV and AIDS. A young priest sees himself in the many gay men dying from AIDS and grapples with how best to respond, eventually coming out as gay and putting his own career on the line. A gay Catholic with HIV loses his partner to AIDS and then flees the church, focusing his energy on his own health rather than fight an institution seemingly rejecting him. Set against the backdrop of the HIV and AIDS epidemic of the late twentieth century and the Catholic Church's crackdown on gay and lesbian activists, journalist Michael O'Loughlin searches out the untold stories of those who didn't look away, who at great personal cost chose compassion--even as he seeks insight for LGBTQ people of faith struggling to find a home in religious communities today. This is one journalist's--gay and Catholic himself--compelling picture of those quiet heroes who responded to human suffering when so much of society--and so much of the church--told them to look away. These pure acts of compassion and mercy offer us hope and inspiration as we continue to confront existential questions about what it means to be Americans, Christians, and human beings responding to those most in need.

costco fife business center: *Dry Ports - A Global Perspective* Dr Gordon Wilmsmeier, Professor Kevin Cullinane, Professor Rickard Bergqvist, 2013-05-28 As centres for logistics activities, seaports have traditionally been the focus of maritime logistics chains. However, changes in production patterns, supported by the development of rapid transport of goods over long distances, have altered the logistics landscape. As a result, the relevance of port hinterland transport has become more important, with a consequent need for the high utilisation of transport resources and infrastructure through the consolidation of cargo flows and for seaports to extend their influence within their hinterlands to increase their competitiveness. The development worldwide of inland ports, terminals and dryports in their various forms, together with associated new functions and strategies, address these challenges in diverse ways to realise the potential benefits that come from the successful implementation of inland ports that connect seamlessly into transportation systems. This book comprises case studies and state-of-the-art examples of dryports in different parts of the world that have varying economic, social, institutional and environmental realities and which exhibit the complexity of, and diverse approaches to, this recent logistics phenomenon.

costco fife business center: *Full-Rip 9.0* Sandi Doughton, 2013-06-11 Scientific reportage on what we know and don't know about the mega-earthquake predicted to hit the Pacific Northwest Scientists have identified Seattle, Portland, and Vancouver as the urban centers of what will be the biggest earthquake—the Really Big One—in the continental United States. A quake will happen—in fact, it's actually overdue. The Cascadia subduction zone is 750 miles long, running along the Pacific coast from Northern California up to southern British Columbia. In this fascinating book, The Seattle Times science reporter Sandi Doughton introduces readers to the scientists who are dedicated to understanding the way the earth moves and describes what patterns can be identified and how prepared (or not) people are. With a 100% chance of a mega-quake hitting the Pacific Northwest,

this fascinating book reports on the scientists who are trying to understand when, where, and just how big The Big One will be.

costco fife business center: The Code Margaret O'Mara, 2020-07-07 One of New York Magazine's best books on Silicon Valley! The true, behind-the-scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O'Mara became one of our most consequential historians of the American-led digital revolution, she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet. There she saw firsthand how deeply intertwined Silicon Valley was with the federal government--and always had been--and how shallow the common understanding of the secrets of the Valley's success actually was. Now, after almost five years of pioneering research, O'Mara has produced the definitive history of Silicon Valley for our time, the story of mavericks and visionaries, but also of powerful institutions creating the framework for innovation, from the Pentagon to Stanford University. It is also a story of a community that started off remarkably homogeneous and tight-knit and stayed that way, and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second-order effects. Deploying a wonderfully rich and diverse cast of protagonists, from the justly famous to the unjustly obscure, across four generations of explosive growth in the Valley, from the forties to the present, O'Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form. She is on the ground with all of the key tech companies, chronicling the evolution in their offerings through each successive era, and she has a profound fingertip feel for the politics of the sector and its relation to the larger cultural narrative about tech as it has evolved over the years. Perhaps most impressive, O'Mara has penetrated the inner kingdom of tech venture capital firms, the insular and still remarkably old-boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market, or not. The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams--and, increasingly, our nightmares--can be understood, in Margaret O'Mara's masterful hands, as the story of one California valley. As her majestic history makes clear, its fate is the fate of us all.

costco fife business center: Coming Out Jewish Jon Stratton, 2003-09-02 Like many Jews of our generation, Jon Stratton grew up in a family more concerned about assimilation than about preserving Jewish tradition. While he could easily 'pass' among non-Jews, he found himself increasingly torn between his fear of not belonging and a deeply-felt commitment to his family's past. Coming Out Jewish examines the unique challenge of constructing an identity amid the clash between ethnicity and conformity. For many Jews, the idea of full assimilation ended with the Holocaust. But the pressure to adapt to the mainstream, Stratton eloquently argues, remains powerful, especially for those with anglicized names, assimilationist parents, a history of recent immigration, or ambivalent experiences of themselves as Jews. With reference to the work of Daniel

Boyarin, Ien Ang, and Homi Bhabha, among others, Stratton offers fresh analysis on a wide range of topics, including the Jewish origins of pluralism in the US, anti-Semitism in Germany, the Jewishness of sitcoms like Seinfeld, and the Yiddishization of American culture since World War II. More than a book about Jews and Jewishness, *Coming Out Jewish* smartly and accurately mines the Jewish experience in the West to give voice to the issues of migration, Diaspora, assimilation and identity that affect those, displaced and 'othered', around the world.

Insights & inspiration from thought leader, NFL star, sports analyst & entrepreneur Jordan Babineaux. Change is inevitable, but the beautiful thing is that it allows us to reinvent ourselves. Former NFL defensive back Jordan Babineaux has mastered the art of capitalizing on moments of uncertainty and upheaval to reach for the next goal. In *Pivot to Win*, Jordan candidly shares the challenges of rising through the NFL to fulfill a dream he envisioned for himself when he was just a kid. As a pro footballer, Big Play Babs worked relentlessly while keeping an eye out for the inevitable pivot away from football as he approached retirement. Jordan opens up about the jarring reality of leaving the NFL, starting a broadcast career, and becoming an entrepreneur, consultant, and owner of several businesses. Through his story, Jordan shows how all readers can beat the odds to create the life they want. In *Pivot to Win*, Jordan explains: (1) How to cultivate the mentality and determination needed to pivot successfully; (2) Why pivots are hard and what tools you need to persevere; and (3) Why having a *Pivot to Win Playbook* is critical for anyone who desires greatness. Each of us faces numerous pivots every day-it's time to make them work for you. Jordan's message will inspire and resonate with everyone as he shares ideas on his journey to self-mastery. Let Jordan help you make the big plays in life and business.

costco fife business center: *Organization Theory* Kevin A. Carson, 2008 This book applies the economic principles of individualist anarchism, as developed in *Studies in Mutualist Political Economy*, to the study of the large organization. It integrates the insights of mainstream organization theory into that framework, along with those of more radical thinkers like Ivan Illich, Paul Goodman, and R.A. Wilson. Part One examines the ways in which state intervention in the market, including subsidies to the inefficiency costs of large size and regulatory protection against the competitive consequences of inefficiency, skews the size of the predominant business artificially upward to an extent that simply could not prevail in a free market. Part Two examines the effects of such large organizational size on the character of the system as a whole. Part Three examines the internal pathologies and contradictions of organizations larger than a free market could support. And Part Four surveys the potential building blocks of an alternative, decentralized and libertarian economic order.
