**Emile Durkheim:** His work examined the social functions of work, exploring how it contributes to social solidarity and integration. He also analyzed the impact of industrialization on social life.

**Harriet Martineau:** A pioneering feminist sociologist, Martineau highlighted the gendered division of labor and the unequal treatment of women in the workplace. Her work provided early insights into gender inequality in the professional sphere.

These theorists, among many others, provided foundational insights that continue to shape research and understanding within the sociology of work and employment.

## **Current Issues and Future Directions**

The field is constantly evolving, adapting to the rapidly changing nature of work. Some pressing contemporary issues include:
